The fans of the included double front AF140L provide direct GPU cooling, and have a total of seven fans for your highly high volume Erflo projects. All air intake is safe with the remover's wash filter. The entrance is designed for high cooling performance, with a modular removing drive-key system and dual SSD sector that is mounted behind motherboard tre and out of erflo way. The extra large, flash-installed side window keeps your system building skills on display while checking and maintaining with better Obsidian series design. Custom-designed, cartier-exclusive AF140L 140mm intake fans provide effective erflo with low noise and negligence. Air Intake directly pass into your GPUs for effective heat consumption. If building your high performance system needs high performance cooling, 450D is an ideal platform. The most support for the reddy atter flexible watercooling installation options, or high-level wanton, support front, bottom and back. Under Motherboard, SSD uses the growing entry space effectively and gets your solid state storage out of the Erflo route. The remove rafters allows you to use the space you need for your storage needs only. The beautiful aluminum front is the distinct CIA distinction of an Obsidian series. It is durable and resistant to the snores and fingerprints. The clear acrylic window allows you to show your work.
