Main idea and text structure worksheet 5

FrontPage text structure PPT text structure - 20Structure - Ms. Schermerhorn class - sample text structure paragraph structure 20text%20structure%20paragraphs.docx outline 20text%20structure%20paragraphs.docx 20text%20structure%20paragraphs.docx text structure file:///H:/SCOPE-090114-CoreSkillReference-TextStructures.pdf description or list - includes details to help you image or contact a person, a place, one thing, or an idea of cause and effect - explains why something happened (cause) and what happened as a result (effect). Problem and solution - presents a problem and explains how to solve it. Comparison and contrast - similarities and/or differences between the two, such as an event pair, offers time periods, ideas, or sequence locations of events - describe events in the order in which they happened. In this way, it is also called the time order. - QUIA - Text Structure NonFiction Text Text Structure refers to how information is organized on a crossing. The structure of a text can be changed several times in one effect and even within a paragraph. Cause and effect: The results of something are explained. Example: The Dodo bird used to roam large flocks across America. Ironically, the two were not frightened by the gun fire. Because of this, the frontiers kill all the herds in one sitting. Unable to sustain the attacks, Dodo was hunted for extinction. More information about cause and effect of time: Information is organized in the passage of time in order of time. Example: Jack and Jill ran down the hill to get a water cell. Jack fell and broke his crown and Jill came tumbling after. Learn more about the timely order of comparison and contrast: two or more things described. Their similarities and differences are discussed. Example: Linux and Windows are both operating systems. Computers use them to run programs. Linux is completely free and open source, so users can improve or otherwise change the source code. Windows is proprietary, so it costs money to use and users are prohibited from changing the source code. Learn more about comparing and contrasting the order of importance: information is expressed as a hierarchy or in preference. Example: Here are three worst things you can do on a date. First, you can tell. That's not funny and laughs really hard to yourself. It makes you look bad, worse, you can hurt your day. A bad joke may cause your date to whip up to you, therefore ruining the engagement. But the worst thing you can do is you'd love to appear, with proper showering and cleanliness, you might make your history workless, and that's the worst thing you can do. Learn more about the order of the problem of importance and the solution: a problem is described and the answer or solution is suggested or explained. Example: Every year thousands of people die in traffic accidents involving drugs or alcohol. Life can be saved if our city adopts a free public taxi service. By providing such a service, we could have prevented our or others from endangering their drunk drivers. Learn more about the problem and the solution sequence/writing process: information is described in the organized stages or a process in the order in which it occurs. Example: It's easy to eat cereals. First, get your drugs out. Then pour your cereal into the bowl, add the milk to it and enjoy. More info about spatial/descriptive sequence writing: Information is organized in order from space (top to bottom, left to right). Example: When you enter my bedroom, there's a window ahead of you. On the right it's a cloakroom and TV and it's on the other side of my bed window. Text structure worksheet identifies text structure 1: Read passages. Identify the text structure. Writing pass-through information to the graphic organizer is appropriate. Graphic organizers are available at the top. Suggested Reading Level for This Text: Grade 6-10Text Text Structure RTFIdentifying Text Structure PDFPreview Worksheet Identification Text Structure in BrowserText Function Your Response Structure 1 | Ereading Worksheet Identifies text structure 2: Read passages and insert information from each crossing into a suitable graphic organizer. Suggested Reading Level for This Text: Grade 6-10 Identify Text Structure 2 RTFIdentifying Text Structure 2 PDFPreview Identifies Text Structure 2 in Your Web Browser Text Response Structure 2 | Ereading worksheet identifies text structure 3 - read the following passages and determine the text structure. Then put the information from the text in the appropriate graphics organizer. Remember to focus on the original idea of each paragraph. Some try to solve this problem. Otherwise chimpanzees may one day exist only in zoos. People are trying to save the rainforests and forests where chimpanzees live from being cut off. It will take many people to work together to solve this problem. Comparison & Contrast Chimpanzees and humans are In many ways. A baby chimpanzee laughs when her mother tickles it. After the fight, chimpanzees kiss and wear makeup. When a chimpanzee comforts another, it gives it a hug or a pat on the back. Of course, there are many ways that chimpanzees and humans are different. Chimpanzees are smaller and stronger than humans. An adult male chimpanzee is three or four feet tall and weighs about 100 pounds. But the chimpanzee can lift more weight than a man who is six feet tall. The cause and effect of chimpanzees live a lot in groups and like each other, but sometimes they struggle. Because they don't want to stay angry with each other after a fight, they wear makeup by handing over to another and kissing. They show that they are sorry with pats and hugs. Then the anger goes away. The chimpanzee body sequence is made for climbing and swinging in trees. First, he uses his long arms to reach for a branch. Next, with his flexible hands and feet, he grabs and hooks into the branch. Eventually it swings from that branch to another branch of the tree. Its description is fun to read about chimpanzees. All wild chimpanzees live in Africa. They live mostly in thick rainforests and in forests. There are two types, or species, of chimpanzees - common chimpanzees and his bonobo, also known as pygmies chimpanzees. Film Text structure - Text structure - Text structure - Text structures
