

Kinneret Academic College newsletter #2

During the program the students are doing research assignments in different topics. In these photos students are working in their research: basil with mycoriza (1), green onion with mycoriza (2), red grapefruit economics (3), red palm weevil monitoring in dates (4), Iris flower research (5), dry onion research (6).

1. Masada farm students harvesting basil

2. Shaar hagolan farm students measuring onion

3. En harod farm students research - Red grapefruit

4. En hanaziv farm students in dates

5. Izik&Berko farms students monitoring Iris flower

6. Neve eitan farm students in onion field

Special visit in college

Last month we had honor visits in our college:

1. Ambassador of South sudan entourage arrived Kinneret college to meet the S. sudan's students. After college the entourage went to Zemach research farm to see and impress the students' activities at the farm.

December holidays

Month of december holds beautiful holidays for both Jews and Christians:

1. We celebrated in class "Hanuka" holiday. We lighted candles in the Menora, said the prayers and sang the songs of the holiday.

Students also got the taste of the holiday by eating "Sufgania" (Doughnut).

2. Our students went to celebrate christmas in Jerusalem and Bet lehem.

The students visited the big mass and the holy city.

Practical class in Zemach research farm

Every month we visit the research farm in Zemach to complete the theory classes we take in college:

1. The students visit banana packing house. Students from Nepal, Malawi & S. sudan do practical training in this farm.
2. two months ago we sowed seeds of different vegetables and now they are ready to be planted in the field.

1. Visiting Zemach banana packing house

2. Planting vegetables in the field

3. We visited a dairy farm. Learned about the milking parlour and the food supply of the cows.

3. Visiting dairy parlour

4. Dairy farm food nutrition

5. The students learned about different parts in irrigation. How to connect and build irrigation head.

6. We teach the students the importance of the soil. The students get tools how to know and analyse their soil and from the findings to know how much to fertilize.

5. Soil analysis methods

6. Connecting irrigation
