Thematic pages of practice and teaching tools also focus on a wide range of linguistic arts and mathematical skills. Our reptiles and worksheet amphibians use a venn diagram to compare and contrast the characteristics of amphibians vs. baby reptiles in 3rd grade to 8. Free download below MatchCard Science Amphibians Vs Reptile Objective: Compare reptiles and amphibians. MatchCard: Download below. MatchCard Information Parts have features of reptiles and amphibians. Students place them in the correct location in the Venn Chart. This is MatchCard #4 of the zoology unit study. Find more information about MatchCard Science below. Characteristics of reptiles and amphibians reptiles and amphibians There is a reason why it is difficult to distinguish between amphibians and reptiles: they share many characteristics. These traits are true for both: Both are hatched from eggs both live on the ground some of the time (amphibians live on land and water - hence the name.) They both breathe air and have lungs. Both are cold-blooded both have teeth and can bite (watch out!) Both have greens. Yes, this last point may be a little obvious, but as students progress from the first to the last MatchCard of the Zoology Unit study, they gain experience with classification systems. So don't forget to point out that seemingly obvious out to them. In addition to all these features listed above, reptiles also have these unique characteristics: Covered with scales The outer surface is dry and rough front legs weak or not the front legs that require animals to crawl (don't jump snakes, fortunately) Babies look like adults, the same shape only smaller. Reptiles include friendly families, such as: Snakes Alligator Lizards and Crocodiles Turtles From microscopic protozoa to elephants and whales, learn more about animals on this planet with the MatchCard Science Zoology Unit Study. There are a total of thirteen zoology and MatchCards targets for this unit, which will take 6 to 8 weeks to complete. Top of this page 1 page| Notes: 1 - 7 or add to Google Calendar A worksheet highlighting which animals are reptiles and which are amphibians.
