Poe currency farming guide

How to farm currency items in PoE? There are many ways to earn currency items. Firstly, you have to buy a premium tab to sell items. The only public tab that can sell items. 1. Do PoE Chaos Recipes Full Rare Sets These recipes require a full set of rare items. A full set is capable of filling all the item slots in the inventory screen (excluding vases, replacement weapon sets, or a quiver). Specifically, it includes: One of the following: 1x Two-handed Weapons (including bows, optional quiver), 1x One-Handed Weapons, and 1x Shields, 2x Single-handed weapon, 2x Shield 1x Helmet 1x Body Armour 1x Gloves 1x Boots 1x Belt 1x Amulet 2x Ring Currency produced depends on the goods with the lowest level of items in the order and the quantity they have is all in an ermed and/or 20-quality%: 1x Chaos Orb = Item level of lowest level item: 60 to 74 (Item level of) 2x Chaos Orb = Entry level of lowest level item: 60-74, all inested OR all 20% quality 3x Chaos Orb = Entry Level of lowest level item : 60-74, all ine defined and all 20% quality Notes: If a rare items under 60 are added to the Chaos Orb formula then the formula will change to the Orb of Chance formula. Prophecy A valuable combination can interfere with this formula. 2. Buy PoE cheap currency buy cheap PoE instant currency delivery using a 5% off coupon: CURRENCY. Mulefactory is a reliable PoE currency site offering cheap premium Globes, Chaos Orbs, PoE Items, etc. Payment: PayPal, Skrill, BitCoin. 3. Manual map using Orbs of Alchemy Orb An Orb of Alchemy is a monetary item that can be used to upgrade part of normal equipment to rare. An alchemical ornthothe can be used to upgrade a normal item to a rare item. Rare results have randomly selected additives and there are some random elements (ranging from four to six [three to four if used on jewelry]). Common use cases include upgrading good normal items (especially those with appropriately linked sockets) during the character development search phase, upgrading normal maps to take advantage of large number of item bonuses from having up to six extras, and strong box upgrades. 4. Selling your unwanted items to PoE Currency Trading is the best PoE currency site. You can buy or sell almost any items. At first you have to buy a premium tab from the official Path of Exile website. Then you just need to set the price in your game and it will display the information in PoE Trade automatically. 5. Seal and sell valuable prophecy Prophecy is the vision of the future of a character, provided by Navali. They can be purchased for a Silver Coin and stored in the prophecy screen These prophecies affect the future of what happens to the player's character. Some may change areas to create different encounters or to force different outcomes to occur. Others activate when a condition occurs and and Results. With an additional cost of Silver Coins varying from 1 to 9, Navali can seal prophecies, turning them into items so that they can trade. This allows players to delay their fate, or take advantage of it. Sealing the prophecy sequence will re-establish the mission state of that prophecy chain into 1. Conversely triggering a sealed prophecy will establish the mission state to trigger one, no matter which state was previously. These prophecies do not activate when loading an area that will not activate ever for that area unless sealed and reused. This does not include maps. Here are the best prophecy entries: Trash to Treasure: 1.4kx Chaos Orb The Queen's Sacrifice: 1.1kx Chaos Orb Fated Connections: 287.9x Chaos Orb A Dishonourable Death: 20.0x Chaos Orb A Master Seeks Help, June: 20.0x Chaos Orb Song of the Sekhema: 13.7x Chaos Orb Lost in the Pages: 13.0x Chaos Orb Darktongue's Shriek : 9.0x Chaos Orb Last of the Wildmen: 8.0x Chaos Orb The Bowstring's Music: 8.0x Chaos Orb Monstrous Treasure: 6.8x Chaos Orb Cleanser of Sins: 6.0x Chaos Orb A Master Seeking Help, Zana: 5.0x Chaos Orb A Master Seeks Help, Alva: 5.0x Chaos Orb The King's Path: 5.0x Chaos Orb Blind Faith: 4.0x Chaos Orb Fire and Brimstone: 4.0x Chaos Orb The Great Leader of the North : 4.0x Chaos Orb Vaal Winds: 4.0x Chaos Orb 6. Flip items in PoE Here's the best website or tool for flipping currency items: PoE Ninja: show the latest prices and the best value items. PoE Trading: You can search all the sales information from there. PoE Macro Trade is a useful tool for trading currencies. 7. Run Uber Lab and make valuable enchants Maze is a random dungeon created filled with traps, puzzles, and monsters. Completing the Maze for the first time opens up the character's Ascending class and points to the powerful Ascending Skill Tree. It also offers equipment charms, a number of unique items and competitive leaderboards. After defeating Izaro, the player enters the last room of the Maze, the Ascending Room. This room has the Ascending Altar, the Sacred Font and Izaro's ten treasure chests. Completing the Maze of Normal Difficulty allows players to choose an Ascendancy class on top of receiving two points to spend on the Ascending Skill Tree. Upon completing the ruthless, ruthless and eternal Maze, the player again receives two points per person. Players must interact with the Ascending Altar to select their class and get their points. Additionally, every time the player completes the Maze, they can use Divine Font to instill a piece of equipment with a spell. Each of Izaro's Treasure chests is the equivalent of a random strongbox - for example, one can be filled with randomly filled loith, while another can only accommodate jewelry Currency. A Treasure Key is needed to open each chest. Keys found transparent and from Izaro him. In the first two Izaro encounters, the player can choose to focus on Izaro without neutralizing his additional buff/damage mechanism. Without ineffectiveness these mechanisms are then carried out to the next stage of the fight making it more dangerous, but also more rewarding. Izaro will drop one more key for each mechanic in place at the end of the war. More Treasure Keys can be obtained by killing Argus or opening Curious Lockboxes. There are daily leaderboards where players can compete to solve the Maze fastest. Players with the best results are rewarded in each difficulty. 8. Play more, get more. This is one of the best and you will enjoy it. Find what you like and try to make it profitable. Enjoy the Path of Exile Delirium and earn poe money with ease. I just want to share with new players about tips and tutorials on raising poe currency. There is a lot of information available about how to cultivate effectively and make banks on Reddit. It was a bit overwhelming for me as I just got back to PoE this tournament. I started the period when the intrusive race started (20 days ago), and 4 days into the race, I noticed that there was this guy with a headhunter and a full set of gears on top of the ladder. I was very curious about how he amassed so many properties in such a short time. I wanted to know what he was doing, so I decided to try all the farming methods on Reddit/youtube to see how I could farm effectively as the top players. After several minutes/maxing about farming, I was making about 10-20s plateaus every day on the 2nd week of the race. So without further introduction, this is what I did and did not do. The purpose of this tutorial is to share an interesting farming method and not restrict players from experiencing every aspect of the game. 1. Chaos Recipe In the first part of the race, I collected all the rare gears and did a chaotic formula un-id. I even watched a guy this of a youtube video about how to stack unique rares in a quad tab to help convert chaotic formulas quickly and efficiently. My conclusion though? Don't do this. It's an ineffective and boring way to make currency. I just did it in the very early part of the game where I couldn't map, but I was still at level 60+ area. 2. Low floor (white map) dienging farming cards. A lot of people share an MT accumulation method of exalts by raising a single map over and over again given that 1 fortune teller card is worth a ton (namely doctor card @ burial room). It is my opinion that low-level farming is not ideal as it does not do many things at once (rapid leveling, progress through the set progress through challenges, make \$), and not the most effective way to create currencies either. 3. Flipping currency I don't recommend flipping currency for the same reason I don't recommend low-level lows You don't make anything other than make a profit (and this profit won't be worth anything at the end of the tournament). Moreover, you do not even get any XP. Buy Cheap PoE Currency Buy Cheap PoE Instant Currency Delivery using a 5% off coupon: CURRENCY. Mulefactory is a reliable PoE currency site offering cheap premium Globes, Chaos Orbs, PoE Items, etc. Payment: PayPal, Skrill, BitCoin. 4. So how do I make money? Run a guardian map. The cost of each guardian map is about 19c-25c depending on the type of map. The cost of each piece is 15c - 20c depending on the fragment. People don't like running Chimera because he's the hardest person and you can actually die if you don't find him fast enough when he's inside the sandstorm cloud. The cost of the map - The cost of each piece = about 5c. Investment = 4 chisel / alch + spam scourorb to get 80% IIQ / 3 chaos for warband = about 7-8 chaotic balls . The cost of running the Guardian map = 13 chaos. If you can maintain your map (which you can if you run a lot of these and make sure that 80% of IIQ + Warband), the cost of guardian maps disappears. Investing 7-8 chaotic balls can be easily compensated immediately in either currencies or very fast selling tools (lvl 83 abyss jewel for example). Moreover, you can get MT of worthy handy materials such as pointed gloves, tight gloves, and whatnot. So in essence, the minimum profit you can get from running the Guardian map is 1 piece (15c-20c). If you are fast enough, you can do these guardians about 6-10 times per hour. While you farm, you'll also get a few divine/noble balls/very juicy rares/high value uniques. This is a very consistent and stable method of generation of profits. You only really need about 5-10 guardian maps to get started. 5. Important details -Incursion is extremely useful and I believe it is mandatory if you want to maintain your level 16 map pool. Try to get the following rooms: item room, strongbox for strongbox's House 1 map, and map room. Again, all you should be interested in is getting that t16 map to drop. -If you have your older shadow, either save it or use your older shadow on a map worth more than a guardian map. I did it on a haunted mansion that sold for 30c per piece. Sell for 30c, buy guardian maps for 20c, and get an extra

profit of 10c. -Sextant is worth using on the 16th floor map, but the guardian map is surrounded by red floor maps. You will have to use the overall sextant which costs 4c each. If you start rolling your sextant, you can actually lose profits compared to running the map without a sextant. Sometimes I use 1-2 sextant whenever I feel like it, but most of the time, I didn't use it. I tested the profits I earned from running the Guardian map with sextant, and saw slight improvement when running without it (yes, it's better to use sextant). However, I don't like having to trade/buy sextants whenever I run out of them. 6. Uber Elderly When you save enough guardian reserved maps, you can start running uber elder. It may be my superstition, but whenever I run a guardian map while it is occupied by an older guardian, dropping my map seems below. I observed this only in my 40-50 uber older guardian run and may be nothing more than just bad rng, but that's my own superstition. I also noticed that if I ran a guardian map, older Uber spawned extremely quickly compared to low-level map spamming to spawn affecting the elderly on a level 3 map. Keep running the guardian map until the older Uber spawns. You can choose not to lay older eggs, and continue to feed the guardians, or do uber older people for an opportunity to gain more currency. If you reach uber elderly people in the first week of the tournament, I'd definitely recommend uber farming elderly people, because any drop from an uber older person is worth a ton especially at the beginning of the tournament. However, raising uber elderly people will cost you about 1 noble ball (4 fragments), and it's a lot of rng based. You can get a profit of 20ex+ or be left with an older quiver that sells for 4 chaos. My opinion is that uber elderly people are very profitable if you are doing at least 20-30 of them in a chain that is why I recommend doing uber-elder when you have enough guardian maps in reserve to fall back. Also, don't farm uber the elderly until you can kill him successfully with 1 set of debris. 7. Map elderly + elderly / shaper ping pong Once you are done with an elderly uber (as in you are sick of elderly uber agriculture), you can change gear and go for maximum xp. Tier 16 Sea Underground with Beyond from Zana mod is a great way to achieve XP's MT. To do this, you will need to remove the guardian map from your map. The level 3 spam map until the influence of older people appears in the top left corner, then searches Reddit to try to create an older square for the underground sea and start cultivating it. 4 Chisel + 80% IIQ + no vaal ball + 4 sextant + Aggression will help you maintain your T16 map. You can make a temple run every 11 runs for excessive sustaining. Once you have the MT of the elderly maps, you can switch to further for maximum xp. This is what you do when you run out of things to do and just want to grind xp to get to level 100. Keep in mind that doing this will limit your ability to run other maps because you have to maintain your hero square. I bought about 20 senior maps for 5 noble balls and started these, and can maintain the map and generate a small profit for expensive investments. I believe guardian maps make more profit than elderly maps because of debris. Either way, you can sell all non-tier16 maps to other players for an obscene amount of profit. * Edit * I forgot to write this section again after deletion. 8. Crafting + Identifying rare items While running the T16 map, you will find the following worthy craft materials. Shaper Shaper – Amulet - Rubber Ring - Pointed Gloves / Gloves / Fingerless Gloves - Abyss Jewel - Boots + Helmet - Steel / opal ring Boots with a travel speed of at least 25% , 75 + hp, 100% res -> 1 super high. If 30% of the speed moves, then at least 2 old. Helmet with 80+ hp, high resolution -> 1 plateau. Abyss belt with high hp + high resolution -> 20–40 chaos. ivl 83+ Shaper Gloves -> at least 6c. If you manually, then 30c + Elder ring -> Life + reel res make it 1 ex + Steel / opal ring -> hand craft with nature and if you see the 1st floor / 2 reels, then sell for exalt + Shaper amlet - > handy for IIQ 10% and sell for \$ Random spiked gloves / gloves gripped / fingerless and what-not: sell for 2c each if only white or magic Sell for 30c+ if you craft and get good rolls. Abyss jewel -> what you need to use. For example, arc trapper will use hypnosis. Searches are for physical construction and they are more expensive. 5-6c for any abyss ivl 83 and 20c+ for 84. Crafting these jewelry is not easy but it is not difficult either. Get 1/1/1 roll and sell it to a noble copy if the mods are involved. So in addition to fragmentation + profit maps, you are sitting on things worth at least 30c to sell in your inventory. Once you have enough things to sell, just staying logged in will give you MT profit. And all this crafting is possible because you are running the highest floor map in the game. I hope it helped and if you have any other methods that you find successful, share. 9. Other tutorials and tips I've been raising old-age haunting villas for the last few days now. 4 sextants to get relevant mods -> 4 Chisel -> Alch / Scour until I get 85% + quant -> use one of zana mods with 20% IIQ The purpose of switching to elder maps from the Guardian is to make sure I don't die from a Madden mod guardian once in a while that resets my xp progress. I was able to level twice and die only once because of a lag. However, maintaining the map seems a bit difficult (starting from 20 maps, and after about 50-60 runs, bright at 15 maps). Again, experimenting with different Zana mods, but at this point, I'm only interested in maintaining the map. Contrary to what many aty have told me, I can see that my profits while running the T16 elderly map are lower than that of guardians + occasional elderly people. Maybe, it's because the castle is haunted. I'd like to try the sea underground and see if it's more profitable. But now, I believe that T16 guardian + occasionally elderly / older uber gives you more freedom + loot better fit. 66% downvote without any explanation of the reason for downvote makes me wonder What is the reason for downvote. I would assume it comes from pro-chaos-recipe/burial farmers. If so, I oppose the burial/chaos formula because most new/normal players won't see shaper unless they progress strongly towards the heart of Both methods of making currency are time ineffective in this view. perspective.
