Image ad: Pixabay (Pexels) for some reason, a lot of people believe that the ability to solve crossword puzzles is a talent doled out at birth for a few of the choice. This could neither be far from the truth. Crossword puzzles are not a constant test of your vocabulary or intelligence, they are a learnable skill that anyone can develop. Learning new skills is one of the best ways to make yourself both marketable and happy, but ... Read moreNo another word game or puzzle asks just as much as your mind as a crossword. Experienced puzzles are not only considered the literal meaning of each guide, but also the similar ones they have seen before, often repetitive answers, syntax quirks, puns, cultural references and, of course, the subject of the puzzle. Unfortunately, this means that crossword puzzles can be explicitly unwelcome for newcomers. Everyone starts somewhere, and no matter what your abilities look like now, here are four general strategies to help you improve. Every day puzzles the only way to improve in crossword puzzles is to do a lot of them, and the best way to do it is to work on them in your daily routine. For me, this means tackling some puzzles from an old book of 365 Will Shortz crossword puzzles before bed every night. Mom prints out The Washington Post crossword puzzles and chips away at them for breakfast; My friends who travel by bus or train are hardcore fans of the New York Times crossword app. New York Times puzzles are most people' crossword drug portal for some reason: they're easy to find and have built-in difficulty scores. Mondays are the easiest, Saturdays are the hardest, and the puzzles in between increase day by day, so you can choose and choose the ones that work for you. The New York Times, however, is a far cry from the only publisher there. The Washington Post, Los Angeles Times and Miriam Webster also publish daily American-style crossword puzzles; Some organizations, such as Qrosswords And Puzzles for Progress, will send you up original puzzles titled as a reward for non-profit donations. Just remember that each publication has its own style - mastering the formulation of a difficult idea in the New York Times Saturday puzzle won't necessarily translate into one of the Post, and vice versa. Using applf you really want to hit your crossword game, and subscribing to an app, like this one from The New York Times, is a great idea. As much as I love them, paper puzzles can't touch the easy-to-use features you get with the app. You can easily check your work or detect character answers with a letter, rather than accidentally looking at the whole solution. This removes the clues enough to make them possible, which is exactly what you want. Also, most applications time your business, making it easy to measure your progress. But in fact, the biggest advantage is accessibility: carry around thousands of digital puzzles Your pocket makes it easy to do a lot of puzzles. Know when and how CheatCheating is a sensitive topic among crossword lovers, but there is no denying its place. Crossword puzzles should be fun, hitting my head repeatedly against the same wall, praying for a different result, not my idea of fun. Besides, frustration is a lousy teacher, but there can be nothing. Unless you have serious competitive puzzle ambitions, stubbornly refuse to look for answers or check your work will get anywhere. A lot of games require a great time investment at least, if you want to have better gear, and... Read more in terms of, you should solve every idea you might be without help, but you can't improve without challenge. A bit of strategic cheating can guide you through even harder puzzles. Apps make this super easy: just check or detect single characters at a time so you can solve a particularly bad idea. This only gives you enough information (mostly) to hack on your own, which in turn makes the answer more likely to stick to your memory. Paper puzzles make the strategy cheat a little tougher, but thanks to the Internet, not by much. If you're stuck on printed crossword puzzles, Google's full guide in quotes. Framing your research around an idea rather than, say, how many messages you have to work with will help you understand what the idea wants from you. Over time, you'll find yourself needing less and less help to solve puzzles that were previously real stumpers. Study UpIf you are serious about mastering crossword puzzles, and the internet is filled with like-minded people who like to help. A blog like Rex Parker is a great place to start. It solves the New York Times puzzle every day, compares the difficulty to other mysteries of that day of the week, and breaks down the key guide/answers pairs in a short post. Between posts and comments, you'll get a more complete picture of the solution than if you've searched for answers. You can also specialize more, and brush up on your crossword - words that often appear in crosswords but almost never in conversation. The New York Times has a quiz that tests your crossword knowledge, and there's a more general guide than Dictionary.com. Perhaps to be expected, there is also a full site dedicated to crossword puzzles, with a new word popping up every day, and an extensive archive. If the statistical approach is more quick to your, there are crossword databases out there. Data scientist Noah Feltman analyzed a set of clues and answers to crossword puzzles in The New York Times from 1996-2012, and then arranged them through crossword puzzles and their appearance. You can filter lists by minimum number of appearances or floor length, and see details about any given answer. Similarly, Xwordinfo.com will show you the most popular answers and clues to Times puzzles by year or word length. Hell, you. It's really comprehensive and blog yourself some training programs like this guy didn't, although it's unclear whether his approach is more effective than just doing a whole bunch of crossword puzzles. This does not mean that you must build a robot or save clues to
