David wilkerson vision 1973 pdf

David Wilkerson - Prophecies of 1973, held today Click link to see David Wilkerson: March 7 2009 - New warnings for the near future David Wilkerson is the revered pastor and best-selling author of The Cross and Switchblade, a book about his ministry, The Teen Challenge, for troubled New York street children who were later made into a film in it by Pat Boone. In 1973, David Wilkerson wrote the prophetic book Vision. The first chapter of the book reads like today's headlines. The book is untrue, and here's the first chapter below. Then read his new prophecies, which were recently published on his moors page, David Wilkerson Today. Here, he predicts an imminent earthly scattering disaster in downtown New York that will spread to major urban areas across the country and around the world - part of what he sees as judgment from God. Chapter 1 Visions – Economic confusion A Crash is coming-1 There is a global economic confusion right in front of us. In my vision, that's the clearest thing I've ever seen. Many pray people share this vision. Not only is the US dollar destined for deep trouble, but also all other global currencies. First, I see the complete economic chaos that has affected Europe and then affected Japan, the United States, Canada and all other nations soon after. It's not really a depression I see, but a recession of this size that will affect the lifestyle of almost every earner in America and around the world. Countries that now control huge amounts of Western currency will also be in big trouble. Arab countries will be particularly affected. There are no doubt that we have a bleak year ahead, full of monetary confusion and despair. How quickly it's not clear, but it's not far away. The world's biggest economists will explain the confusion at a loss and an international crisis of fear will develop. The fake economic crisis will be before the recession - but it will be in the short term. A few good years to prepare –2 Despite all the signs of danger that surround us before the future economic catastrophe, the next few years (since 1973) will be among the most successful in the history of mankind. Fat and flowering years. Despite tight monetary policies, people will continue to spend freely. Sales will continue to hit records, and people will spend more than ever in modern history. Credit debt will become almost uncontrolled. I see, very clearly, just a few years of great wealth and continued economic prosperity. There will be increased church budgets, wages will increase- there will be an increase in missionary administration. Inflation, costs and wages will spiral higher and higher. There will be some minor adjustments in prices, but the global economy will get hot. When I received this vision in April 1973, I also received clear instructions from the Holy Spirit to believe God for sufficient finance to all debts of our organization, except the necessary mortgages. The message I received from God was very clear and up to this point. This was simply this: there is a great economic mess coming, and they are only a few years ahead of us. There will be some short, thick and flowering years to prepare for the deso the year. Work and pray that all debts are cleared and prepare for drastic budget cuts. Money won't be flowing as it has been in the past, and if you're debt-free, you'll be able to keep your programs even in difficult years. Don't pash – and don't be sure – just get ready for it and expect it! Bankruptcies of major corporations – 3 I believe that we will witness the bankruptcy of some of the major and most popular corporations of this nation. I see a lot of problems with credit corporations. Many people will not be able to repay their heavy obligations to large credit card companies, causing almost chaos. Thousands of small businesses will also be forced into bankruptcy. Three, perhaps four, of the larger religious denony-up will be forced to operate with the organization of the skeleton due to a lack of resources. More churches will have to retreat. All but a few ministries of radio and television will have to be abandoned. Tight money will trigger a wave of uncertainty and fear. Those with the money will keep it in reserve. The U.S. government will overreact to confusing economic development. I see that various government agencies are making a quick decision, which they are almost panicking about, but this is going to make the effort to make the economy disgusting. President [Bush?] The United States will have one and, perhaps two, national radio and TV gigs to inguting the nation, that everything is fine and that the best economic times are ahead. It's not going to work. People won't make these statements, and their fears will lead to a revolution in the [Obama] polls. The car industry is going to be badly damaged. Recreational vehicle carriers will be hit very hard. Supplies of appliances will pile up and sales will fall drastically. Almost every economic indicator will be gloomy. It will be dotted at first, but it will eventually affect almost the entire industry. Rush into the country - 4 There will be a sudden rush to buy farms, ranches, and homes in the country. Thousands will try to flee the cities, hoping that returning to the country and nature will ensure security. We will increasingly have to get away from everything - and a lot of money will be invested in land and acres in rural areas. The price of open rural land will continue to multiply. 100 miles from most major cities, he's going to be a nuisance to everyone but the unions. Unions face a dilemma of -5 will face new pressures not to go on strike. Workers will no longer be able to afford to be out of work for a week. The government will take a hard line against strikers, and striking union members will no longer be able to get food stamps and other benefits once they are allowed. Inflation will force a new labour-management crisis, and strikes by union members in some areas will lead to a complete shutdown of plants and total job losses. Labour leaders will be caught up in this wave of economic confusion. Many will lose what to accept. They will face an almost impossible situation because they will not be able to afford strikes - but at the same time they will not be able to afford a strike. Long strikes could paralyze the industry and add to growing economic confusion. The details are not clear to me - but I see terrible problems with the unions ahead of us. Working peace is just a dream, and there is nothing but real trouble ahead. We may soon experience the most devastating strikes of all time. Those who do not prepare will be injured - 6 People who survive and buy unnecessary material things will suffer the most. Speculators are facing difficult times ahead, and a good number of big developers will be completely wiped out. The biggest construction boom is still in the future - and the Bible predicts it will come. But before that - soon - the construction industry will face a number of backs. Housing start-ups will shut down. There's a terrible squeeze for the entire construction industry. Ministers who build expensive buildings in the name of God - without a clear mandate - will be seriously affected. Those who drive on ego journeys to engage in huge projects involving large sums of money, and who have not moved into the full will of God, will face financial catastrophe. If a man has a clear mandate from

God to build or move on - let him continue. But let it be completely positive that it moves with a clear and positive direction from God. Otherwise, the project won't survive, and it's going to go bankrupt. This is no time for debt. It is time to prepare ourselves, time to clear ourselves and get out under heavy financial burdens. When I first received this vision, I argued with myself that I dare not obstruct the initiative and vision of people who want to do great things for God and who, in the process of doing them, have to invest large sums of money. I know the pleasure of building institutions into the glory of God. I have always preached faith and affirmed action, and I would never dare advise a man or a woman of God to withdraw or procrastinate when God has clearly given direction to move forward. But this vision is so clear to me that I have to speak. I feel a kind of divine obligation to warn ministerial and church organizations to take a long and solid view of the whole expansion. projects that require large sums of money. There are some construction programmes that need to be stalling or abandoned. The time has come for Christian organizations to become more insuante people than building consciousness. Most of the growth in the years ahead should be in the areas of people-to-people ministries. No doubt many religious organisations will spend years paying only interest on their huge loans. This will result in a ovation to raise money only to meet maintenance budgets, which will cause the suffering of missionary projects. Not even Gold Will Provide Security -7 Gold prices are diversting, but those who turn to this raw material, hoping to find safety, are in for a tragic surprise. The price of gold will rise astronomically, but it will not be maintained over time. Silver will also become a very valuable metal, and the price will go wild. But neither silver nor gold will offer real safety. The fluctuating and uncertain value of gold and silver will be part of the overall picture of economic confusion that engulfs the world. Believe it or not - even gold won't hold its value. The gold will be damaged - severe. This is one of the most important predictions in this book. The new global monetary system -8 Will develop a call to examine all the world's monetary systems into one unified system. And while it will appear that the dollar will gain strength just before the coming major recession, a new crisis will develop that will shake the entire financial world. It will be years before the faith in the US dollar is restored. I believe that the revived Roman Empire will eventually become a power base for a super world leader who will draw to restore economic order. No doubt he will embody the global credit card walking system. Invisible numbers will be implanted on the forehead and forearm, and only photocopsc scanners will be able to detect numbers. The numbers will be allocated in three six digits of the pile. Everyone would have requested this brand, and no one could buy or sell without that invisible tattooed number. A kind of system of global credit will be developed and nations will be able to exploit credit blocks. Although it may be far from a universal monetary system in the future, a global inter-nation credit system will soon be developed, setting the framework for a future global monetary and trade system. Be prepared to hear about global trade agreements by the police of the International Board of Directors. Strict guidelines for international trade will be developed and the global market will be closely monitored by the interests of major powers. To be clear- soon we will see the development of a global trade policy overseen by the super secretary, which is invested by all nations involved in international trade with unbeaught powers. Suicide with - 9 Economic disadvantages and confusion will catch many unprepared for the consequences. Suicide will follow. There will be no repeat of the scenes that were so famous during the Great Depression, when businessmen committed suicide by jumping out of windows. They're also not going to put guns on their heads and pull the triggers. The new method will be suicide by overdose from sleeping pills and other chemical sedatives. This trend is already evolving and will deteriorate. Some well-known people in the business world are going to commit suicide by overdosing on narcotics. With so many wealthy businessmen having private doctors, the general public will not be informed of the manner of these random deaths. In many cases, the cause of death will not be widely known, but suicide by overdose will become so prevalent that hiding will become impossible . A backlash Against Environmentalists and Ecologists -10 The economic confusion that comes will lead to a tightening against the strictures imposed by environmentalists on the business community. Environmentalists were well received and admired when dealing with general issues. But when they start influencing the pocket books of the men and women of this nation, they will come in bad will. I see there's a lot of backing coming against ecologists and environmentalists, and experts have spoken out against the many findings of those in these agencies. In talk shows, newspaper articles and other public debates, there will be incisie against those who warn of the dangers of pollution and those who advocate environmental control. It will become popular to disclose the findings of these committees and speak out against programs proposed by federal, state and local environmentalists. Environmental groups such as the Sierra Club and others will face heavy criticism. They will be accused of obstructing the development of funds and will be blamed for the growing economic confusion. These groups will become lambs for the energy crisis, meat and food shortages and job losses. Believe it or not, environmentalists and ecologists will be challenged, taken away and overwhelmingly rejected in the days to come. Powerful forces are already in the job of ing up public opinion against the binoculars of new environmentalists. Confusion for Positive Opinion Preachers -11 Those who preach that all success is the ultimate result of positive thinking will discover that there is another side of the coin. Great losses, confusion and inverting will shatter the processes of thinking of many well-off people who falsely believe that their success and economic benevolence are the result of their own positive thinking. Jesus Christ himself was a defense of true thought. God says he didn't give us spirit of fear, but love, power and a healthy mind. But many good men have become worshippers of the power of the mind. Those who preach positive thinking according to the nots of scripture teaching will be able to offer men truths that will sustain them through the coming crisis. Those who have minimized the sovereignty of God and who have replaced mental relations for reformed hearts will be exposed as false teachers. A positive opinion, without god's life, offers no hope in times of worls and personal crisis. Anyone can defend the power of positive thinking when economic conditions are favourable and all things happen well. But when things start to fall apart and everything goes the other way - and when only supernatural intervention can help - then the real truth will come to the surface. The truth is that all the positive thoughts in the world will not change the fact that we are going to have a Great Recession. No preacher, no philosopher, no author will be able to change the direction god has taken. Several Riots and demonstrations -12 Riots and demonstrations, thefts and riots of the Sixties are now history. But the riots aren't over. There's another wave coming. This time, I see Puerto Ricans, Cubans and Meixicans who are deeply attached. The coming economic chaos will instil another round of demonstrations, riots and civil riots. Social assistance programmes will be reduced and reduced and minority groups will be most affected. These reductions, together with the abolition of many government projects, will lead to high unemployment among these groups. I never believed that we saw an end to the violence and bloodshed and unrest on our streets. I hate myself and pray that God will spare us. But more than ever, I'm sure the worst isn't coming. I also see major unrest coming to many major cities in South America. Over the next decade, South America will become a poder barrel that will explode in all directions. The United States is to blame - 13 Although economic measures in Europe will trigger a future recession, most nations will be blamed by most nations for what happened. France will become one of the most evil anti-American nations in the world. Politicians and businessmen in Europe and Japan will blame Washington and American bankers. The drastic withdrawals of troops from Europe will cause even more confusion. On the basis of this anti-American sentiment, the leaders of the Common European Market will establish a stronger base of strength and grip on world trade. The global economic power base will shift to Europe. Recovery from recession - 14 [Remember that this was written in 1973] There may be a full recovery from the coming recession, and there may still be another cycle or two fat and a bleak year. Only God knows the future himself - all I got was a blurry look Decade. I seem to see a picture of a partial and almost complete recovery from the coming recession - but the global economy will continue in the confusion of the Antich and old times. From today, there will be a sense of fear and uncertainty over the whole world about the future economic situation. Never again in the history of the world will there be a time of complete confidence and confidence in the world's economies. Every little period will carry with it a strong threat of arrest. Men's hearts will begin to collapse out of fear after observing the devastating effects of crippled economies. In the future, there will be a time when men will be obsessed with buying, selling, planting, marrying and divorce - but this will be a time of false prosperity. The Bible predicts that in this time of false prosperity Jesus Christ will appear in the clouds for the evacuation of Christians. Be careful not to help - 15 This is not the time to hoard money, as it will not guarantee real security. It is still possible that we can face a time when even the savings secured by the government will not be paid out. The only real security is on land. The money that's concentrated will disappear like sand from the hole bag in it. This is also a time when Christians must pray for its giving to the church and missionary causes. Every cent now made to God's work must be dat with purpose. Non-discriminatory giving only to facilitate conscience or offload god's cover to the church will no longer be acceptable to the Lord. Those who obey the word of God and give at a fat age will never have to beg for bread in the past few years. Those who see the hard times coming and preparing are wise. I have some advice for those who believe in the message of this chapter. I think it's advice from the Lord. Don't buy anything unless you have to. Avoid being indebted - if possible. Sell or trade with all questionable economies. No matter what sacrifice the victim is involved in, pay off as much debt as possible and keep your cash needs to a minimum. Cut your budget and cut your staff to the bone. Avoid accumulating credit card accounts. From now on, credit card debt is extremely dangerous. Don't pana, be careful. Get a good reliable car and stick to it. He doesn't foresee trading for good, for a long time. Hold on! In all means, do not cheat God. Keep your books with heaven well balanced. Your future security depends on it. Give as generous a mission as possible and support legitimate church work. Give it to you and we'll give it back to you. The message I have received for all true believers is: A prudent man assumes evil and hides; a simple pass forward and is punished. - Proverbs 27:12 David Wilkerson speaks words of encouragement to true believersChapter 7 of The Vision - God's message for ready [Consider using real Christians in this chapter.] It's been a good year for bad news. Our daily newspapers read more like cold fiction than truth. We are welcoming daily news stories about high food prices, miserable weather, energy crises and record storms and floods that are poaging the world. Words like violent, record-breaking, unsonic, and record-breaking everywhere appear in weather forecasts. When the weather should be fair and sunny, tornadoes and floods were instead hit. Where the weather was once cold, it became extraordinary and unsouno hot. Meteorologists are at their best trying to predict and analyse these catastrophes at their best, but none of them can explain what causes the catastrophic weather changes that happen so often. Many people today believe that the world is out of control. The institutions we have always trusted seem to be falling apart. The government can no longer provide solutions, and even the world's most stunning leaders are softened by the global situation. It's smashing our confidence when senior officials shrugged their shoulders and admit they don't understand anything more than we do about what's going on. There are no answers to our complex questions. In light of what we have seen over the last five years on the path of violence, immorality, crime, bree and tragedy - can you imagine what we will witness in the next decade? The way tragedies and catastrophes with such frequency and intensity hit the earth would suggest that there is a suffering of pain in the throat at work (Thus Jesus describes the events that will happen before he returns - read Matthew 24:8, Mark 13:8). The Bible says that God will create a new sky and a new earth (2 Peter 3: 10). This old land will die and melt with the burning heat. All you have to do is melt. We are witnessing not so much the death of the old world - but the birth of a new one (Revelation 21.1). These are exciting days for real Christians. God in his love and mercy allows catastrophes to strike the earth, to warn all who will hear that Jesus is coming back, and that it is time to prepare. He loves his children too much to overtake his new kingdom without warning. He knows that humanity is a hasty hearing, and that for his attention it is necessary to attract catastrophes of eatquake proportions. These catastrophes are a kind of countdown, too painful to ignore, choreographed by God, to set the stage for the last moments of time. These work pains will become more frequent and more intense as we approach the last hour. In the more places there will be more pollen, more pests, more earthquakes. And all this is just the beginning of grief (Matthew 24: 1-44, Mark 13, Luke 21: 5-36)or fear Yet the message of the Bible to all true believer is: And when these things start to happen, then look up and raise your heads; For your atoning drawing. Jesus is coming. Luke 21: 28S hearts let them down with fear of things happening to this earth(Luke 21: 26). People are making up, saving and preparing for the coming global recession. Even committed Christians get caught up in this wave of fear and anxiety about the future. People are afraid the ship's tone. Humanity craves safety and has caused an epidemic of grabbing houses, land, money and guaranteed income. Does that all sound scary? Is the truth intimidating? Is it really possible that the end of the world is really ahead of us? Is this the time that all prophets in the Bible will predict? Do we actually live in a generation where all these predictions will be fulfilled? Can even the most dedicated Christian remotely understand how terribly close this land is to midnight? One thing is for sure _ everything tends to decay as far as the natural eye can tell. Even the most doubtful person in the world must admit in his sincere moments that something apocalyptic is happening in the world. Together with the vision of calm, God gave me a very special message of hope for all true believers. I desperately questioned God about all the things I've seen coming. I asked him to show me how Christians can do whatever it takes in a limited time when many have left and hid. How can Christians keep fear out of their hearts? How can they deal with all the news reports and anticipate all accidents and accidents without fearing for their homes and children? Do they abdicia and surrender this old world to the devil and allow him to have his way? Do they pay off all their bills, salt reserves at the bank, and then try to ride it off - hoping a better day will come? Do they buy a farm or a piece of land and flee to the country - hoping they can escape the coming tragedies? Will they eat, drink and be happy - just live, knowing that death hangs over their heads? Do they allow their motives to die and surrender to fear? Do they abandon all their dreams and ambitions and become like blacksmiths searching for the truth? Dear friends, listen to what the Holy Spirit has told me. Only five small words, but so powerful, that they awakened a glorious new hope and faith in me. These five little words are: God has everything under control! That's right - everything's under control. Despite earthquakes, plagues, plagues, hail storms, killer heatwaves, floods, hurricanes and epidemics - nature doesn't stand out! Everything we see now has been clearly predicted in *The Word of God*, the Bible. Nothing can happen in nature or nature unless our God allows it. The Bible predicts that the dam of God will spill on this earth through an vanite nature designed to alert mankind to coming judgments. Nature is controlled and limited God can't cross those boundaries unless God allows it. God told Job that he was the one who: Close the sea with the door, Set the bars and doors to stay proud of the waves. And the end of the earth has been engulfed to get out of it without god. He reserves the treasures of hail and snow for battle day. water flow points for water overflow. Set up the domain of the earth and the heavenly customs. He stayed in celestial bottles. We sent out shots. And scattered wind across the earth - Job 38Trobe of God, you no longer have to fear the abstracted violence of nature. God is still the king of flood. He calls, chases and warns all children of their own to talk about it. But there's a hiding place for the faithful. The Bible states: The Angel of the Lords surrounds themselves with them, who are afraid of and exaseming. - Psalm 34:7 If you trust God, you can look every catastrophe in your face and proclaim with confidence: My God speaks to this universe and its power is proven. I will just stand still and see the salvation of the Lord Satan is under control. God can allow him to touch all the material and physical things around you, but he can't sit you down or rob your faith in God. The devil's power is limited, and even the baby [new] Christians can get him out simply by resisting him through the Word and the Blood of Christ. The Bible says, You hope the devil and he will escape from you. Does that sound like defeat? James 4:7Does showing the victorious devil? Does this suggest that Christians should be afraid of the obsession of demons? Never! God has it under control, and we're under his control. Never be 12, don't be able to fight Satan. Fear of the Lord is the beginning of wisdom (Psalm 111:10, Proverbs 9:10). Wherever you got your spirit of fear, you didn't get it from God, so why did you limit it? Shake it off because god's message is for this hour: God has not given you the spirit of fear; but power, and love, and a healthy mind - 2 Timotej 1:7Satan can try to water you with dirt and smut and vex your soul with every imaginary type of evil. He can haunt you, and the enemies of Christ can bring you back and hate you. You can end up pennless and pray for your next meal. He can hate you and reject your own family, but your closest friends give up. But the lord's eyes are fair and his ear is open to their prayer. We are not afraid of anyone who can destroy the body, but that we respect and respect only Him who can touch the soul. (10:28 a.m.) No power in heaven or on earth can touch human trust and faith in Jesus Christ. No demon, no devil, no human power can destroy the soul. You and me and everything that touches us is under his control. It's true! No matter what things look like in this drunken world, all things still work together for the good of all who God and are called according to his purpose (Romans 8:28). Let the dollar go down. Whether it's depression or recession with its unemployment and fear. Let pollution and inflation come. Let there be wars and rumors of war. Let the fabric of society fall apart. Let mankind go on the drunken brink of disaster. For the true child of God, everything is still under control! It really doesn't matter - nothing can hurt those who stay under the shelter of His Almighty Wing (Psalm 91.4, Psalm 61.4). The shadow of the Almighty is greater than all the fearful shadows that this age can project. God's children are not afraid of evil. His children will never ask for bread (Psalm 37:25), and He will supply any truly necessary until the last minute of time. God did not promise to keep his children from suffering. He didn't promise to kill us an hour ago. We do not promise world peace, serenity, security or continued financial prosperity. We are promised peace and the safety of the soul and mind - a supernatural provision for every real need - and an assurance that we will never have to ask for bread. God would have preferred us all to come to where the Apostle Paul came from when he said, Have food and raisins with the contents. 1 Timotej 6:8 Future looks evil and too long. And David says in psalms: I'm not afraid of evil. That's a message for the faithful today. The future is under his control, too, so we have nothing to fear. God has everything in advance. He knows exactly the moment when Christ will return. The last hardship, judgment and battle of Armageddon are on his calendar. God, who controls all heaven and earth, said: Nations are like a drop of buckets and are regarded as a small dust of balance. . All the nations before him are like nothing. . . less than zero. Isaiah 40: 15, 17 God wishes us to continue to work until Christ's return. That means we have to work as if the end will never come, and live like it's coming tomorrow. The great evangelist L Moody was asked: What would you do today if you knew Jesus Christ was coming tomorrow? His answer came: 'I'd plant a tree, so let it be. Let the real Cristian go about soothing and soothing god's seed and keep busy with God's work. When he comes back, let him find us, that we're doing our will. God still counts the hair on our heads. It still counts as sparrows that fall. He can still hear the petitions before they ask. He's still answering before he's called. It still gives a lot more than we can ask or think. So why are you afraid? I think a willing Christian will face a time of sadness and distress. I think they're going to test it, try it and mouse it. I believe that true Christians will witness the many horrors described in this spy. But I am also firmly confident in my heart and mind - and I have The Holy Spirit in my heart - that God will suddenly extract his true children from his final rage, which will spill to earth. He will pull his children out of the most horrific time of catastrophe that the Bible predicts will fall to earth. Ready Christians - wake up! Everything's under control, and God's at work. He saves, he's 20s, he's baptising, and he's saving his house. Fear is blasphemer. We are ordered to encourage ourselves in the Lord and start singing and rejoice when we see the approach of the last hour. Do I hear someone ask: But how can I look forward to seeing this old cursed world, the sin of falling apart? My answer is the Bible answer: Because we know that the whole creation is moaning and travaith in pain. . . Waiting for salvation Romans 8: 22, 23 A woman in childbirth may scream for pain, but in the heart rejoices in the fact of the new birth. The kingdom of God is coming. Satan's kingdom is falling. So a Christian can say with confidence. God has everything under control! If you'd like to know more about what Pastor David Wilkerson has written about the future economic crisis, read *The American Last Call: On the Brink of the Financial Holocaust*, written in 1998. Famous Christian preacher warns of a pre-catastrophe: New York City Calamity will expand to other cities -March 7, 2009 - Dear Pastor, best-selling author and founder of the Grand Ministry, announces to teenage girls the impending earthly disaster with a hub in New York that will spread to larger urban areas across the country and around the world - part of what he sees as judgment from God. David Wilkerson's blogspot: Wilkerson is the founder of Times Square Church in New York, where he started in 1958 with the Department of Gang Members and Drug Addicts. She is a highly regarded mentor to other pasteurs in evangelical circles and travels through world conferences for other Christian ministries. His work in New York in the 1950s and 1960s was his 20th year. Teen Challenge has grown to include 173 residential programs and numerous evangelism outreach centers in the United States, and 241 centers in 77 other states. The programme requires an 86 % recovery rate. The story of Wilkerson's first five years at the New York State Department is told in *The Cross and Switchblade*, a book he co-authored in 1963. The book became a best-selling phenomenon and more than 15 million copies were distributed in more than 30 languages. The past vice president of the Southern Baptist Convention hopes that the faithful will pay attention to Wilkerson's message. I've known David Wilkerson for more than and many of his friends and colleagues, said pastor Wiley Drake. He's a man of God, and I believe he listens to God. I encourage every Christian to read and read about what God says through our brother and to read about what God says. URGENT MESSAGE from David Wilkerson Saturday, March 7, 2009 I am forced by the Holy Spirit to send an urgent message to everyone on our mailing list, and to friends and bishops we have met all over the world. There's going to be a land accident. It's going to be so frightening that we're all going to tremble - even the most messy among us. For ten years, I've been warning you about the thousands of fires coming to New York. It's going to cover the entire megalex, including the areas of New Jersey and Connecticut. Big cities across America will experience riots and wildfires - as we saw in Watts, Los Angeles, years ago. There will be riots and fires in cities around the world. There will also be a Times Square theft in New York. What we're experiencing now is not a recession, not a depression. We're under god's wrath. Psalm 11 reads: If the foundations are destroyed, what can the righteous do? (v. 3). God condemns the furious sins of America and the peoples. It's destroying secular foundations. And he interrogated The Prophecy of Jeremiah with evil Israel: God is making bad luck against you, and we are making our plan against you. Oh, turn each of you off your evil path and change your ways and work. But they'll say it's hopeless! Because we will follow our plans, and each of us will act according to the stubborniry of our evil heart (Jeremiah 18:11-12). In Psalm 11:6, David warns: On evil will fire will be inged (coal fire)... Fire... The burning wind... will be part of their cup. For? And David replies: Because the Lord is just (v. 7). This is a judicial judgment – as in sodom and in The Noa generation. WHAT SHOULD THE RIGHTEOUS SHOULD DO? What about the people of God? First, I give you the practical word I received for my direction. If possible, a 30-day supply of food, toiletries and other essential ingredients in storage. In major cities, grocery stores are emptied within an hour in the sign of a pre-empted catastrophe. As for our spiritual reaction, we have only two options. This is described in Psalm 11. We run like a bird into a mountain. Or, as David says: He attached the eyes of his own, his eyelids, to the eyes of his own, his eyelids, testing the sons of the people (v. 4). I take refuge in the Lord (v. 1). I'll say to my soul, You don't have to run... You don't have to hide. It's God's real work. On his throne, I will watch the Lord of ours, with his gentle eye, loving kindness, who keeps an eye on every step I take, in confidence, to deliver his people even after floods, fires, calmness, tests, trials of all Note: I don't know when these things will pass, but I know it's not far away. I relieved my soul. Do with the message as you choose. God bless you and keep you, in Christ, DAVID WILKERSON The following word by David Wilkerson Monday, March 9, 2009 If the foundations will be destroyed, what should they do right? I recently felt compelled to send an urgent message warning of a previous great disaster – one that will also cause God's elected people to tremble. One bishop asked: Is there no more word: How can he respond fairly to such a word? The only way I can answer is to share what the Holy Spirit says to my heart and what to do. I shared that I was guided in a practical way to take away a monthly supply of food – because I witnessed panic from terrorism. This must be a personal word for every individual. This is what I hear the Holy Spirit speak to his heart about my spiritual response to previous disasters. That's simply it is – STAND STILL AND SEE THE SALVATION OF THE LORD. And Moses tells the people: Do not be comated, stand still and watch the salvation of the Lord, which he will show you today... The Lord will fight for you, and you will be calm (Izsod 14,13-14). It's a relationship of faith in confronting ruthlessness. What could Israel do on the brink of a Red Nightmare? Pharaoh's army is pressing, the mountains are on both sides, and there is an impossible sea ahead of us. Meat crying: Do something! The flesh is crying hopelessly. Can god's people dry the sea? Level mountain? Are you fighting a great army without having a weapon? They're in a terrible, frightening situation. God's people tremble - and in this hour of tremor, the word comes from God. Basically, stop still. Don't be any boo. It's a time of salvation. You will witness the pull of the foundations of the world power. But I'm going to fight for you in the same hour. Stay still – be calm and watch my work. Beloved, my warning is only one voice among many who say the same. We may all be shirking for one season, but those who truly know the word of God will quickly comfort the Holy Spirit. We will be baptized with great peace – supernatural silence – who will be a great witness to the cowardly masses. In Christ, David Wilkerson Wilkerson
