Similar triangle word problems

Problem 1: The lengths of the three sides of the ABC triangle are 6 cm, 4 cm and 9 cm. Triangle PQR bc ads are congruent. One of the lengths of the sides of the PQR triangle is 35 cm. What is the largest possible perimeter for PQR? Solution triangle: Based on the information given, we will draw an approximate diagram. Δ PQR - Δ ABC PQ/AB - QR/BC - PR/AC - Δ PQR/ Δ BC Let QR = 35. The corresponding sides must be QR and BC. Δ PERIMETER PQR / Δ ABC perimeter is QR/BC - 35/4 PQR Triangle Perimeter (35/4) - 19 - 665/4 - 166.25 So, PQR triangle perimeter is 166.25 cm². Problem 2: Once the figure below, the sides DE and BC are parallel and (AD/B) - 3/5, calculate the value of (i) triangle area ADE/area triangle ABC(ii) BCDE trapeze area/ABC Solution triangle area: In ABC Triangle, the sides DE and BC are parallel ADE Δ Zone / ABC Δ Zone - AD2/AB2 - (3k)²(8k)² - 9/64 (ii) ADE Δ area - 9 k ADE Δ area - 9 k BCDE Trapeze Zone / ABC area - Δ ADE area - 64 k BCDE/ABC Δ Area - 55 k/64 k - 55/64 Problem 3: The government plans to develop a new industrial area in an unused portion of land in a city. The shaded part of the map shown below indicates the area of the new industrial zone. Find the area of the new industrial zone. Solution: Considering the AD and BC lines, the angles \angle AEB - \angle EDC (vertically opposite angles) \angle EAB - \angle EDC (alternative angles). Using the AA Δ EAB - Δ EDC (AB/DC) - (EF/EG) EF - (AB)/DC x EG - (3/1) x 1.1 4 - 4.2 km Area of the new industrial zone - Δ AGRIE area - AB - AB - EF - (1/2) - 3 - 4.2 - 6.3 km² So, the area of the new industrial zone is 6.3 km². By Allen Ma, Amber Kuang When two triangles are similar, it means that their sides are proportional. The following word problems require you to use the properties of similar triangles and a little algebra to find solutions. Similar triangles are only different in size. The corresponding angles always have the same measurement. Practice Questions The lengths of the sides of a triangle are 16, 23 and 31. If the perimeter of a similar triangle is 280, find the length of the longest side of that triangle. In RST triangle, W is a point on Y is a point on so that if WS' 5', RW' 7', 'YS' x, and TY' x' 3, solve for x. Answers and explanations 124 If two triangles are similar, their sides are proportional. Suppose you call the original A triangle and the new B triangle. The proportion would be as follows: 3 A line that crosses both sides of a triangle and is parallel to the third side of the triangle creates two similar triangles. If two triangles are similar, their sides are proportional, and the on their sides are also in proportion: Triangles similar word problems - Display top 8 worksheets found for this concept. Some of the worksheets for this concept are Answering each question and rounding your answer to the nearest, Solving proportion word problems involving similar numbers, Solving similar triangle word problems, Unit 1 grade 10 applied triangles, similar triangle applications, date period similar triangles, Mfm2p unit 1 similar triangles, similar triangles.
