Google Scholar Page 2 This article is in the 93rd percentile (ranked 18,078th) of the 265,666 tracked articles of a similar age in all journals and the 50th percentile (ranked 1st) of the 2 tracked articles of a similar age in Policy Sciences Show more about Altmetric Altmetric calculates a score based on the online attention an article receives. Each colored thread in the circle represents a different type of attention online. The number in the middle is the Altmetric score. Social media and mainstream news media are the main sources that calculate the score. Reference managers like Mendeley are also tracked but don't contribute to the score. Older articles often score higher because they have had more time to get noticed. To take this into account, Altmetric has included context data for other articles of similar age. Age.
