Convert yards to miles formula

Reverse conversion? Miles to Yards (or simply enter a value in the field) Share if you found this tool useful: Tweet Unit Descriptions1 Yard (International)Imperial/US length of 3 feet or 36 inches. In 1959 defined in terms of metric units as exactly 0.9144 meters. 1 international yard is exactly 0.9144 meters (SI basic unit of length). 1 yd = 0.9144 m.1 Mile:1 Mile is exactly 1.609344 kilometers by international agreement in 1959. In SI units it is exactly 1609,344 meters. The length is originally based on the distance marched in 1000 steps of two steps each. 1mi = 1.609344 km = 80 chains = 5280 ft = 1760 yd. Conversions Table1 Yards to Miles = 0.000670 Yards to Miles = 0.03982 Yards to Miles = 0.001180 Yards to Miles = 0.04553 Yards to Miles = 0.001790 Yards to Miles = 0.05114 Yards to Miles = 0.0023100 Yards to Miles = 0.05685 Yards to Miles = 0.0028200 Yards to Miles = 0.11366 Yards to Miles = 0.0034300 Yards to Miles = 0.17057 Yards to Miles = 0.004400 Yards to Miles = 0.22738 Yards to Miles = 0.0045500 Yards to Miles = 0.28419 Yards to Miles = 0.0051600 Yards to Miles = 0.340910 Yards to Miles = 0.0057800 Yards to Miles = 0.454520 Yards to Miles = 0.0114900 Yards to Miles = 0.511430 Yards to Miles = 0.0171,000 Yards to Miles = 0.568240 Yards to Miles = 0.022710,000 Yards to Miles = 5.681850 Yards to Miles = 0.0284100,000 Yards to Miles = 56.818260 Yards to Miles = 0.03411,000,000 Yards to Miles = 568.1818 Similar Length UnitsYards to MetersYards to PacesYards to Steps Common UnitsYards to KilometersYards to MetersYards to Feet in order to continue enjoying our site , we ask you to confirm your identity as a human being. Thank you very much for your cooperation. x Enter your value in the conversion calculator below. TIP: If the result of your conversion is 0, try to increase the Decimals. Convert yards to miles: Enter a value in the yards field and click the Calculate Miles button. Your answer will appear in the Miles field. Enter the length in meters below to convert the value into miles. Results in Miles: 1 yd = 0.000568 mi To convert a yard measurement into a mile measurement, divide the length by the conversion rate. A mile equals 1,760 meters, so use this simple formula to convert: miles = yards ÷ 1,760 The length in miles is equal to the yards divided by 1,760. For example, here's how to convert 5,000 meters to miles using the formula above. 5,000 yd = (5,000 ÷ 1,760) = 2.840909 mi Yards and miles are both units used to measure length. Keep reading to learn more about each unit of measurement. The yard is a unit of length measurement equal to 3 meters or 36 inches. The international yard is legally defined to be equal to exactly 0.9144 meters. [1] The yard is an American and imperial unity of length. Yards can be abbreviated as yd; for example, 1 yard can be written as 1 yd. Miles The mile is a linear linear equal to exactly 1,609.344 metres. A mile is also equivalent to 5,280 feet or 1,760 feet. The mile is an American customary and imperial unit of length. Miles can be abbreviated as mi, and are sometimes abbreviated as m. For example, 1 mile can be written as 1 mi or 1 m. We recommend using a ruler or tape measure to measure the length found at a local store or home center. Rulers are available in imperial, metric or combination with both values, so make sure you get the right type for your needs. Do you need a ruler? Try our free downloadable and printable rulers, which include both imperial and metric measurements. This site is owned and maintained by Wight Hat Ltd. ©2003-2020. A1=10575000 Number is total yardsA2 =100 Miles 250 Yards What I would like to see Currently divide A1:10575000 by 1760/60 shows A2: if 100.142 a decimal figureThoughts? Re: convert yards to miles and yardsHello, For your cell A2 formula, you could test : =INT(A1/1760/60)&amp; Miles &amp;TEXT(A1/1760/60/60)-INT(A1/1760/60)\*1760.00)&amp; Yards Hope this will help If you want to say Thank you for the help you received, don't hesitate to check on the Like... just below ... in the lower right corner... Re: convert yards to miles and yardsHi Carim! tried your suggestion, but I get an answer of 1 Mile 1178 YardsThe right answer should be 1 Mile 250 yards (249 actually, but I did this round with extra 00)Any ThoughtsThank you Re: convert yards to miles and yardsHello, Not sure to understand ... With A1=10575000 ... You Must Get In Cell A2: 100 Miles 250 Yards... Is that right or not? If you feel like saying Thank you for the help received, don't hesitate to click on the Like icon... just below ... in the lower right corner... Re: convert yards to miles and yards, I made a mistake here. The number 10575000 is in the sixtiesThe song in A1 should read 176250 YardsI changed the formula to read as folows and it works greatThank you again. =INT(A1/1760)&amp; Miles &amp;TEXT(((A1/1760)-INT(A1/1760)\*1760.00)&amp; Yards Re: yards to miles and for aesthetic reasons, how would I put this into a multiple if staement or casei.e.if the miles are &lt;1 then= mileIf= the= miles= are=&gt;1 then Milesand if the yards are &lt;1 then= yardIf= the= yards= are=&gt;then&lt;1&gt; &lt;/1&gt; &lt;/1&gt; &lt;/1&gt; thank you Re: convert yards to miles and yardsHello again,Have a try with following formula : =INT(A1/1760)&amp;IF(INT(A1/1760)&lt;=1,1,mile , Miles )&amp;TEXT((A1/1760)-INT(A11/1760)\*1760,##)&amp;IF((A1/1760)-INT(A1/1760)\*1760&lt;=1, yard, Yards) If you feel like saying Thank you for the help received, don't hesitate to click on the Like icon... just below ... in the lower right corner... Re: recruit to convert to miles and yardsNice a Carim, works perfectThankyou Re: convert yards into miles and recruit Nice a Carim, works perfectThankyou Glad you could solve your problem ...wink:Thanks ... for your thanks ...smile: If you feel like saying Thank you for the help received, please do not hesitate to click on the Like icon ... just below ... in the lower right corner... Specify the values below to convert yard [yd] into miles [mi, mi(Int)], or vice versa. YardDefinition: A yard (symbol: yd) is a unit of length in both the imperial and American usual measurement systems. Since 1959, a yard has been defined as exactly 0.9144 meters. It is also equal to 3 meters, or 36 inches. History/origin: The origin of the yard as a unit is unclear. It is an English unit (predecessor of imperial units) and the term was derived from gerd in Old English, the earliest historical form of the English language. Some suggest that the garden might have been derived based on the circumference of a person's waist. Current use: The yard is often used in field-length measurement for certain sports such as American and Canadian football, and association football (soccer). The yard is also used in cricket pitch dimensions, and sometimes in golf fairway measurements. In the United Kingdom (UK) and the United States, the yard is often used when referring to distance. In the United Kingdom, it is also a legal requirement that road signs indicating shorter distances in yards.MileDefinition: A mile (symbol: mi or m) is a unit of length in the imperial and American usual measurement systems. It is currently defined as 5,280 feet, 1,760 feet, or exactly 1,609,344 feet. History/origin: Mile is an English unit (predecessor of Imperial units and United States Usual Units) of length. The use of the abbreviation m for miles was common before the widespread adoption of the metric system; after the approval of the metric system, mi became the appropriate abbreviation to avoid confusion between miles and meters. The definition of a mile as 5,280 feet (or 8 furlongs), sometimes referred to as the statute mile, international mile, or land mile, which differs from the Roman mile of 5,000 feet, developed due to the importance of the furlong in England, back in 1593. There are also a number of units based on, closely related to, the Roman miles, including the nautical miles (1,852 km exactly), Italian miles (~1,852 km), and the Chinese mile (500m exactly). Current use: Although most have adopted the metric system and use miles, rather than miles, to express land distance, the mile is still predominantly used in countries such as the United States (US), the United Kingdom (UK), Myanmar and Liberia, as well as some other countries that are US or British territories, or have historical ties to both countries. Yard [yd]Mile [mi, Mi(Int)]0 01 yd5.6818181818182E-6 mi, mi(Int)0.1 yd5.68182E-5 mi, mi(Int)1 yd0.0005681818 mi, mi(Int)2 yd0.001363636 mi, mi(Int)3 yd0.00170454555 mi, mi(Int)5 yd0.0028409091 mi, mi(Int)10 yd0.0056818182 mi, mi(Int)20 yd0.0113636364 mi, mi(Int)50 yd0.0284090909 mi, mi(mi(Int)50 yd0.02840909090909 mi, mi((Int)50 yd0.028409090909 ni, mi(mi(Int)Int)100 yd0.0568181818181818 mi , mi(Int)1000 yd0.5681818182 mi, mi(Int)1 yd = 0.0005681818 mi, mi(Int)1 mi, mi(Int) = 1760 ydFor example: convert 15 yd into mi, mi(Int):15 yd = 15 × 0.0005681818 mi, mi(Int) = 0.0085227273 mi, mi(Int) mi(Int)
