Texas reality check occupations

a car in a car show picture by Gary from Fotolia.com The title is one of the most important documents that comes with owning a car. The title serves as proof of ownership, and is used to research the history of the car. All securities-related operations are done through the DMV in the state of Texas. All the information listed in the title -- such as vehicle ownership and sales history -- is usually accessible with the help of the DMV. Locate the Texas DMV in your area. Access the Texas DMV website to search local offices by county. Contact the office with your request for information about a title. All correspondence is usually done by e-mail, regular mail or in person. Fill out and return a VTR-275 form, the official application for information about a title. Access to title information is restricted to certain members of the public under the Texas Law of 2011. You must prove that you are the owner of the car, have written authorization from the owner or have access to the title satisfying other requirements found in the application. Other required information is the Texas license plate number of the vehicle, year, make, VIN and title document number. You must provide a form of photo ID issued by the government. Pay the application fee. The amount varies depending on the information you request, but must be paid by cheque or credit card. Cash is not accepted as a form of payment. Allow up to two weeks for an answer. They will either deny you your request -- or you will be given the title information -- after the waiting period ends. When performing a background check in Texas, it is important to pay close attention to state and federal policies and laws. The Equal Employment Opportunity Commission has a number of policies to follow in order to avoid lawsuits. In addition, employers must ensure that background checks are carried out for all job applicants themselves, ensuring that everyone is treated equally. When conducting a background check on an employee or job candidate, the employer must first receive a waiver form from the candidate. This form should state that the applicant authorises previous employers to publish information about him and his previous employment. The form also frees former employers from any damage that could occur as a result of the information being published. Submitting a supplement form to former employers, with the candidate's signature, performs better from a cold call asking for information. Employers tend to be very concerned about being sued for defamation when asked about former employees, so a background check can't reveal much beyond simply whether the candidate worked there and during what time period. Employers should only release information that is in good faith and true. In Chapter 103 of the Texas Labor Code, former employers are protected from lawsuits if they give out true information. However, are usually further protected by giving only information that has been thoroughly documented and can be proved in court. The job seeker must sign a release in order to have a criminal background check or a credit check run on him. The Fair Credit Reporting Act also requires that the applicant be given written notice if he was rejected for the job due to something in his credit report or criminal background check. Laws are stricter for employees to be sent to customers' homes to perform service at home, such as cable installation or other home repairs. In these cases, the Texas Civil Practice and Remedies Code requires a full criminal background check that covers 20 years for felonies and 10 years for misdemeanors in order to prove the employer was not negligent in his hiring process. According to the EEOC, a job candidate can be asked about previous convictions, but not previous arrests, unless the question is directly related to the job. Otherwise, questions about past arrests are seen as harmful to minorities. However, Texas employers should seek more than just convictions because alternative sentences, such as deferred sentence, can avoid a final conviction put on a person's record. To get around these issues, background checks and applications in Texas often include questions like whether the applicant was ever convicted of a felony or pleaded guilty or did not contest. It's only a matter of time before you wander around Dallas with a pistol shining on your hip. In a huge victory for gun rights advocates, Texas is expected to legalize open carry for handguns, strengthening the state's already solid protections of the Second Amendment. The Texas state legislature is preparing for a final vote on the measure sometime next week, and Gov. Greg Abbott is expected to sign it if the bill reaches his desk. According to the Dallas Morning News, the gun rights bill has already been overwhelmingly approved 96-35 in a preliminary House vote. A similar bill was also approved in the state Senate last month. Only a handful of Democratic lawmakers oppose the measure, which would grant gun owners the right to openly carry handguns basically everywhere except on the grounds of higher education institutions. However, Texan lawmakers are also trying to pass a separate bill allowing concealed carry on college campuses. Texas is just one of six states that explicitly prohibits the open transportation of although the state currently allows gun owners to openly carry their long guns, such as rifles. If enacted, HB 910 would grant those with a concealed carry permit to openly carry their handguns on a shoulder or belt holster in a public place. The bill would also implement all statutes that regulate concealed carry to open carry as well, essentially treating handguns in plain sight the same as concealed firearms. Bill Bill Images News/Getty Images With such strong support in the state legislature, the open transportation bill will undoubtedly be the law in Texas as soon as next week. A fervid supporter of Second Amendment rights, Abbott's website even includes a petition urging Texans to show their right to open transportation. Despite a legislature's intention to expand Second Amendment rights in the Lone Star State, there is also some vocal backlash among Texans who believe open transportation can be too dangerous or harmful, as well as a burden on private companies that cannot accommodate open transportation. Angela Turner, a volunteer with the Texas chapter of Moms Demand Action, one of the opposition group's leaders, said Friday in a statement: As a gun-owning Texas mom, I am ashamed of our Texas lawmakers who voted in favor of extremist interests and micropolitics instead of representing the majority of Texans who oppose the open carry of handguns. Even more troubling is our lawmakers passed HB910 without modifying signage, making a mockery of our private property rights and now our businesses will be forced to post two large and onerous signs to keep CHL holders from conducting openly on their premises. A recent poll conducted by the University of Texas at Austin in conjunction with the Texas Tribune found that only 22 percent of respondents believed licensed gun owners should be able to openly carry their hand guns. Another 45 percent of respondents said gun owners should only be allowed to have concealed carry pistols licensed, while just 10 percent believed gun owners should be able to carry a gun in public at any time without a license.
