A1: To compress your photos as much as possible, without loss of image quality, in the app select Zipx (best method). This compression method examines each file and selects the compression option that is most likely to provide the best compression results. Q2: I used WinZip to protect a folder with a password, but the list of files can still be displayed. Why? A2: Even if the files or folder is encrypted, the file names can still be displayed (but not the file contents). For this reason, we recommend that you avoid using confidential information in file or folder names. For example, avoid using account numbers or ID numbers (such as a Social Security number) in file or folder names. Q3: Why does WinZip Android need permission to access the Device ID and call information permission? A3: This general access permission is used to better understand device information when feedback is sent via email and for WinZip app coordination and tracking with Google.
