Combining like terms pyramid sum puzzle answer key

Students will practice simplifying phrases by combining similar terms with this pyramid of the sum of puzzles. Just give each student a template and a set of problems. They simplify each expression, cut out the fields, and then paste them into the template so that each simplified expression is the sum of the two simplified expressions directly above it. See preview for more detailed tips and photos. For a digital version of the google puzzle, click here! To get the version with distribution included, click here! This resource is included in the following package(s):Middle School Math Classes BundlePre-Algebra Activities Bundle LICENSENSING TERMS: This purchase includes a license for one teacher for personal use in the classroom only. Licenses are non-transferable, which means they cannot be transferred from one teacher to another. No part of this resource can be shared with colleagues or used throughout a class, school, or district without purchasing a sufficient number of licenses. If you are a coach, director or district interested in transferable licenses to account for annual staff changes, please contact me for a quote on allthingsalgebra@gmail.com. COPYRIGHT TERMS: This resource may not be uploaded to the Internet in any form, including school/personal websites or network drives, unless the site is password protected and is only available to students. This is a digital version of my Combining Like Terms Pyramid Sum Puzzle designed in Google Slides.Students will practice simplifying expressions by combining similar terms with this pyramid sum puzzle activity. After purchasing, you'll receive a guidance document on how to download this activity to Google Drive. To access this activity, you and your students must have a free Google Account. After you download an activity to Google Drive, you can share it with students. Students simplify each phrase, type answers, and then drag the puzzle elements onto the template so that each phrase equals the sum of the two expressions directly above it. They can then make this activity available back for review. The letters of the field make it easier for students to organize their work and make it easier to evaluate! Digital versions of Google Drive activities are sold separately from curriculum packages. All non-printable versions can be found in the curriculum. This resource is included in the following package:Google Drive Activity Pack - TOM 1CALCULATING TERMS: This purchase includes a license for one teacher for personal use in the classroom only. Licenses are non-transferable, which means they cannot be transferred from one teacher to another. No part of this resource can be shared with colleagues or used throughout the class level, or district without purchasing a sufficient number of licenses. If you are a coach, director or in table licenses to accommodate annual staff changes, please contact me for a valuation on the allthingsalgebra@gmail.com.
