On my Huawei G700 with 2GB of RAM there is virtually no use of exchange files. That's what it should be and that's fine. But on my LG Optimus 2x with 512MB RAM, I found the exchange file usage very little and the phone is still quite slow. There is nothing wrong here with the concept of an exchange file (file page in Windows) but not sure if this was done correctly. I'll update the review if things change. Dr. Urban Marquardt: Hands down the best app I've ever bought. Pubg plays in HD/over 1080p settings, 100% because of this app. Im blown away by how efficiently this app works. Thank you for your hard work! Magnolia White: Love this app. It was for my old Samsung Galaxy purpose again. Having an extra 4gb virtual space has definitely made a lot of difference. Especially during gaming. Where my phone doesn't crash anymore. Eldridge Beier: My Perfect Sony Xperia z ultra phone had a lag every time I went back to the home screen. The process of displaying with icons on the homepage is simply annoying. I tried everything to solve the problem without success. Since I discovered this application. This app is expensive but really offers what it does Appointment...
