It has tons of great images, it really explains the the methods and tips and tricks to use for the best hunting success. It also has a lot of research-based practices and some that even prove that the older practices that many hunters have been using for decades are not exactly the best methods. I am very grateful for the Socastee Library here in Myrtle Beach. This was a good read, solidified many of the ideas that I was taught as a child but lost by many years between then and now when I didn't hunt. I kept many of the skills and even continued their practice over the years despite not being a hunter. The book reads like a magazine published in book form. It was fast and ideal for many sessions and or flying through in a block of time. I'm very grateful for the Socastee Library here in Myrtle Beach. This was a good read, it solidified many of the ideas that they taught me as a child but that I lost many years between then and now when I didn't kick out. I kept many of the skills and even continued their practice over the years despite not being a hunter. The book reads like a magazine published in book form. It was fast and ideal for many sessions and or flying through in a block of time. It was not lost in long chapters, so much so that I could say that the most important skills were based on the frequency with which they were spoken. Five-star primer text, not necessarily a deer hunter bible, but this would be as good a coffee table book as a gift for a young hunter. Learn to think like your prey: stay cool, well fed, hidden. Learn to stalk how your prey wouldn't expect: death from above, shadows, are you a deer? You know the wind and where it brings your scent. Knowing when not to act like a hunter... .. plus 4 stars just because it wasn't all inclusive. As in, when you finally shoot the deer, the sections were not very detailed. For example., How to make sure the deer died once found, what to do if, hunting regulations, etc. 4 stars just because it wasn't all inclusive. As in, when you finally shoot the deer, the sections were not very detailed. For example., How to make sure the deer died once found, what to do if, hunting regulations, etc... the more I thought this was a great book. He had a lot of information, not only about the deer, but also about other things. They also made sense.
