The requested resource is not available. glassfish Greenhorn Posts: Hello kids published 8 7 years ago I'm doing an EJB project in Library Management using netBeans Out which the first step is to create a CREATE ACCOUNT page and get all the details that the user and store in the Database. Do not use JSP for this. Everything is created, but returns an error when I try to click the Send button in WEbPAge: HTTP Status 404 - type Status report message descriptionReleasing () not available. GlassFish Servlet form 1 name=form 1 method=post action=<%=request.getContextPath()%>/Servlet/createAccountServlet> Servlet flle name account creates servlet .java Greenhorn Messages: 3 posted 7 years ago Hello, Web check.xml file action URL for mapping tag, or check if you are creating any listeners. Your application is not successfully distributed to the glassfish server and therefore is not able to monitor ... Try rededing your application. /bin/asadmin deploy application name you have any idea why this is going on? > Thank you very much! > ['Message'] sent by ariel ro forum member> > > > ------- > To cancel a subscription, email: users-unsubscribe at glassfish.dev.java.net > For additional commands, email: users-help at glassfish.dev.java.net > > > I tried to look for other answers on this website but it was not possible to find anything that helped me. I always get http 404 Status - not found: I just wonder if anyone can help me solve this annoying problem this is code for my directory isp where information <! DOCTYPE html> send <html><meta charset=UTF-8><title>Index Örneği Dizin Sayfası</h1><!--submit button goes to the controller method=post><pegt; Kimliği <input type=text name=actorID> Adı <input type=text name=name> Doğum Yılı <input ></nput ></form></body></body></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form></form>& java.io.IOException'ı ice aktar; javax.servlet.Servlet.Servlet.Servlet.Servlet.Servlet.Servlet.Servlet.Servlet.HttpServlet.Htt ServletException atar, IOException { response.setContentType(text/html;charset=UTF-8); // Yeni bir aktör int id = Integer.parseInt(request.getParameter(birth year)); Aktör = yeni Aktör(id, isim, doğum Yılı); İstek request.setAttribute(theActor, aktör) içinde aktör özniteliği ayarlayın; Farklı bir Görünüm isteğine gönderin.getRequest (istek, yanıt); } @Override korumalı geçersiz doPost(HttpServletResponse yanıtı) Atar ServletException, IOException, IOException, Farklı bir Görünüm isteğine gönderin.getRequest (istek, yanıt); } Paktör sınıf kodu paket MVC Movie Example; Paket bildirimi // Sınıf tanımı public class Actor { private int id; private int id; private int id; private int birthYear; public Actor() { } // Varsayılan yapıcı // Değer tabanlı yapıcı // Değer tabanlı yapıcı kamu Aktörü (int externBirthYear; } // Aktör id getter metodu public int getld() { return this.id; } // Actor id setter method public void setId(int externId) { this.id = externId; } // Aktör adı getter metodu public String getName() { return this.name = externName; } // BirthYear getter and setter } // Sınıf sonu tanımı dahil olmak üzere diğer yöntemler takip Eder Ve son olarak denetleyicinin çıktıyı <! At the moment no one would be able to recommend it without seeing the code ... Skip peter budo post 2,516 Code tags enforcer Team Colleague Featured Poster Check the GlassFish log folder for the 7 Years Ago log file and check the full error description. But there seems to be no request for the page from above, name dharmil007 0 Newbie Poster write in many cases 7 Years Ago log file and check the full error description. But there are no errors. Yes, i KnoW, this error does not provide much detail, but I am not helpless. i also tried to write this yerlocalhost name:8080/Library-war/Servlets/createAccountServlet.java but still the same error. peter budo 2.516 Code tags enforcer Team Colleague Select Poster 7 Years Ago given that you only started to add the current code pack in the ZIP file and to the next response or install github and someone can look. At the moment no one would be able to recommend it without seeing the code ... dharmil007 0 Newbie Poster 7 Years Ago k Thanks for your answer. i Manged to finally make mistakes. There was more than one mistake. i just wanted to know that after NetBeans created this EJB Project, i can actually deploy it on a Website, which can be done? Yes, what if it is? How? peter budo 2.516 Code tags enforcer Team Colleague Selection Poster 7 Years Ago Website is just the loose general term for viewing data on the website. Google provides an Application Engine (Application Eng required to deploy your site needs java enabled server to run. But I'm not sure you can deploy EJB there. Check this link for more information. information. Posted December 24, 2012 - 11:26 THE form's action attribute is probably incorrect. Name Servlet to search and remove all the extra road supplies you have. Was this article useful? 0 Page 2 Posted December 27, 2012 - 2:11 AM Hello, I have a Project I need to create a JSP Website. This is not the first time to reate and compile ready-made jsp files once. Since I plan to use a Text Editor (Geany), I alone will not have this magic button to so. I hope you've all have this magic button to so. I hope you've all have a wonderful Christmas, Andrew BP Website. The main concern is how to create a JSP Website. This is not the first time to reate a JSP Website. This is not the first time to you've all have this magic button to so. I hope you've all have this magic button to so. I hope you've all have a project I need to create a JSP Website. This is not the first time this magic button to so. I hope you've all have a wonderful Christmas, Andrew BP or Dy how on I not you are a polarized power or a continuous and this post Useful? O Posted December 27, 2012 - 01:15, a.m., said:a., but I'm trying to challenge myself and create this without an IDE. There's a fine line between challenging yourself if you like a challenge, why didn't you try a different language instead? If you already have JSP experience, ASP.NET does something, PHP or Python will not only be a challenge but at the same time the skill set will add something. Was this article useful?
