English français español deutsch italiano português русский 中文 العربية 日本語 Thank you for visiting my online office. I hope that this site will allow you to find relevant information, whether it is for research on Congress or to visit Washington, D.C. After serving as an elected official for over thirty years, I believe in regular contact with the constituency and I am confident that you will stay engaged as I continue to represent you in the Halls of Congress. If you need more information or support, please do not hesitate to contact me or my staff. I'm also looking forward to your comments on how I can improve District 7 for you. D-Fend Reloaded 1.4.4 is a new feature and bug fix and release service. D-Fend Reloaded 1.4.4 fixes all bugs found since the release of version 1.4.3 and brings some new features. A complete list of all changes can be found in the changelog file. All available versions can be downloaded from the download page. Saturday, June 27, 2015 D-Fend Reloaded 1.4.3 has been released. D-Fend Reloaded 1.4.3 is a new feature and bug fix and release service. D-Fend Reloaded 1.4.3 fixes all bugs found since the release of version 1.4.2 and brings some new features. A complete list of all changes can be found in the changelog file. All available versions can be downloaded from the download page. Monday, September 29, 2014 D-Fend Reloaded as Project of the Week. D-Fend Reloaded is one of the featured Project of the Week week from September 29 to October 5 on Sourceforge. Older news... D-Fend Reloaded is a graphical environment for DOSBox. DOSBox simulates a complete computer that includes the DOS command line and enables to run nearly all older DOS-based games on modern hardware with any newer version of Windows. With DOSBox there's no need to worry about free regular ram or memory managers, but setting up DOSBox is still a bit complicated. Configuring DOSBox through text-based setup files can be difficult for beginners. D-Fend Reloaded can help and create these files for you. Also D-FendThe installation package contains DOSBox (including all lanuage files currently available), so only one installation is running and there is no need to manually link D-Fend Reloaded to DOSBox. [Overview of all features...] The difference between D-Fend and D-Fend Reloaded In some way D-Fend Reloaded is a successor to the D-Fend stop software. Both environments look the same and D-Fend Reloaded contains all the features of D-Fend. Even D-Fend configuration files are compatible with the current program. However, unlike D-Fend, D-Fend Reloaded is open source. The development goal for D-Fend Reloaded is (besides compability 100% D-Fend) to make program operations simpler for DOSBox beginners. At the same time more features for admin and configuration are already available. Download D-Fend-Reloaded-1.4.4-Setup.exe (15.3 MB) This package contains D-Fend Reloaded 1.4.4 (Brazilian Portuguese, Czech, Danish, Dutch, English, French, German, Italian, Polish, Russian, Simplified Chinese, Spanish, Traditional Chinese & Turkish), DOSBox 0.74 (including all currently in use language files) and FreeDos command line tools. D-Fend-Reloaded-1.4.4-UpdateSetup.exe (5.9 MB) This package requires an existing D-Fend Reloaded installation and will update this installation to version 1.4.4. This package contains D-Fend Reloaded 1.4.4 (Brazilian Portuguese, Czech, Danish, Dutch, English, French, German, Italian, Polish, Russian, Chinese simplified, Spanish, Traditional Chinese & Turkish) and DOSBox 0.74 (including all language files currently in use). A list of all changes from previous versions can be found in the changelog file. More versions (zip packages, source code) and some test application packages can be downloaded from the Downloads page. Contacting your help is very welcome! You can contact me via eMail (see the program information dialog in D-Fend Reloaded) or through the Vogons forum. Error reports, language files, icons, and feature requests are also welcome at any time. Before submitting an error report, please check the list of known errors to see if your error is probably known and fixed.
