

I'm not robot

Continue

I happen to watch the video today on youtube and it brings me to this Gravity Defyer shoe. They claim their Gravity Defyer Shoes not only make your feet comfortable, make your walking some like Defy Gravity, but also can relieve foot pain and lower back pain. I have had low back pain for years and have been looking for easy ways to fix my pain for years because I really don't like the idea of surgery. So, could gravity defyer be my solution? Before we get to any detail, let's watch this video that I was talking about: So I did a little research and found another video that speaks deeper into this topic: what exactly are those Gravity Defyer shoes? and most importantly, are they really good? For me, can Gravity Defyer shoes really help alleviate my lower back pain? Now let's look at the video first: We can see Gravity Defyer shoes have a lot of very promising features that could be of benefit to us. Especially their Versoshock™ trampoline technology. But the question is still, do they really work? With this question in mind, I did more research online and found some more details about those nice features mentioned in the video and many good customer reviews. Gravity Defyer Shoes Features Check out the list below for all Gravity Defyer Shoes Features, pretty impressive! I did research for most features and put them in a separate post. You can click on the individual links below to learn more details. Also, check out this post on How Can Gravity Defyer Shoes Change Your Life? Customer reviews for Gravity Defyer Shoes After quite a lot of reading, it seems to be both good and bad for Gravity Defyer Shoes. Good: In most cases, Gravity Defyer Shoes help alleviate problems like Achilles tendon, arthritis, Arch Pain, heel pain, knee pain, and most importantly, back pain, which is my original purpose of writing this post because I've had back pain for years. Gravity Defyer Shoes look good. They are very comfortable, especially their FLEXNET and ballistic. Gravity Defyer Shoes have different options for both men and women. Normally I've seen a lot of brands, especially sports shoes, but focus only on men. But Gravity Defyer Shoes not only have athletic, casual, dresses and sandals for men, but also have many types of athletic and flat shoes for women like their Fiona, Siena, Danielle Azy series. Gravity Defyer Shoes have free shipping on all your orders, and a 30 day money back guarantee. Their customer service overall is good. I read that some people don't like their shoes and never have any problem sending back shoes and getting their money back. Based on this, I think I'll give it a chance. If it doesn't work for me, then just go back. Bad: In general, the quality of Gravity Defyer sneakers is better than their dress shoes. are very good shoes with good quality. But for their shoes, I saw some people complain that they do not fit the legs very well, not as comfortable as expected. I think probably the problem is that everyone's legs are different. When you get uncomfortable shoes, try to be patient working with your customer service, try to get a replacement. If you really don't like it, just go back and get your money back. Again, their dress shoes. Some people complain Gravity Defyer Shoes look really good, stylish and expensive. However, they are not so durable. However, their athletic shoes are much better. Gravity Defyer Shoes are not cheap. Most of them cost around \$70 to \$100 dollars. Some good ones cost even more. This is absolutely true, especially in the current difficult economic. But the good news is Gravity Defyer Shoes offer lots of coupons and deals. Use them would give you a 10% - 15% discount. Here are a few of them I found: \$10 Off CJGD10OFF Free Shipping on All Gravity Defyer Shoes Orders: CJSHIPPING Save 15% off your entire order on Gravity Defyer! Use coupon code CJ15 Gravity Defyer Shoes did not help on some pain relief as claimed. As well as back pain, some people say it alleviated a lot of back pain. Some people say it didn't help at all. I received some response from Gravity Defyer and some doctors as well as regarding the subject. All they say is that they can't guarantee a pair of shoes could fix a patient's back pain because all these types of pain are just so complex. Research shows their shoes help in many situations. But first, if you have any kind of foot pain or back pain, see your doctor first. Your doctor might be able to see if the pain can be alleviated by some exercise or wear and tear on your feet. If not, probably Gravity Defyer Shoes won't help either. However, I think this is a fair, reasonable answer. So, back to my original question, are Gravity Defyer Shoes any good? Is it worth trying? For me, I'd say yes. I plan to get a pair of Gravity Defyer Patrick or Sondrio and FLEXNET. See the pictures below, they look pretty good, don't they? If it doesn't help me with back pain, I'll give it back. Oh, don't forget to use those discount coupons. Thanks for visiting my blog. I'll post back my reviews as soon as I get my Gravity Defyer Shoes. Gravity Defyer Shoes, a 30 day free trial, check out the detail now to save 15% off your entire order for Gravity Defyer! Use coupon code: CJ5 Get \$10 off on your entire order at Gravity Defyer! Use coupon code: CJGD10OFF They are designed to reduce foot, back and knee pain caused by these conditions Products in this story are independently selected and featured editorially. If you make a purchase using these links we can earn a commission. As for shoes, many brands tout comfort, but few really noticeable difference, especially for those suffering from lower body resulting from health conditions such as diabetes, plantar fasciitis, and arthritis. But there is at least one style that is actually clinically proven to reduce pain - not only in the legs, but also in the knees, back and ankles. Gravity Defyer sneakers have specially engineered heels, midfoot, and foot sections with VeroShock technology that allow each area to absorb impact, stabilize tendons, and relieve pressure. These features make the usual pains that come from both active days and health conditions evaporate. If we take it a step further, the brand promises daily comfort that lasts up to eight hours of work – even those that have spent standing. Get push notifications with news, features, and more. + Follow before buying my first pair of Gravity Defying, I was in excruciating pain every day, wrote one five-star reviewer. After two weeks in these shoes, my foot pain was about half that and after about a month, my tendon healed and my heel pain was almost gone. Since then I have bought two more pairs and bought my mother a couple. I will never wear anything else, have a better quality of my life and allow me to renew my active lifestyle... You can't put a price on it. Along with being incredibly comfortable and pain-relieving shoes, it's also stylish. You can choose from several bright colors, such as peach and purple, or stick to the classic white and gray options. Another plus: Shoes come in both regular and wide sizes, so for those whose feet might be prone to swelling, extra width can really be a saving grace. Customers looking for shoes that can support their medical needs, work needs, or fashion needs can get all of the above by clicking on the links below. Buy! Gravity Defyer G-Defying Mighty Walk, \$155; amazon.com Top Positive ReviewAll positive reviews > Randy Kreifel5.0 out of 5 starsWorth 5 times the price per day without pain! February 8, 2019 In the United States it is amazing how you don't notice when you don't have pain! Nothing hurts. I'm a nurse and on my feet for 15 hours on shift. My legs, my legs, my back, nothing hurts! Top positive reviewAll positive reviews > I. Riley5.0 out of 5 starsMy foot pain is 98% off, I LOVE LOVE LOVE THESE SHOES! And I think they look nice, too. Bonus! September 23, 2018 In the United States, I need to talk about these shoes. My story: I have Achilles tendinitis and bone spurs sticking out on the back of my heel. I was resting, recording, trying to stretch and eventually just decided to have painful surgery to fix it. After another surgeon I was told to physical therapy therapy first and was also told I don't need that baby and just go ahead and walk. I tried to walk around with a few pairs of good shoes and limped by the time I got home. Out of adage I ordered these shoes and MIRACLE!!! I actually put them around, tied them up, and by some absolute miracle, my left heel doesn't hurt. I don't know why, but it's not. I cut out notches from other shoes because it hurt so badly. I actually got in 10,000 steps the first day I wore these shoes. I will say that my hips felt flashes of discomfort, but that they were expected to cope themselves. I don't care. If I can walk and don't have legs hurting and screaming with pain I freakin happy! I am so grateful to this shoe company for creating shoes that will literally change my life by allowing me to get out and get the workouts I so desperately need. In terms of size. I am a normal size 11 and even with my arch supports in them they don't pinch my legs or injure my legs. So I'd say they're true to size. If you suffer from leg pain I highly recommend these shoes. They're worth every penny. Don't let the elegant Mighty Walk design fool you. This lightweight, see-throughneaker provides a secure grip with a soft inner lining and a low profile design that packs the same pain reliever VersoShock® technology that you've come to love. Everything about this shoe makes us confident when we say painless walking shoes? That's an understatement. Plantar fasciitis | arthritis friendly | diabetic friendly | 8 hours comfort featuressVersoShock® patented technology is clinically proven to relieve pain in the ankles, knees, legs and back by up to 92%*. Roomy Toe Box extra space for comfort and better circulation. Front Rocker Sole with a supported midfoot to prevent and relieve plantar fasciitisRemovable Insoles to accommodate custom orthotic supportDurable Breatable Mesh provides proper ventilation & flexibility. MEDICARE/HCPCS code=A5500 may be eligible for Medicare reimbursementFree podiatrist-grade orthodoxy with each purchase - \$50 value * According to a 2017 double-blind study by Olive View UCLA Medical Center. Weight 10oz When you first try this shoe. You're going to feel better 100% my left leg is a little wider than EE and here are the widest I've found. I usually walk on the edge of my leg bed, which has caused a very painful calus the last couple of years. These shoes help my supination and keeps me walking more on top of the shoe bed and not on the side of it. I love them. They tried all the big companies and discovered them last month. I have CMT1A, shoes help. The only thing is the price is very high. I LOVE THIS SHOE!!!! I find it hard to find comfortable shoes as usual it's narrowed down or firmly in the body. Not this one! I walk my heels and I'm pretty flat footed. Usually after an hour (usually less) legs and my lower Hurt. I work 12 of her shifts on my feet and now have 0... (ZERO) pain at the end of the day! Not to mention that I received a few compliments on them!!! I'll buy again! Now I'm buying a couple for my father! Buy these, will not regret it! I'd like to try them, but I usually wear wide. These only come in M. How do you think they're running? Wider or faithful size? Thank you I will buy more shoes in the future. I had knee surgery, and your shoes helped me. I can walk for a long time without pain in my knee. Thank you for creating a great product. This shoe is the first age that didn't aggravate my tailor's blister (side/outside my foot) because the shoe has a good width (xW) and no seams rub. It's also easy on my metatarsal arthritis. I would definitely buy another Gravity Defyer if:<br&t:1. It comes in XW.<br&t:2. It's all black and no seams rub medial or side blisters on the bottom of the nose.<br&t:<br&t:I'm interested in some of the more stylish shoes offered but not available in XW. It would be great if the company offered dressier shoes in XW. I have a problem with my back and hip due to a horse accident. I just got them and they're the best shoes I've ever owned. My Chiropractor was impressed with the shoes and wants information. I'm ordering hiking boots as I work a lot with horses. I need a shoe that's waterproof. They are expensive ... but its investing in your physical health and helping your quality of life. My pain slows me down... but with quality shoes will be very useful. I have the worst legs in the world. I have so many conditions with my feet. I tried almost every shoe known to mankind and none of them worked. I even had my own shoes with my own brace and my feet were still killing me. I saw these shoes in the magazine and they advertised, were painless shoes, worked with plantar fasciitis, Diabetes, Etc. I was skeptical, but I thought lets try one more shoe, maybe that really will work. To my surprise, these shoes are amazing. I had four months and couldn't be happier. Now I can walk and my legs don't ache. I just ordered another pair. That's going to be my only shoe brand out there. They were really life changing. I'm a size 6 and that fits beautifully. I have Morton's neuroma in my right leg, and I ordered six wide ones. Usually I'm 6 wide. I think if I didn't have Morton's Neurom 6 wide it would work, but for future orders I'll order a 6XW. Thank you Gravity Defyer!!!! He had an episode of a slight drop in his leg due to a compression of the disc on the nerves down his leg. My foot slapped on the ground rather than the normal heel-toe placement. I bought these shoes and found they were very useful in foot placement and the slight movement of rolling allowed the foot to set up properly rather than slap. I'm fine, but now with fasciitis flare I buy another pair (or two) in a different color. Very good support for my feet. I was resistant to orthopedic shoes despite ongoing foot problems. I started reading reviews on shoes that relieved plantar fasciitis pain, and found these. Combined with a recommendation from my husband's colleague, the description (and 30 day trial period) was enough to give me a chance. Well, I'm in love. While the shoes are a bit clunky in appearance because of the stability of the single, I decided I couldn't let that bother me. Why? Because I had almost 90 percent pain relief immediately. While it will take a while for my fascia to build strength again, so 100 percent relief is unlikely now that great improvements cannot be ignored. I also bought a pair of dress shoes and will be getting another pair of athletic shoes from you soon. Thanks! I really enjoyed wearing these shoes. At first I was skeptical never in my life did I ever pair over 50.00 for a pair of shoes. I recently dealt with rheumatoid arthritis and had several nodules on the legs and legs of the joints, and when ignited it is painful. I must say that these shoes are true there's a word about convenience. One will not be disappointed in these types of shoes. I'll be trying to buy another couple there in the near future. Thank you for losing such a comfortable shoe. This is the first time I've bought these shoes. I'm very happy to be able to walk without pain in my lower leg. I'm able to walk down without any problems. I am able to put my corsets in my shoes and have extra comfot. I'd buy more shoes in a heartbeat. Thank you for such amazing shoes. I love these shoes. I was hoping it would take me more than 3 months, but they are stretched out on my hips due to the way I walk. Overall, I'll have them again. Just because they help immensely with my pain. These shoes are great for plantation fasciitis. I'm standing on concrete 10 hours a day. I love these shoes. The shock absorbers at the bottom are amazing. I recommend these for anyone with foot problems. Ive had shots, medications, solos, etc..... These shoes help so much. I have suffered with foot problems for the past two years since surgery I had many years ago to repair a blister on my right leg. My leg didn't get it right, and here I am 30 years later with the following problems - neuromas, hammer toe and plantar fasciitis in both legs. Although the treatment I had, helped pf, I got a lot of pain from other problems and were looking high and low for a pair of shoes that support even more comfortable, have good arch support and a single one that absorbs shock gait. These shoes are it! They made such a difference in my daily life. I've barely taken them off since I got them. they are well worth the money and I would recommend these and will buy them again. 5+++ stars! Thanks! I love to walk, but the pain was just too great in my back and legs. I tried many brands of shoes without relief. When I put my foot in this shoe for the first time it was a game changer. Now I can walk as far as I want without pain!!!! Thank you Gravity Defyer!!!!!! Definitely worth buying. Very comfortable. My feet feel great after being in them all day. I wear gym shoes for my workout. Chase pets around the house. I struggled with tight calves and Achilles for as long as I can remember. I have limited range of motion in my ankles, so my muscles and tendons are as tauter as average - even as an athletic person. After long walks, massaging off my calves used to be incredibly painful. With these shoes, though, I get the lift and support I need, and I no longer feel the pain! I can work on a stand-up table in these shoes without cramps, and my walks are enjoyable. 10 out of 10 would recommend it to anyone who has problems like mine. The shoes come with 3 sets of solos to mix and match for the most comfortable customized fit I've ever had. Toe box is spacious without looking bulky, width and size are perfect. Lots of compliments on color and style. 10x better than NB for heavy to fit your feet! Worth every penny! Like many others, I've had plantar fasciitis for years. But in the past year I've developed other foot problems. I tend to underpronate & have developed stress fractures (trying to keep the pressure off my arches). Alegria has always been my go-to shoe, but for walking/exercising, I needed something with more support. I bought a pair of Hoka one shoes before a trip to New York last year but was in tears the other day walking around town. I tried a few pairs from Mephisto, Taos, Vionic, Orthoheel, etc., but even though they had good arch support, the rest of the single was always heavy as a rock. That's fantastic! I love that they include the additional sole for different arch heights & the spacer as well. It's so cool to feel springy-ness in your heels. I can actually walk pretty well with out a ton of pain. You were well worth the money! Very happy customer! I have bad legs, my friend had a pair of these shoes and she said she loved them. I went online and bought a couple for myself. <br&t; They're amazing. I highly recommend these shoes! I have plantar fasciitis, these shoes were a godsend for work! I've been on my feet all day. When I saw these shoes on another teacher, I was fascinated. She said it was the first shoes she could wear that didn't hurt her legs. To be honest, the price was the only thing that gave me pause. However, I decided to take the plunge and ... I'm excited to say my plantar fasciitis didn't do PEEP while wearing these shoes! These shoes look and feel fantastic. I'm saving up for another couple! Thanks! Much!
