Coffee Shop Tycoon Simulator features:• Coffee shop simulation management• Wide range of tasty coffee recipes• Realistic cooking steps• Chance to power barista skills up• Great cubic café made from 3G graphicsDownload this awesome Coffee Shop Tycoon Simulator game and check out this awesome coffee barista career! Okay, so this game quality and animation is great! The idea is simple and easy. I recommend getting this game, just knowing that it will take a while to do missions. I want that (for the missions) that once you completed the order you would immediately get another one. And maybe add some directions on how to make certain things? It's a waste of time trying to figure out the recipe for every thing. Otherwise great game! I will give this game 4 stars, but it needs a little work. I will only give this game 4 stars are because the really needs of more players!!! I mean, I feel like I'm the only one playing this game. So add a lot more players please!!!! I love this game, it's a shame it doesn't have many players. I think it's worth a lot more players. I don't know if everyone agrees, but haven't tried it, so they should. They actually like what I do. The developer, Marina Knyazeva, has not provided information about her privacy practices and data management For more information, see the developer's privacy policy. I hope some of you are ready to take a deserved vacation and enjoy the holiday, even if it's just a dinner with your household or an online family dinner like I plan to do. The last few months have been interesting, we've been working on the new update while still working on localization and bug fixes, I wanted to give you an update on the things we do for the next update and delight you with some new doing. The next update is about allowing you to create the ultimate coffee company, which means you will have a new location and new options for your business, primarily roasting and selling your own coffee! The new location is inspired by top reserve cafes that show the amazing world of coffee, it has a modern/industrial vibe and it comes with a lot of new storewares and equipment. We don't have a make for the location ready yet, but we definitely have a lot of doing for the new items and equipment! As you can see, we have worked hard to bring you more content and expand the world of Coffee Shop Tycoon. These are some of the new elements coming to the game, but there is still more to come with this update. Now back to Roasting, we've been thinking about adding roasting for a while now, but it's certainly not something we want to add easily, it has to tie together with the game mechanics and progression of the game, for the last 6 months or so there's been a lot of study and design to come up with a roasting system that would be fun and work with the game. Roasting is going to work similar to drink creation, but it has its unique mechanics, it all starts with having a new skill for your employees, like Barista, Speed, and Service skill, now there is a Roaster skill, you will be able to train this skill, level it up while roasting or recruiting employees who focus on this skill. Once the roasting station is unlocked in the headquarters you will be able to go in there and create a new Roasting Profile. This screen will show you the green beans currently on the market with their origins and attributes, you will be able to grab these beans and start roasting a new batch, which will become a new Roasting Profile. Work in progressThis is a manual process where you control roaster by increasing and lowering the heat to extract different notes and flavors from the coffee. If you manage to create a new batch without burning the coffee, a group of coffee tastings will grade your coffee. You will then be able to choose the branding of your beans and save your Roasting Profile. Back in the store, you will be able to place roasters in your and hire staff to fry these roasting profiles, while these green beans are still available. Finally, your your Coffee will show up in your coffee supply and you will be able to use it like any other bean. To make this more fun we will also be tweaking the way the store reputation works to cater to particular beans, customer expectations and stats will also be tweaked to work with the roasted beans. To summarize it, the next update will have a new feature roasting, a new location, and new items. This location will have missions that will only be completed with Roasting new delicious beans, but we will see how roasting can be introduced earlier in the game probably during 4. We will keep updating you with new screens and doing as we continue to work on this update and we will let you know as soon as there is a beta available to try all these things out! Thanks for reading, happy holidays, and enjoy your coffee! Coffee Shop Tycoon was released on December 5, 2016A The GameCoffee Shop Tycoon is a management game where you take control of your own coffee shop. Do you want to thrive and become a popular café or die trying? Everything is in your hands. The game is not another 'click and wait three hours for your employees to cook' kind of game, you will have to make choices all the time that will bring more customers or make you lose money. We're building a game where customization and planning are just as important as having fun.
