proxy between your computer (smartphone, tablet, etc.) and the Internet. As a VPN, the proxy service changes your IP address. In this post, we have listed some of the best proxy sites and reviewed the list of the best free proxies... Find them!! If you're looking for a VPN service, you've probably already encountered various proxies. The best proxy sites work in the same way as VPN services, but there are differences on which their effectiveness depends. Both a VPN and a proxy server change the location of your Internet connection. Nevertheless, they do it in completely different ways and also offer different confidentiality, data encryption and user anonymity. The proxy server acts as an intermediary between your computer (smartphone, tablet, etc.) and the Internet. As a VPN, the proxy service changes your IP address. For example, let's say you live in England and want to watch a video on an American website. You can use a proxy server to simulate an American address and access this content. In this situation, you have almost no risk, you do not need encryption. Another example: you went to a site through a server in the zone where the ticket price is lower (yes, airlines actually sell tickets for something cheaper than you). It is also important to know that proxy services are installed for each application separately, and not for all computer software at the same time. This means that you need to configure the torrent client and browser separately to connect to the proxy server. In this case, the VPN encrypts all applications that work with the Internet during the installation process, that is, it works with all the software on the computer. Proxy servers do NOT verify your Internet connection. Such a service can mask your actual IP address, but it does not delete the credentials of the submissions, that is, such a server does not have built-in tools to protect users' privacy. Therefore, a proxy server is not the best solution, for example, for those who are trying to protect their personal information and are connected Moreover, when a user encounters Flash or Java scripts, their actual IP address is easily Don't forget that many IP addresses of widely used proxies have already been compromised on many websites and blocked. Features of the list of proxy sites: - Unblogging all blocked websites - Hides your IP address from internet traffic through our anonymous proxy servers - Remove website, like Facebook, Google, YouTube, Twitter, Wikipedia at work, school, while traveling ...- The browser web proxy supports another video - No need to configure or install a proxy - Unblock Sites, incognito browsing, very fast and secure, completely free VPN proxy browser browser. 151 Best Proxy Sites List 2018: S.NO Name Website URL 1 ProxySite 2 FilterByPass 3 Hide Me Proxy 4 Anonymouse 5 Kproxy 6 BlewPass 7 Proxy Free 8 Quickproxy 9 4Ever Proxy 10 Proxy.org 11 Proxay 12 Proxify Web Proxy 13 Proxyserver 14 Freeproxyserver 15 Hidester.com 16 Proxay 17 Tubeunblock 18 Genmirror 19 Atozproxy 20 Surfmenow 21 Dolopo 22 Smartdnsproxy 23 Unblockytproxy 24 Nordvpn Proxy 25 Unblockweb 26 Awebproxy 27 Maddw 28 Proxyunblocker 29 Hiload 30 Zalmos 31 Yellowproxy 32 Proxtube 33 Notaproxy 34 Pandashield 35 Zacebookpk 36 Unblockvideos 37 Unblockbook 38 99proxy 39 vpnbook 40 Proxylistpro 41 whoer 42 My-proxy 43 Undofilters 44 Hidemebro 45 Toolur 46 Proxy-anywhere 47 Freeproxy 48 Instantunblock 49 Websurf 50 Proxysite 51 Homeproxy 52 Justproxy 53 Proxyone 54 Proxy 55 56 Proxyone 57 vpnbook Proxy Proxy 58 Crazyproxy 59 New-proxy-sites 60 Cyberghostvpn 61 Zend2 62 webproxy 63 Theclickcheck webproxy 64 Anonymster 65 vpn 66 Spysurfing 67 Proxybrowsing 68 Myunblocksites 69 Proxymesh 70 Proxyhub 71 Aniscartujo 72 Ocaspro 73 Yxorproxy 74 Proxyfor 75 Serverfriend 76 Unblockwebsites 77 Videounblocker 78 Unblockandsurf 79 Proxymesh 80 Proxy-deal 81 Vectroproxy 82 Boomproxy 83 Bypasser 84 Pxaa 85 Youtubefreeproxy 86 Caproxies 87 Xitenow 88 Proxy-hypo 89 Interncloud 90 Myproxy 91 Fiberprox 92 24tunnel 93 Ocaspro 94 Avoidance 95 Usafastproxy 96 sslpro.eu 97 Speedproxy 98 Proxysp 99 Unblockyouku 100 Proxify 101 Hidenseek 102 Quickprox 103 Metproxy 104 Unblockaccess 105 Allunblocked 106 Site2unblock 107 Unblockd 108 sslsecureproxy 109 Ninjaweb 110 Unblock-sites 111 Orangeproxy 112 Unblockblocked 113 ispunblock 114 Videounblock 115 Vidproxy 116 Unblock123 117 Surfproxyserver 118 Pinkproxy 119 Aceproxy 120 Ultimateproxy 121 Tomatoproxy 122 Iopana 123 Unblockfreeproxy 124 linkmetube 125 Proxycloud 126 Idolproxy 127 Unblockwebsite 128 Proxyload 129 2fastsurfer 130 Stopcensoring 131 Secretproxy 132 Xitesite 133 Sslpro 134 Fiberproxy 135 Proxite 136 Hidebuzz 137 Gizlibagland 138 Vload 139 Miniprox 140 Fastusaproxy 141 Newipnow 142 Yourcheat 143 Kproxy 144 Dontfilter 145 Zacebookpk 146 Quickproxy 147 Dzhot 148 Hidester 149 Fishproxy 150 Zendproxy 151 Ronfeed Proxy There are two types of protocols for proxies: HTTP and SOCKS. HTTP proxy servers: The oldest of the two http proxy types works only with network traffic. To use an HTTP proxy server, you must configure it in your browser settings (or find a browser extension if it does not initially support proxy servers), and then all network traffic passes through a remote proxy server. If you use a proxy server when using confidential information (finance or emails), you need to do this in an SSL-activated browser and connect to sites that support SSL encryption. As stated above, proxy servers do not encrypt data, which is why you have to do everything. SOCKS proxy servers: Socks proxy is an EXTENSION of the HTTP proxy system that can handle anything that passes through it from traffic, making it useful not only for applications such as network resources but also torrents. Unfortunately, socks works slower than HTTP, and this is especially noticeable if you download torrent files. The last thing to note is that not all proxy servers are as powerful, like VPN services. There are quite a few free proxy services that can benefit you, but our experience shows that when it comes to protecting your personal data, you have to pay for it on top of that. Free proxy servers (such as a VPN) are free for a reason: usually they have a short time of efficient work, are clogged with ads, and poorly protected against intruders. Here ends with a list of the best collections of fast proxy sites to help you access uninterested sites on the web. Hopefully, this list of the best proxies has given you enough information about the sites.
