The Power is a 2010 self-help and spirituality book written by Rhonda Byrne. This is the sequel to the 2006 book The Secret. It was released on August 17, 2010, along with a sound book. The Mission of the Power: The philosophy and vision of the secret is to bring joy to the billions. To bring joy to the world, the Secret creates life-transforming tools for mediums books, movies, and multi-media. With each creature of mystery, we strive to share the true, simple and practical knowledge that will transform people's lives. [1] The power of the title is the power of love, the main source of the universe. Much of The Power describes how Byrne greets every single moment with overwhelming love and gratitude to the whole creation. The book is based on the Law of Attraction and argues that positive thinking can create life-changing outcomes like increased happiness, health, and wealth. Byrne describes this as a fundamental universal law relative to gravity. There are observations in The Power, such as the importance of being kind to the water. Researchers have he writes, discovered that when water is exposed to positive words and feelings such as love and gratitude, the energy level of water not only increases, but the structure of the water changes, making it perfectly harmonious. ... When water is exposed to negative emotions, such as hatred, energy levels in the water decrease and chaotic changes occur. [2] Since the head is 80 percent water inside, the author believes this is very important. The Law of Attraction Main Article: Law of Attraction (New Thought) The Law of Attraction states that whatever someone experiences in life is a direct result of their thoughts. Byrne claims it's really that simple. According to The Secret and The Power, one's thoughts and feelings have magnetic properties and frequencies. They vibrate and resonate with the universe, somehow attracting events that share these frequencies. [3] According to Byrne, the three rules of the Law of Attraction are: Ask, Believe, and Receive. As Byrne says, that means: Like attracting like. This means in simple terms your life: what you give out, you get back. Whatever you give out in life is what you get back in life. Whatever you give, according to the law of attraction, is exactly what you attract. In other words, if you want good things to happen, be a good person, think positive thoughts. [4] Reviews The book's claims are highly controversial and have been criticized by critics and readers. The book has also been heavily criticized by former believers and practitioners, with some claiming that the concept of Secret was conceived by the author and that the only people generating wealth and happiness from it are the author and publishers. [2] Critics claim that the book is based on a pseudoscient science theory called the Law of Attraction- a principle that attracts it as much as it does. [1] The New York Times reported in a highly critical review in 2010 that The Power and The Secret is obscured by references to magnets, energy, and quantum mechanics. The latter is a dead giveaway: if you hear someone appeal to impenetrable physics to explain the workings of the mind, run away, there are already disciplines called psychology and neuroscience to address these issues. Byrne's pseudo-scientific jargon is mostly used to create the illusion of knowledge, as social scientists call it, that we tend to believe that we understand something much better than we really do. [2] Jerry Adler wrote in Newsweek that The Power gives false hope to those who really need more traditional help in their lives. [4] References ^ a b Byrne, Rhonda. The Power. Paul Harrington.
