Fundamentals of predictive analytics with jmp pdf download

Genre/Form: Electronic Books Physical Additional Format: Print Version:Klimberg, Ron.Fundamentals predictive analytics JMP / Ron Klimberg and B.D. McCullough.Cary, NC: SAS Institute, 2013(OCOLC)842209297 Material type: Document, Internet resource Document type: Internet resource, Computer file All authors/ participants: Ronald K Klimberg; B D McCullough; SAS Institute. Inquiries: Ronald K Klimberg B D McCullough ISBN: 9781612906232 1612906230 1612904254 9781612904252 OCLC Number: 851754251 Description: 1 online resource (xvi, 274 pages) : Images Content: Introduction -- Statistical overview -- Introduction to complex data -- Regression and ANOVA review -- Logistical regression -- Main component analysis -- Cluster analysis -- Decision trees -- Neural networks -- Model comparison -- Telling a statistical story. Responsibility: Ron Klimberg and B.D. McCullough. Predictive Analytics criteria with JMP bridge the gap between rates for basic statistics focusing on single variable and two-variable analyses and rates for data mining/predictive analytics. It provides the technical knowledge and problem-solving skills needed to perform real data complex analysis. With JMP 10 and JMP Pro, the book provides new and improved resources, including the Microsoft Excel add-in, Graph Builder, and data mining capabilities. Written in primary and postgraduate statistics courses, this book first teaches students how to identify when it is appropriate to use the tool, understand what variables and data are needed, and understand what results might be. Secondly, it teaches them how to interpret the results, followed by step-by-step instructions on how and where to conduct and evaluate JMP analysis. Due to the new emphasis on business intelligence, business analytics and predictive analytics, this book is invaluable to anyone who needs to expand their statistical knowledge and apply real problem-solving analysis. Luwak7365regol3235 - Read and download Ron Klimberg's book The Basics of Predictive Analytics with JMP as a PDF, EPub online. O'Reilly members experience live online training, books, videos and digital content from more than 200 publishers. This updated and expanded second edition of predictive analytics criteria for JMP(R) courses, as well as for professionals who want to make better decisions on data and models, closes the gap between courses in basic statistics focused on single variable and two-variable analyses, and courses on data mining and predictive analytics. In addition to the theoretical basis, this book will give you the technical knowledge and problem-solving skills you need to perform a real complex data analysis. First, this book teaches you to recognize when it is appropriate to use a tool, what variables and data are needed, and what results you may have. Secondly, it teaches to interpret the results and then step by step how and where to perform and evaluate the analysis in the JMP . With JMP 13 and JMP 13 Pro, this book offers the following new and improved features in an example-driven format: Microsoft Excel Graph Builder Dirty Data Visualization Regression ANOVA Logistical Regression Main Component Analysis LASSO ela the most recent neighbouring neural networks start-up forests enhanced the model comparison of the rules for tree text mining with today's business intelligence focus, business analytics and predictive analytics, this second edition is invaluable to everyone, who need to expand their statistical knowledge and apply a real problem-solving analysis. This book is part of the SAS Press program. About this book these authors acknowledge chapter 1: Introduction Historical perspective Two questions that organisations need to get returns on investment Business intelligence and business analytics introductory statistics For cultural change, the problem of dirty data added complexity in the complexity analysis Practical statistical research framework Chapter 2: Statistical review Introduction Basic concepts 1 and 2 Basic concept 3: Understand the basic Z-score concept 4 FC4: Understand the middle limit theorem Learn from example Basic concept 5 Understand the hypothesis testing of one sample Test consider p-values Basic concept 6: Chapter 3: Dirty data Introduction Data detection Abnormal detection Common first steps in receiving a data series Exercises Chapter 4 : Finding data using a multi-variable data introduction Use tables to examine complex data PivotTables table JMP uses charts to examine complex data Graph Scatter Builderplot to explore a larger dataset trellis Diagram Bubble plot to explore real-world dataset Number 5 : Regression and ANOVA Introduction Regression Analysis Variance Perform a single-path ANOVA estimate model performs two-way ANOVA exercises chapter 6 : Logistical regression Introduction Addition technology Linear probability model Logistical function Logistical function A straightforward example using JMP Realistic logistical regression statistical research exercises Chapter 7: Main Components Analysis Introduction Basic Steps JMP Dimension Reduction Finding Structure In Data Straightforward Example of Less Defined Data Exercises Chapter 8: Least Absolute Shrinkage and Selection Operator and Elastic Network Introduction Meaning Bias-Variance Tradeoff Ridge Regression Least Absolute Shrinkage and Selection operator performs technology study results Refine results Elastic network Performs technology study results compare LASSO exercises Chapter 9: Cluster analysis Introduction Hierarchical clustering K-means clustering k-means clustering vs hierarchical clustering exercises chapter 10: Decision trees Introduction Benefits and Disadvantages Definitions and example Theoretical Questions Classification Trees Regression Trees Exercises Chapter 11: k-Nearest Neighbors Introduction k-Nearest Neighbors Analysis Perform Analysis Make Predictions of New Data k-Nearest Neighbor to Multiclass Problems Understand Variables Run Analysis and Study Results K-Nearest Neighbor Regression Models Limitations and Downsides Technology Exercises Chapter 12: Neural Networks Introduction To understand validation methods Holdback Validation k-fold Cross validation Understand hidden layer structure understands options to improve fit model supplement data preparation use JMP example dataset exercises chapter 13: Bootstrap Forests and Enhanced trees Introduction Boots forests enhanced wood exercises Chapter 14 : Introduction to the model comparison Perform a model comparison with a continuous dependent variable Run a model comparison with the binary-dependent variable Run a model comparison of the lift diagram train, using a validation and test file Chapter 15: Introduction to text mining Historical aspect Unstrue data Document thermodynamic development Document thermimatrib Developing a document thermimatrib with a larger data series using multi-variable techniques using predictive techniques, performs a primary analysis to perform logistical regressions Exercises Chapter 16: Market Basket Analysis Introduction Association Analyses Examples Understand support, trust and elevator association rules support trust Raise use JMP to calculate and raise confidence Analyze real data set exercises Chapter 17 : Statistical storytelling Path from complex data to definitions of data mining modelling process Predictive analytics A-frame for predictive analytics technologies Predictive analytics goal , tasks and steps The difference between statistics and data mining SEMMA References Index book Predictive Analytics, renewed and updated Eric Siegel Enchanting & Fascinating... — Seattle Post-Intelligencer The Freakoncs of big data. —Stein Kretsinger , founder ... book Software Engineering At Google by Titus Winters, Tom Manshreck, Hyrum Wright Today software engineers need to know not only how to program efficiently, but also how to ... book Data Science from Scratch, Joel Grus' second edition To learn data science, you shouldn't just master tools - data science libraries, frames, modules, ... book Prescriptive Analytics: Dursun Delen's ultimate science forefront for evidence-based management and optimal decision-making, make better decisions, take advantage of new opportunities, and automate the decision in scalable prescriptive analytics is more direct ...
