Battle cats uber tier list 9.5

I made this post on reddit a while ago, so some of the y'all i might have already experienced. Basically, I tried to make Tierlist better than flabber, and that's what I've done so far - BCEN Better TierlistThe slightly Uber TierlistThe main problems with widely used Tierlist are: an undated bottom part that ranks Ubers in their collections inaccurately (and recently removed), a mockery of Uber ports, and some annoying format. So, in my Tierlist menu, I tried sorting Ubers more accurately by adding another level, colors for Ubers types, and some other things. In addition, I've added some different useful resources to Tierlist, so that it is more used for new players. Additionally, here is a list of priorities I've been working on - BCEN Priority ListIt'll show you from the first TV and which is not worth it for every rarity (and archaeological fruit), as well as who has the best NP upgrades. TL; Dr. - I had time so I decided to improve on the popular Tierlist with different things and should be more accurate with uber rating and be more useful to new players. I have also made a list of priorities to help yall find out who tf and where to spend np first. Page 2 54 like 54 in The Battle of cats!? Join the community. Get amino in the cat fight!? Page 2 18 Omg that one man who wasn't actually garbo in BC is commenting for the first time in like 3 months. Wowow he's actually a post, a real epic moment. So yes, I'll probably actually be active on amino, unless I don't, then oh well... I'm going to make another post like right after this with like one cool b.c. thing I've done since not being in here. I really don't have anything else to say, hi everyone who remembers me, here are some more of these: like 18 in the cat fight!? Join the community. Get amino in the cat fight!? Join the community. It is mostly made by Reddit classes MrFailology, Nurse Wuffa, Lucas IV and Deltaser99. The rules please discuss civil, do not attack anyone, especially Reddit as no one wants anyone to call the toxic/bad wiki / etc. Please note that ports do not mean everything. Please try not to blast your opinion on menus in one post; I suggest you comment part of the part, and wait for others to respond. Don't make yourself look unwanted. Editing is better than double publishing. Here is the actual Tierlist list. Blue highlights mean placements are in question. The methodology of this class list seeks to equally evaluate BCEN Uber rare units based on three different aspects: specialized, or how strong the unit is against specific types or in the stature of each of them (how good are Raiden vs. Rids, is its useful knockback, etc.), the value of the niche, or how important a specific niche in Meta (is a good kbbys? is a good capacity in meta at all?), general use, or how can the unit survive at a variety of levels that are not specialized. In terms of weighting, having a strong general use is the most valuable because it means a unit with good general use can be useful in many more levels than many which is only useful in its place. However, this does not mean a specialized unit will always be rated worse than a unit with strong general use, because the status of the unit can be very unique and valuable in meta, although the unit is not very useful in the majority of levels.
