How to stop mailer daemon yahoo com failure notice

How do I get rid of the delivery status notification failure? Why does my mail delivery fail? Why do I keep getting demon emails? What does it mean when a Yahoo mailbox is turned off? How do I stop mail demon messages? Where's the demon postman from? Why do I keep getting failure notifications from Yahoo? How do you pronounce the demon mailer? What is a mail delivery subsystem? How do I fix an email that bounced in Gmail? What does a permanent error in e-mail mean? What's a demon in the software? When you receive mail from a MAILER-DAEMON or mail delivery subsystem with a subject similar to Failed Delivery, it means that a message you sent was not delivered and bounced back to you. These messages are generated automatically and usually include a reason for the delivery failure. Messages that failed or bounced usually consist of two parts: The cause of the bounceThe original message. Example of a failure notification Hello. This is the qmail-sending program to yahoo.com.I.I'm afraid I haven't been able to deliver your message to the following addresses. This is a permanent error. I gave up. Sorry it didn't work.123.45.67.89 failed after I sent the message. Remote Host said: 554 delivery error: dd This user does not have a yahoo.com account (testing123@yahoo.com) [-5] - mta123.mail.mud.yahoo.com--- Below this line is a copy of the message. Return Route:Received: (qmail 24519 called by uid 60001) Nov 11, 2010 15:37:25 -0000.....X-Mailer: YahooMail/11.4.9 YahooMailWebService/0.8.107.285259D: Thu, 11 Nov 2010 07:37:24 -0800 (PST)From: Yahoo Customer ServiceSubsland: Test MessageTo: testing123@yahoo.comMIME-Version: 1.0Content-Type: multipart/alternative; boundary=0-162906830-1289489844=:24510--0-162906830-1289489844=:24510Content-Type: text/plain; charset=us-ascii[Text of the original message here]--0-162906830-1289489844=:24510-- The most common reason for a failed delivery is that the e-mail address you entered is invalid. If the Mailer demon reports that the account does not exist, check the spelling of the address you entered again. A single wrong letter may be enough to trigger a failed delivery. If the message still bounced to you, you may want to verify that the account has not been closed or moved. If you receive a failed delivery message for each incoming e-mail message you receive, this could indicate the presence of a non-functional forwarding address. Check the settings for a forwarding address that needs to be updated or deleted. If you find one you don't recognize please review all your email settings too. Yahoo questions? Get 24/7 live specialized help about your Yahoo needs --from emails and passwords, technical questions, mobile emails, and more. Sign up here. When a sent e-mail message is rejected by an e-mail provider, an automated failed delivery notification is sent to the e-mail address in the From field in the original message. If if you do not come from the email that caused the notification, then someone else put your email address in the From field of their outgoing email. This act is known as email spoofing and is often used by spammers to disguise their identity so that their recipients are more likely to open their email. While it's not possible to prevent someone from spoofing by email, it only means they know or guess your email address and don't necessarily have access to your account. Do you still have concerns?
