En tanto y en cuanto la dirección de escena es... Students practice solving multi-level equations by completing a math maze! They draw arrows to show the way from the beginning of the maze to the exit. This download contains three mazes that teachers can use to differentiate their education. Both level 1 maze problems can be completed in two steps. No answer would be negative. This maze is designed for students struggling to get this concept. The Level 2 maze problem causes students to work with variables on both sides of the equation. You may also need to combine or utilize distribution properties, such as terminology. Some answers may be negative. This maze is designed for regular students. Level 3 maze questions also have students solving variables and equations on both sides. They also need to take advantage of the distributive property and combine it with terms such as. However, these issues are more difficult than maze 2 level questions. In addition, students can get an answer that there is no solution or that it is all real numbers. This maze is designed as a enrichment activity for stronger students.
