

Pinewood derby timing software

Buy Now GrandPrix Race Manager Version 20.0 (2020) GrandPrix Race Manager<sup>™</sup> is an app that will help you manage the Pinewood Derby<sup>®</sup>, Awana<sup>®</sup> Grand Prix, Space Derby<sup>®</sup>, Raingutter Regatta, and other similar races by Royal Rangers, Royal Rangers, Lutheran Pioneers, YMCA Adventure Guides, Christian Service Brigades, CRC Cadets, Master Clubs, and other organizations. GrandPrix Race Manager handles drivers who sign up to determine the winner of the award, making your race more organized, shorter, and fun for everyone. GrandPrix Race Manager is highly customizable and easy to use.\*\*\* Our competitors can claim that they provide leading race management software, but we feel that the software should have a conversation! Download our demos and them and see for yourself who provides the best software on the market. In addition, we provide fast and professional support for our software to help you have a smooth race. Key Features: Flexible and Easy-to-Use Step By Step Use - The software shows you the steps to take to run your race. Check each step when you complete it. Adapt to Different Types of Races - Customizable for racing cars, semi-trucks, Space Derby<sup>®</sup> rockets, Raingutter Regatta boats, and other racing vehicles. Not Tied to One Specific Way – The software gives you the flexibility to run races in a variety of ways. The software will not specify how you should run your race. Customize it to your Organization – You can define your race groups and subgroups into whatever you want. Number of Lines - Support from 1 to 8 lanes. Large Font Screens – List Screens, Racing, On Deck, Standings, and Awards have fonts large enough to be shown to an audience on a large TV or projection system. Highly Customizable – Many options are provided to allow you to customize the software to better suit your needs. Lite and Pro versions - The Lite version of the software is available for those who need more flexibility and features. Compare Lite Version Racer Registration and Simple Driver Registration Pro - Enter the driver manually or import the driver information from an existing spreadsheet or database. You can also import driver data to DerbyDMV. Vehicle Number Flexibility – Drivers can choose their own vehicle number or they can be assigned by racing staff or by software. Racer Photo (Pro Version) - If you want, you can add a photo of each driver or their racing vehicle. You even take photos directly from a web camera.\*\* These photos will be displayed on the Racing, Heat Winner, Track Record, and Awards/Standings screens. Static Scheduling Race Scheduling – This software has a built-in generator for N-Type schedules and Track Rotation. Dynamic Scheduler maximizes the number of drivers to win at least one Competition is getting tougher for all riders as the race progresses, as riders are squealed based on performance. Other Scheduling Methods (Pro Version) - Compatible with other non-elimination scheduling methods such as Stearns, Round Robin, Chaotic Rotation, and more via import or manual entry. Master Scheduling (Pro Version) - Builds your group schedule for laps into master schedules. Make the drivers more involved and not wait for their group's turn to race. Note: Master Scheduling doesn't work with Dynamic scheduling. Ad-Hoc Scheduling (Pro Version) - You can even race without first creating a schedule, for ad-hoc racing. DO NOT support Single, Double or Triple Elimination – Find out why Race Scoring - Score by point or with elapsed time. Time Scoring - Score based on your choice of cumulative time, average or fastest single pass. You can even ignore every driver's worst time, so one bad run doesn't hurt them! Points Rating - Points are awarded on a final order. Automatic or Manual Entries - Results can be entered automatically, through one of the supported time systems, or manually. Running Race Rounds - Run a number of laps for each race group. You can also run grand finals from the top finishers of each race group. See Suggested Race Formats for one possible way to run races with our software. Full Featured Racing Screen Shows current hot racers and their track duties. Also displays results for each racer after the heat is over. Featuring racers On Deck. Displays a list of top times (Pro Version). Displays track record time and record holder (Pro Version). Automatically receive input from the time system, if one is used. Run a head-to-head tiebreaker heats up, if needed. Play sound effects. Re-run the heat, if necessary. And more... Tiebreakers (Pro Version) - If you have a tie in the standings, you can apply a series of tiebreaker rules to break it without further races. You can also break ties in a head-to-head way. Hardware Interfaces Timing Systems - Supports several popular timers, including Fast Track, NewBold Timers, even many DIY timers (Pro Version). Important Note: We do not guarantee how well serial timers not specifically listed above will work with this software. Start Light Christmas Tree - Supports compatible drag racing style triggers starting to light the Christmas Tree through the serial port. Solenoid Start Gate -Supports solenoid compatible start gate triggers via port Award management and Standings Awards - Determine an unlimited number of designs, speeds and other awards. Appoint each winner, once they are determined. Certificates - Print awards and certificates of participation. Awards Ceremony -Show awards and speed standings your awards ceremony. Various Reports - Many reports are provided, from rosters to race statistics and everything in between. You can easily post this to your website. Export Reports - Reports can be exported in a CSV (Comma Separated Values) file format so you can create your own custom reports. Customizable - Some reports provide customization options. More Feature Search - Find data quickly using the integrated search feature. Race Statistics - Detailed statistics are provided for groups, drivers, track and overall race performance measures. Supports Power Point Presentation Remotes - MC or race director You can control a large font screen using one of these remote control types. Supports RaceFX Version 7.0 or above, then GrandPrix Race Manager can automatically control playing sound effects during races. Supports RaceReplay Software (Pro Version) - If you have installed RaceReplay Version 5.0 or higher, Then GrandPrix Race Manager can automatically control video recording and playback from the racing screen. Supports DerbyWeb Add-On (Pro Version) - DerbyWeb addon interface with your GrandPrix Race Manager data file and allows your racing crew and spectators to access certain race data via tablet computer or smartphone. And more... Note:\*\* The Snapshot feature requires a compatible video camera or webcam and a connection to your PC. See the Requirements tab for specific hardware needs. A portion of the profits from this software are donated to our local Awana club. Awana® is an international organization that seeks to teach girls and boys about the gospel of Christ and to train them to serve Him through memorization of Bible verses, Bible teaching, games, and other activities. Mac and macOS is a registered trademark of Apple, Inc. Upgrade Policy: Upgrade Now Registered Anyone who purchased a previous version of this software within 90 days of the latest version being released can contact us for a free upgrade. What's New with Version 20.0: GrandPrix Race Manager<sup>TM</sup> was originally written for use in our Awana Grand Prix race at gateway Church of El Cajon, CA. It was then offered as shareware for several years before being rewritten as a commercial grade application and launched as Version 2.0. Every year we continue to software and have used it to run our own Awana and Cub Scout races every year. Countless race coordinators have provided their feedback and suggestions years, which has helped make GrandPrix Race Manager into a package of guality race management software and outstanding value for price. Version 20.0 is part of the fourth generation of this software (V1 Shareware, V2-6, V7-15, V16-?). This generation is a massive overhaul of the software to achieve two main goals. The first is to make the software as user-friendly and intuitive as possible. The second is to make the software compatible with Windows and macOS. This is a great effort, since the software should be written in a different programming language, but we are proud of the results and believe that you will find the software more useful and easier to use. New or Improved Features for All Users Award Design Trophy awards are now easier to create. You can add a set of design trophies in one operation instead of adding them one at a time. Added a Assign Winner screen to make it easier to select winners. Modified arrow keys to change priority to move selected awards up/down the order, precisely remoring the adjoining awards. Add an Award Design Judging Scoresheet report. Print for each racing group and give your design jury for them to determine the winner of the design trophy. Registration When adding or editing a driver, if a vehicle# is retrieved, the next available vehicle# will be listed. The Schedule Adds a Done column to show when the heat is already running. Add the completed and unfinished heating count. Standings Add a chatty message to review the standings before showing them to the audience. It will show riders who haven't run hot, with --- for the standings. Serial Timer Fixed the maximum automatic reset limit for timers that allow use without a start switch. The Internationalization Support Number will now be automatically formatted with the appropriate decimal characters (. or ,), per the local settings of the computer system. Added the ability to set date display preferences, either Month/Day/Year or Day/Month/Year. This preference is set on the 'Software Settings' screen. MacOS Support The software can now automatically detect if more than one monitor is in use. General Now you can use the Delete button to delete the selected record (Organizational Structure tab, Enrollment tab, Awards tab, Top Timing, Track Record Settings, Manual Heat). You can now use the Insert button to add new records (Organizational Structure tab, Enrollment tab, Awards tab, Top Timing, Track Record Settings, Manual Heat). When the Audience View Screen is opened, group selection will be displayed automatically. Some less important improvements and fixes are implemented. New or Improved Features for Pro User Rewards Using the Assign new Winners screen, you can view and receive voting results to designate award winners. There is no need to update each award individually. Racing Add a chatty message if master master is enabled, if the user wants to race by group. Master Scheduling must be disabled in such cases. Standings Ignore exclude feature when viewing group standings and all riders in that group are excluded. You may want to exclude all riders (like adults) from the lap standings, but still want to see the standings for that particular group. Serial Timer Adds support for transport returns and line feed characters (\r and ) in messages and responses, if needed for custom timers. Some general improvements and other less well-known improvements are implemented. Screenshot of Version Change 19.0: To see a screenshot of GrandPrix Race Manager, click the image below to zoom in.
