Chennai, Tamil Nadu Provening Company-Provider Video Contact Supplier Request quote Watch related video List of laboratory tools and their use of Clinical Pathology Laboratory Tools Introduction Pathology Lab Show More Video V This is a list of tools used in general in laboratories, including: Biochemistry Microbiology Pharmacology you can help by adding missing elements with reliable sources. The tool list tool uses a Tube Folin-Wu tube glass slide mycole and the lid slides into microscopy. Serology, etc., as a solid support on which the test samples of the Petri dish, used to prepare the cultural media and culture of organisms, are taken in a glass glass glass battery storage of a glass flask of stomach acid, or other liquid to pasteur pipette for aspiration and addition of reagents, often minuscule amounts of material; Used mainly in racy syringes Disposable disease prevention gloves (until not cut or perforated) or from the user of the Turnstile it is used to cause artificial venous stagnation by applying pressure through this rubber tube. This leads to engorgement of veins, allowing them to be seen more easily. Used for intravenous injections and canulation. The microscope used to visualize the smallest structures including the microbes of the Bunsen burner or the spiritual lamps or candle source of fire/heat Ultracentrifuge is used for individual particles scattered in the liquid according to their molecular mass Electrophoresis apparatus used to detect and classify serum proteins or proteins from any other source; also used for chromatography of DNA separation: Gas chromatography or gas-liquid chromatography (GLC) Planar chromatography Paper chromatography Thin layer of chromatography Affinity chromatography Ion exchange of chromat chromatography with exception - counterturc chromatography - countertoke-chromatography - analysis of hematology - analysis of the hematology - analysis of the or RIA previously it's been widely used to detect different things things bold liquids, such as proteins (natural, infectious, produced by the body in response to diseases, or cancer-related), tumor markers, hormones, viruses (hepatitis, or HIV) etc. Setting up enzyme-related immunosorbent analysis (ELISA) is now widely used to detect various things in bold fluids like proteins (natural, infectious, those produced by the body in response to disease, or cancer-related), tumor markers, hormones, viruses, hiv, and hiv. The color is used in photochemical analysis and quantification of substances such as blood sugar, creatinine and hemoglobin. Burette is used to measure the amount of acid or lye Used in the caption Common laboratory stands, racks, filter paper, reagents, etc. Induction coils as a source of high-voltage electricity Cathode ray oscilloscope \* Recording cymograph historically, used in human or animal experiments to measure and record data Long extension kymograph historically, used in or human experiments on animals to measure and record data Surface It is used to determine kinetic constant interactions (ka, k, CD). It can also be used for thermodynamic analysis. Photomother Testers in racks Beaker Burette A cuvette from the colorometer cup Petri Micropiet set micropiet, handed out by Pipettes Glass Pasteur with nipples flask Colorimeter (spectrophotometer) Microtypical plates Antique light microscope Gel electrophoresis apparatus High-speed centrifuge Ultrairfruge Gaschromatograph ISBN 81-7381-332-9 - Robbins and Cotran, Pathology Review, ISBN 0-7216-0194-4 - Basic Clinical Pharmacology, Bertram G. Katsung, ISBN 978-0-07-141092-2 Received from
