Banerji protocol book download

Banner protocols are a new method of treatment using homeopathic drugs. Specific medicines are designed for specific diseases. Diseases are diagnosed using modern/modern methods. This is because modern diagnostic approaches include and help the selection of medicines so that certain drugs can be easily prescribed for specific diseases. This is not practiced in classical homeopathy. A specific homeopathic drug concept of the disease, based on symptoms, was first perceived and practiced by the Late Dr. Pareshnath Banerji. With the passage of time and the availability of new diagnostic tools such as ultrasonography, MRI, cancer markers and other advanced tests, we were able to more accurately streamline treatment protocols. The effectiveness of this rationalisation is reflected in the encouraging results of the Banners protocols. Banners in processing protocols use mixtures of countermeasures or frequent repetitions of remedies when necessary. This is not practiced in classical homeopathy. The combination of the two potent drugs we use is carried out in a meaningful way based on years of our clinical experiments and observations. They are mixed special benefits of treatment, so the exacerbation of the drug can be tested, the drug side effects can be emblated, fast and monotony recovery can be ensured in a much shorter time. Disease + symptomatology -- Specic medical choice -- Specificska/ Relief Special homeopathic medicines are also used for supportive care. Homeopathic drugs prescribed during constitutional time can play a useful role in supportive and palliative patients with malignant disease. Banners Protocols: Banners treatment protocols are scientific, logical and are based on all modern diagnostic tools and are very realistic. From reader reviews: Do you have free time to get a day?
