Texas jurisprudence exam study guide pdf

The problem and solution is an organizational model where the information in a passage is expressed as a dilemma or on the problem (a problem) and something that was, may be, or should be done to fix this problem (solution or tried solution). The problem and structure of the solution text may seem to be easily recognizable, but it can be moderately difficult to identify, as it is frequently confused with the cause-and-effect model of the organization. Since both have organizational structures, however, if you read the passage and specifically look for both a problem and a solution to the problem, you should find that it is quite easier to distinguish from cause and effect, as cause and effect passages do not propose solutions to any negative events within the passage, but rather just explain why it happens. Example: Looks like there's been a wave in teen pregnancies these days. Teen pregnancies make it very difficult for young mothers to follow their dreams and meet the requirements of a child. Fortunately, most teen pregnancies can be easily prevented by using birth control; however, even birth control is not 100% effective. The most effective way to prevent teenage pregnancies is abstinence, which is 100% effective. Problem and solution. Proposed solutions for adolescent pregnancies. There are also a few general words that may indicate that the information in a passage is ordered in the problem and model of the organization solution: propose, solution, answer, problem, problem, remedy, prevention, and fix. Here is a simple worksheet on the problem and solution where your students need more practice. Here is a more complex set of text structure worksheets where students are ready to move forward.
