Zero again as the dream debut of the main character, through the high-resolution performance of Xbox 360, the expression of the character of the game, the touch of the skin will be excellent performance in front of the player and the new addition of similar to the Death or Life series of the dressing system. The game has also added a new tag match dual team mode, players are free to choose a partner to form a 2V2 team, making the game more fun. The use of continuous techniques and must-kill techniques is slightly different from the previous ones, and the atmosphere of multiplayer music is heavier. The continuous technical conditions and difficulty of the game have improved a lot and, of course, the fun has increased a lot. Tactically, players must take different approaches to different opponents to combat different combat skills, while the operational aspects have also been changed, the degree of freedom is wider. RUMBLE ROSES XX was released in 2006, on XBOX 360. The game is a sequel/remake of the first Rumble Roses game released in 2004. Despite being cited for his stunning images, he received mostly average reviews. OverviewEdit players are once again able to take control of a large number of female fighters from all over the world. The main difference this time is that the linear drivetor characters of the previous game were eliminated in favor of a more open sandbox style. While virtually all the characters return, there are practically no references to the events of the first game... leading some to consider it more than a remake. The Face/Heel system is still in place, but with same attention given to both the good person and a bad person of each character. The game has also introduced many new features, including Tag-Teams, the ability to fight in a 3- or 4-way free-for-all, and a 2-on-1 match handicap. Girls can now also accumulate their stats over time, and the player can even modify them, such as an existing muscle mass to make them hit harder or decrease mass to make them faster. Players now have a chance to build their own fighters and use them in the game. A large amount of downloadable content (DLC) could be purchased to further customize both original characters and fan-made characters. Despite all this, the game has been criticized for its lack of a story mode and there is no tangible way to track your fighter's progress towards the title. As a result, the game received only above-average ratings. TriviaEdit Akira Yamaoka is back as lead composer, along with Yankee Rose's cover of Teresa James and Killer Barbies' Have Some Fun. For the introduction of Rowdy Reiko, and in the duet of Reiko & Noble Roses, the original Japanese texts were used. [2] Showbiz's name was changed to Sista A, Dr. Cutter became Dr. Anesthesia, Judgment became Yasha, and Killer Khan became Great Khan. Bloody Shadow has been renamed Benikage, which means the same thing in Japanese. The game manual for Rumble Roses XX has no cast and crew lists, and the game's credits state that English entries were provided by the Rumble Roses XX All-Stars. This is probably a pseudonym collective group for the American cast. This is believed to have been done because the game was a non-union production, and was not sanctioned by the Screen Actors Guild. [3] ReferencesEdit GameHelpHave they played this game? We invite you to read our updated PRIVACY POLICY and COOKIE POLICY. Sometimes I like to think that the game world is growing. With technological advances in recent years and the thrust of video games into mainstream culture, it seems that being a player can be a socially accepted activity, largely thanks to the player base that has grown with the times. But then I play a game like Rumble Roses XX and suddenly I remember who the core demographic is: the guys who like boobs. Rumble Roses XX is all about sexual excess, but unlike so many other similar titles, Rumble Roses XX is at least aware of the fact. From campy and cliched characters who probably suffer from tremendous back pain to some of the ridiculous game formats that would boil more than the blood of some feminists. Rumble Roses XX can be a bit of fun just because it doesn't take itself so seriously. And, honestly, there's a part of me that can casually enjoy that aspect of the game. Sure, I like to think I'm a forward-thinking thinker who's above such mean-looking activities, but actually, watching two succinctly dressed women blanch the pain with each other is a bit of fun. But then there's the other side of me that sees the game for what it really is: a fragile wrestling game that covers its deficiency with said sexual excess. See, there comes a point game in which the parlour tricks that the developers have launched to mask the flaws of the game become completely transparent. Suddenly you notice the huge lack of depth and the rigid combat engine that usually returns cheaply tactics - because once you take off all the T-A, what you have left is a shoddy wrestling game was built on something superficial complete. Butt, if nothing else, at least Rumble Roses XX is easy for the eyes. While they are formed by the latest technologies, the adorable ladies of Rumble Roses XX are amazing, although the old body parts are completely automatic. It's not the best 360-looking title, but it's a huge step up from the latest generation Rumble Roses. Even so, Rumble Roses XX, in a nutshell, is a simple, hyper-sexualized wrestling that underscores its lack of finesse with an amount of agency flashes. It might be worth renting for ogle the ladies, but beyond that, avoid it completely. The basics are omitted, including the role of popularity, gameplay, H skills, etc., can be mentioned here in the article: the UNLOCK role mainly needs UNLOCK is the opposite personality of the initial character, as Reiko's initial role is good, so she needs the opposite personality of UNLOCK is naughty, in addition to Lady Substance X and Lady X Subsistence . And most of the characters in the opposite personality of the UNLOCK condition are to get the championship belt of singles. Getting a single champion belt requires the following conditions: 1. Your opposite personality role cannot have a championship belt 2. At least 15 wins 3. At least three consecutive 4 wins. At least play with all the initial characters (excluding their opposite personality) Be careful! Show and Xbox Live! At the count, more than 3 games of people do not count - after the above conditions you will be challenged the current champion bonus game, beat it to get the championship belt 2, so as to use the opposite personality of the character. misc: 1. After using the character to win the belt, your popularity will never drop again until you lose your belt after 2. If you lose your belt, you will have to meet the four conditions mentioned above to have the chance to get another belt (you are not estimated interested) and the remaining five characters will be different. as there are two characters hidden here, only in Show: Not Not (a bear) - cursor on Black Demon and then LT-ASEbastian (clown) - Cursor on Missres and then on the MUST-kill LT-A There are 3 types of must-kill techniques in the game , one is Killr Move, as long as the kill slot is full and then press LB every time you face your opponent, who belongs to the regular kill. The other is the Lethal Move, which can be launched by pressing LB under certain conditions (depending on where you are with your opponent), and is more powerful than Killer Move. The last is the humiliating H-Move technique, which to the joint technique, which can be thrown as long as the humiliation slot is full, and it's basically a shot that needs to be killed. Lethal move launch conditions at a glance: Aigle - Opponent near the Aisha corner - Face hand, opposing dizziness (there are many ways to cause opposing dizziness, everyone's dizzying makeup is different) Anesthesia - With Aisha Becky - Run to opponent Black Belt Demon - Opponent again to himself, and dizziness Candy Dog - Run to opponent Dixie Clemets - - - Under the legs of opponent Dr. Anesthesia - opponent dropped to the ground, himself in the head of opponent Evil Rose - opponent fell to the ground. Great Khan self-climbed corner board - with Aisha Becky - with Aisha Lady X Substance - No Lady X Subsistence - With Black Belt Demon Miss Spencer - With Black Demon Mistress Spencer - With Aisha Nakoto - With Aisha Noble Rose - With Evil Rose Reiko - With Evil Rose Rowdy Reiko - With Evil Rose Sargeant Clemets - With Aisha Yasha - With Aisha another role with weapons (for example Rowdy Reiko, Mistres Spencer) Launch weapons must kill, launch conditions with Kirer Move, but sometimes they do not have to face the opponent - in Street Fight to launch the conditions of Lethal Move are: punch forward and heavy fist to the enemy in mid-air, and then with the title of double LB to get the doubles champion must meet the following conditions : 1. Make sure that you or your partner are not members of the current doubles league group (as opposed to personality roles) 2. Win at least 10 doubles matches and count

03. At least 3 consecutive wins After meeting the above conditions, there will be a challenge for the current bonus match of the doubles champion, after which the winner will win the doubles title
