Affordable, High Quality, Integrated Health Care for All Hopewell Health Centers is a nationally accredited federally qualified health and community mental health center with 22 sites across nine counties in Ohio (Athens , Gallia, Hocking, Jackson, Meigs, Perry, Ross, Ross, Washington). Our philosophy is simple. We believe that the best way to wellness involves treating both the body and the mind. That's why we offer a wide range of primary care, behavioral health, and prevention programs and services. Whether you need medical, dental, or behavioral health care, our caring staff is here to help you. Dental Available in Meigs, Vinton, Perry, Ross, and Athens County HHC offers a full range of dental care at our Meigs, Vinton, Perry, Ross, and Athens clinics. Primary Care Available in Athens, Hocking, Meigs, Perry, Ross, and Vinton Counties HHC offer high-quality primary care services for everyone, regardless of ability to pay. A Department of Health and Human Services, Public Health Service Section 33 Community/Migrant Health Center grant supports access to primary care for the uninsured, underinsured and poor by subsidizing a sliding fee scale based on the individual's ability to pay. Pharmacy Services HHC offers both clinical and retail pharmacy services for its patients. There is a retail pharmacy in the Logan Primary Care clinic that is available to all HHC patients. Pharmacists are available to consult with all providers and patients of HHC. Early Childhood Program Help Me Grow (Athens County) HHC Offers Help Me Grow Early Intervention/Service Coordination Services in Athens County. Through this program, children aged 0-3 can receive a free development evaluation. Children who experience documented health or development concerns can also receive free service coordination and parent support. Early Childhood Mental Health Consultation (Athens, Hocking and Vinton Counties) For children younger than four years of age who experience behavioral problems, a specialized team is available to assess a child's development and function, and plan appropriate treatment strategies with parents or caregivers. Staff provide services in some kindergartens, Head Start Centers and day care centers as well as in County clinics and homes. Women Infants and Children (WIC) Nutrition Program (Athens and Perry Counties) WIC provides education and nutritional supplements for at-risk children from the age of five, and pregnant, postpartum, and nursing women. On average, WIC serves 1,800 customers in Athens county and 1,300 in Perry County in a given month. Athens County WIC is a member of the United Appeal for Athens County. Behavioral Health Services Are available in Athens, Gallia, Hocking, Jackson, Meigs, Vinton, and the Washington County Community psychiatric supportive treatment services for adult consumers who experience severe mental illness, child consumers who experience severe emotional disorders, or any consumer in psychiatric crisis and at risk of psychiatric hospitalization, CPST services (once referred to as case management) are available. These services may be at home, office-based, depending on the needs of the consumer. Helping to access essential community resources, including rights, housing and health care, learning adaptive daily life skills and understanding, and living with a mental illness are all part of CPST services. CPST providers help the consumer with treatment planning and crisis management. Communication and connection to family members and significant others (with client privileges) are also important parts of CPST Service. CPST services differ according to the needs of the consumer. CPST providers are advocates and brokers of services. Their goal is to help the client maximize their own potential and live productively in society. Outpatient Counselling Services Diagnostic assessment, individual, group, family and marital counselling are available as needed. The services are designed to be concise and solution-focused in nature. Our goal is to help our clients identify and mobilize their own coping skills and natural support as well as learn new skills and ways to manage their environment. The goal of treatment is not the resolution of problems in itself, but rather the improvement and development of skills to enable the customer to engage in effective problem solving once out of the office. The estimated duration of treatment for most individuals is six sessions. However, we recognize that not all situations are suitable for short treatment, and we try to provide appropriate, and efficient, as well as cost-effective, services to all individuals. HHC has counselors who are specially trained to deal with trauma, including physical and sexual abuse. Groups are also available to help clients develop skills in areas such as anger management, addiction recovery, relationships and managing skills. Emergency services emergency response and hospital prescreening services are available face-to-face or over the phone (where applicable) 24 hours a day, 365 days a year. Crisis Intervention Team (CIT) workers evaluate individuals in psychiatric crisis and enable them to receive appropriate services (e.g. hospitalization, crisis housing services, CPST or outpatient counseling,). Evaluation sites include agency facilities (during business hours) and local emergency departments. Cit services can be accessed during working hours through all behavioural health clinics and 24 hours a day through the Crisis Service telephone line (1-888-475-8484 or in Athens 593-3344). School-based services In several school districts throughout our service area, HHC has counselors and CPST providers working in schools to provide services to young people. The eligibility criteria are the same as for clinic-based services, but school-based services are often more practical for consumers and allow for greater involvement from Intensive home-based treatment counsellors and CPST providers trained trained Intensive Home-based Treatment work with families experiencing severe difficulties. This endorse-based practice supports families in developing new skills and healthier relationships. Partial hospitalization / REACH HHC's REACH program provides day-long treatment (Monday - Friday) for children who experience severe emotional problems and have difficulty functioning successfully in their schools, families and communities. Programming involves pedagogical, individual and group counselling, individual and group CPST, behavioural management and competence building. Daily training is provided by the Athens-Meigs Training Service Centre. Transportation to and from home is provided. A psychiatric medical provider meets children every week on site (as needed). Separate treatment environments are provided for younger (7 - 11) and older (12 - 17) children. Psychiatry Although many individuals receiving behavioral health care are treated with counseling or CPST alone, there are some problems that are more effectively treated with a combination of counseling or CPST and psychiatric medication (or with medication as the primary procedure). Severe depression, other mood disorders, many anxiety disorders and thought disorders are examples of these problems. When needed, counselors and CPST providers can discuss the usefulness of an evaluation for psychiatric medication with their clients, and if the client agrees, a referral will be made to one of our clinic psychiatrists or Advanced Practice Nurses (APRNs). In severe or complicated cases, the practitioner will continue to follow the course of the medicine. In less complicated cases, when the client's medication is stable, efforts are made to return the client to his/her family doctor to follow the medication. It is understood that consultation with or referral back to a clinic psychiatrist is always an option if the client's status changes. Addiction Outpatient Programming for Adults and Children (Varies by Location) HHC is certified by the Ohio Department of Mental Health and Addiction Services (ODMHAS) to provide addiction treatment services. SAMI (Substance Abusing Mentally Ill) Court (Athens Only) In cooperation with law enforcement in Athens, Hocking and Vinton counties, HHC has developed a prison diversion program for severely mentally ill adults. If law enforcement encounters people who engage in nonviolent misdemeanor behavior or are at risk of doing so because of symptoms of mental illness, they are able to bring the person to the Reprieve Crisis Center, where the person can be visited for up to 24 hours for observation and referral for treatment if necessary. Fees can be submitted, but this is not mandatory for participation. This program provides an alternative to imprisonment for mentally ill people and also allows law enforcement to the consumer is quickly returned to patrol in a very short time (an average of about 10 minutes). Medication Assisted Treatment Hopewell Health Centers provides medication assisted treatment (MAT) utilizing the drug Vivitrol. Vivitrol, a long-acting injectable version of the drug Naltrexon, was chosen as a more profitable alternative to Suboxone (Buprenorphine), which has been shown to have addiction potential, and is often traded for other street drugs or sold for cash. The Vivitrol Program is unique and consists of several core functions. First of all, it occurs in conjunction with an already successful drug court that has been certified by the Ohio Supreme Court. While participants in the program experience legal problems, they also have serious mental needs, lack of employment and transportation, are in overall poor health, are often homeless, and lack a recovery or pro-social support network. The project is designed to address all these needs and provides participants with important wraparound services such as mental health and substance abuse treatment, case management and health care as they progress through the four-phase, twelve-month program. Transportation HHC has case aides/drivers who can provide transportation to behavioral health appointments (Athens, Hocking and Vinton counties, only). Outreach and registration Available in Athens, Gallia, Hocking, Meigs, Perry, Washington, Jackson, Ross and Vinton Counties Hopewell Health Centers have Certified Application Advisors who can help consumers with applications for qualified health plans in either the Health Insurance Marketplace or with Ohio's expanded Medicaid program. This is a free public service. Call one of our clinic locations to schedule an appointment. Go to Healthcare.gov Find local help for more information. Access to affordable, high-quality, integrated healthcare for all
