There are alien zombies. Get them. Using WASD or arrow keys to move and mouse to aim and shoot, you need to outkill your opponents or achieve your goal, with or without a partner next to you. Cycle through your weapons with Q and E, or handle them directly with a number key. Use different special abilities with an F key. Each round gives you credits that will be used to buy upgrades, new abilities, and other items. Finish the first campaign and you'll have a chance to get back at those sleaze men. Raze 2 is fast, frenetic and fun... if your CPU can handle the load. Fans of the original will recognize it as the semi-update/semi-sequel that is. That's not a bad thing though: with simplified gaming, a host of new gun cards and game modes and one of the best soundtracks heard so far this year. Raze 2 may seem a little generic to those not already sold on the concept of racing around zombie-alien maps. However, fans of the genre should enjoy a multitude of game options, a two-perspective campaign and a touch of juvenile humor: letting the player know that they have managed to eliminate their enemy with a shot in the butt may not be the most mature thing in the world, but hey, in a war zone you have to do your own fun. It would have been better if teammates had differed more from the enemy, and the lack of online multiplayer is a sad omission, but for fans of arena shooters Raze 2 raises the bar. Waiting for 50 weapons, 24 signs, 2 campaigns and 30 It involves quite a run-of-the-mill clash between strangers, humans and zombies of all things. It doesn't affect anything beyond the odd voiceover, working more like a thin framing device for a real draw: running, jumping and recording anything that isn't human. The game offers handguns, rocket launchers and laser swords, as well as an exhaustive upgrade system that is almost daunting to explore. Each weapon can be adjusted to the details of the log, which is cool even if sometimes it feels a bit like putting on a window. Is your default gun that much more effective with ergonomic grip? Not really, but hey, it feels damn cool to have it. You can also mess with the look of your avatar to the content of your heart. Gameplay hasn't evolved much since previous entries, but what's fun is fun, and some of the new backgrounds and levels are fantastic in both art and design. So play Raze 3 and teach those alien punks who's the boss.
