Which term means abnormal softening of the nails

refers to the skin pertaining to the skin pertaining to the under the skin pertaining to the skin abnormality of the skin surgical repair of the skin abnormality of no sweat abnormality of excessive sweat abnormality of the death abnormality of nail fungus nail eating (nail biting) surgical repair of wrinkles abnormal ity of hair sponge Short Return to Set Details Term Definition adip / o: fat-cele: hernia, swellinghemia containing fat or adipose tissue Term Definition lip/o: fat-cyte: cell fat cell Term Definition steat/o: fat-it-is: inflammation of adipose tissue Term Definition cuttan/o: skin-ous: referring to topes pertaining to skin Term Definition dermat/o: skin-logist: specialist in study ofphysician specializing in the treatment of skin disorders Term definition derm/o : skinhypo-: under, below, deficient-ic: containing tounder or inserted under the skin, as in a hypodermic injection Term Definition hidr/o: sweataden: gland-it-is: inflammation inflammation of a sweat gland Term Definition sudor/o: sweat-esis: conditioncondition of profuse sweating Term Definition icty/o: dry, scaly-osis: abnormal conditionary of several dermatological conditions characterized by noninflammatory dryness and peeling of the skin, commonly associated with other abnormalities of lipid metabolism Term Definition kerat/o: tissue; hard; corneal-osis: abnormal conditionary state of the skin characterized by an overgrowth and thickening of the skin Term Definition melano/o: black-oma: tumormalignant tumor of melanocytes that usually begins in a dark pigmented mole and can broadly metastasize (black tumor) Term Definition myc/o: fungal osis: abnormal state of yeast infection in skin Term Definition onych/o: nail-malacia: softening abnormal softening of the nails Term Definition arrov /a: haired: nest-al: relating to the alternation of hair in a dermoid cyst or in a sinus opening on the skin Term Definition trich/o: hair-pathy: pathology: disease disease in the hair Term Definition scler /o: hardening; sclera (white of eye)-derma: skinchronic disease with abnormal hardening of the skin caused by the formation of new collagen Term Definition seb / o: sebum, sebaceous-rhea: discharge, flowincrease in the amount and, usually, a change in the quality of the fats secreted by sebaceous glands Term Definition squam / o: scale-ous: as skull: with respect to processed with scales; scalelike Term Definition xer /o: dry-derma: skinchronic skin condition characterized by excessive unevenness and dryness Term Definition pyl /o: pus-derma: skinany pyogenic infection of the skin Term Definition derm/o: skin-oid: similar to re-re-activating skin Term Definition dia: genome, across-phoresis: berry, transmission Term Definition dermat/o: skin-plasty: surgical repair surgical repair of the skin Term Definition cry/o: coldtherapy; treatmenttreatment using as a destructive medium Term Definition aden: gland-oma: tumorbeneign neoplasm in which tumor cells form glandular or glandlike structures (tumor consisting of granular tissue) Term Definition epi-: above or uponderm/o: skin-is: part of number (noun)outer layer or skin term definition derm/o: skin-is: part of speech (noun)deeper layer of Skin Term Definition derm/o: skin-pathy: diseaseskin disease Term Definition dermat/o: skin-it-is: inflammation of the skin Term Definition cutane/o: skin-ous: which takes up topertaining to skin Term Definition sub-: under, belowcutane/o: skin-ous: containing topertains that under the skin Term Definition derm/o: skin-ic, -al: pertaining to skin Term Definition melan /o: black-cyte: cellblack cell term definition dermat/o: skin-pathy: diseasedisease of the skin Term Definition adip/o : fat-ectomy: excision, removal excision of fat Term Definition lip/o: fat-ectomy: excision, removal excision of fat Term Definition onych/o: fat-oma: tumorfaty tumor Term Definition fat/o: fatusction removal of subcinous adipose tissue using a blunt-tipped cannula, suction applied (suction of fat) Term Definition dermat/o: skin-oma: tumor tumor of the skin Term Definition dermat/o: skin-plasty: surgical repair surgical repair of the skin Term Definition dermat/o: skin-logy: study of the study of skin Term Definition screech/o: curing-osis: abnormal conditionabnormal state of the hearth Term Definition system: body systemsa form of scleroderma that causes fibrosis and sclerosis of multiple organ system Term Definition kerat/o: tissue, hard-oma: tumora tumor Term Definition kerat/ o: tissue, hard-osis: abnormal state abnormality or tissue/tumors Term Definition/o : sebum (oil)-ous: applicable tooil-secreting Term Definition sudor/o: sweat-ous: applies toseaw Term Definition hidr/o: sweat-osis: abnormal state abnormal state of sweat Term Definition hidr/o: sweataden: gland-it-is: inflammation of sweat glands Term Definition hyper: excessive, above normalhidr/o: sweat-osis: abnormal condition of profuse or excessive sweating Term Definition an: withouthidr/o: sweat-osis: abnormal condition of sweating Term Definition myc/o: fungal osis: abnormal condition abnormal condition caused by fungi Term Definition derma/o: skinmyc/o: skinmyc/o: mushroom-osis: abnormally weak infection of the skin Term Definition trich/o: fungusermat/o: skin-it-is: inflammation of the skin caused by fungus Term Definition trich/o: hair-pathy: diseasedisease of the hair Term Definition trich/o: hair-osis: abnormal conditionabnormal state of the hair Term Definition trich/o: hairmyc/o: hairmyc/o: hairmyc/o: fungal-osis: abnormal condition of the hair caused by fungal Term Definition arrow / o: haircyst-ic: which applies todermoid cyst which Hair Term Definition Definition skin-oid: similar kind skin Term Definition onych/o: nail-oma: tumor tumor of the nail Term Definition onych/o: nail-pathy: disease Term Definition onych/o: nail-malacia: softeningsoftening of nail Term Definition onych/o: fungus-osis: abnormal conditioninfection of the nail caused by fungus Term Definition xer/o: dry-derma: skinexcessive dryness of the skin Term Definition lip/o: fat-cele: hernia, swellinghemia containing adipose tissue Term Definition adip/o: fat-cele: hernia, swellinghemia containing adipose tissue Term Definition albin/o: white-ism: conditionwhite condition Term Definition cyan/o: blue-derma: skinblue skin Term Definition erythr/o: red-derma: skinned skin Term Definition leuk/o: white-der ma: skinwhite skin Term Definition melan/o: black-derma: skinblack skin Term Definition xanth/o: yellow-oma: tumoryellow tumor term definition cyto: cell-logy: study ofstudy of cells Term Definition erythr/o : red-cyte: cell cell that is red Term Definition leuk/o: white-cyte: cell cell that is white Term Definition melan/o: black-cyte: cell cell that is black Term Definition xanth/o: yellow-cyte: cell cell that is yellow Term Definition leuk/o: whitecyto: cell-penia: decrease or deficiency abnormal decrease in white blood cells Term Definition xanth/o: yellow-emi: blood conditionoccurrence of yellow pigment in the blood (yellow blood) Term Definition xanth/o: yellow-oma: tumoryellow tumors Term Definition leuk/o: white-emi: blood state white blood term definition cyan/ o: blue-osis: abnormalconditionabnormal state of blue (skin) Term Definition erythr/o: red-osis: abnormal condition abnormal a state of red (skin) Term Definition moth/o: black-osis: abnormal state abnormal state of black (pigmentation) Term Definition xanth/o: yellow-osis: abnormal state of yellow (skin) Term Definition leuk/o : cycty/o: cell-osis: increaseincrease in white blood cells Term Definition erythr/o: redcyto: cell-osis: increaseincrease in red blood cells Term Definition carcin/o: cancer-oma: tumorcancerous tumor Term Definition necr/o: death-osis: o abnormally condition of death Term Definition auto: selfhyponosis or even self Term Definition auto: selfexamination of even self Term Definition dermat / o: skin-tome: instruments for cutting instruments to cut the skin Supportive users have an ad free experience! Java games: Flashcards, matching, concentration and word search. A comprehensive list of all vocabulary terms and words affixes by Santa Fe College's Medical Terminology Chapter 4 AB epidermisouter layer of skin keratinhorny or cornified layer consisting of protein; contained in the hair, skin, and nails melanin pigmentation of the skin dermisinner layer of the skin; also called true skin sudoriferous glandstiny, coiled, tubular structures emerge through pores on the skin's surface and secrete sweat sebaceous glandssecrete sebum into the hair follicles where the hair shafts pass through the dermis haircompressed, keratinized cells that arises from hair follicles naifolded on the upper surface of the ends of the fingers and toes and originate in the epidermis epi-on, upon, over intra-within para-beside, beyond, around per-through sub-under, below trans-through, across, beyond -anoun suffix -coccus/-cocciberry-shaped form of bacterium -ectomyexcision or surgical removal -idiseased or abnormal state, condition of -itisinflammation -malaciastragranceing -opsyview of or viewing -phagiaeating or swallowing -plastysurgical repair -rheaflow, excessive discharge -tomeinstrument used to cut cutane/o, derm/o, dermat/oskin hidr/osweat kerat/ohorny tissue, hard onych/o, ungu/onail seb/osebum (oil) trich/ohair aut/oself bi/olife coniolife crypt/ohidden heter/other myc/ofungus necr/odeath pachy/othick rhytid/owrinkles staphyl/ogrape-like clusters strept/o chainstwisted xer/oderdrymat itinflammation of the skin dermatoconiosisabnormal condition of the skin caused by dust dermatofibromafibrous tumor of the skin hidradentilitis of a sweat gland leiodermacondition of smooth skin leukodermaavita spots caused by depigmentation onychocryptosisabnormal state of a hidden nail (ingrown nail) onychomalacia scent ing of the nails onychomycosisabnormal state of a fungus in the nails onychophagianaail biting pachydermathickening of the skin paronychiadiseased state around the nail seborrheaeexcessive discharge of sebum trichomycosisabnormal state of a fungus in the hair xerodermadry skin (a mild form of a coetaneous disease characterized by keratinization and noninflammatory scaling) abrasive off of the skin by mechanical process or injury abscesslocalized collection of pus acneinflammatory disease of the skin involving sebaceous glands and follicles actinic keratosisa precancerous skin conditions of tissue are formed as a result of excessive exposure to sunlight. It can develop into a squamous albinismcongenital hereditary condition characterized by partial or total lack of pigmentation in the skin, hair and eye basal cell carcinoma (BCC)epithelial tumor arising from the epidermis. It rarely metastasizes but invades local tissue. It is common in individuals who have had excessive sun exposure. candidiasisan infection of the skin, mouth (thrush), or vagina caused by yeast-like fungus Candida albicans carbuncle infection consists of a cluster of boils caused by staphylococcal cellulitis of the skin and subcutaneous tissue caused by infection, leading to redness, swelling, and fever contusion injury without interruption of the skin, characterized by pain, swelling, and discoloration (bruise) eczema-sensitive, inflammatory skin characterzed by redness, blisters, scabs, and itching crack crack or crack-like sore in the skin furunclea painful skin node caused by staphylococcal bacteria in a hair follicle (boil) gangrenedeath of tissue caused by loss of blood supply followed by bacterial invasion-inflamed skin disease caused by herpesvirus characterized by small blisters in clusterimpetigosuperficiali skin infection, characterized by pustules and caused by either staphylococci or streptococcus infection invasion of pathogens in body tissues Kaposi sarcoma cancerous condition begins as purple or brown pimples on the lower extremities , which spreads through the skin to the lymph nodes and internal organs of the laceration tower, broken edge ulcers lesionary pathological change in tissue as a result of injury or disease, including wounds, ulcers, and tumors MRSA infection invasion of body tissue of methicillin-resistant Staphylococcus aureu pediculosis invasion into the skin and hair through lice psycophryth psoriasis crown skin condition produces red lesion covered with silvery scales rosaceachronic disorder of the skin that produces erythems , papules, pustules, and broken blood vessel scabbard skin infection caused by itch, usually accompanied by severe itching scleroderma disease characterized by chronic hardening of connective tissue in the skin and other organs squamous cell carcinoma (SqCCA)a firm, red, painless malignant growth that develops from scale-like epithelial tissue, usually caused by chronic sunlight systemic lupus erythematosus (SLE), a chronic inflammatory disease involving the skin, joints, kidneys, and nervous system characterized by periods of remission and exacerbations tineafungus infection of the skin (ringworm) urticaarian erupted consisting of wheals of varying size and shape; usually related to an allergy (hives) vitiligowhite patches on the skin caused by the destruction of melanocytes associated with autoimmune diseases biopsy (bx)removal of living tissue from the body to be seen under the microscope dermatoautoplasty repair using its own skin dermatoheteroplastysurgical repair using skin from other dermatome instruments is used to cut the skin into thin discs for skin graft dermatoplastysurglycic repair of the skin onychectomyexcision of a nail rhytidectomyexcision of wrinkles (facelift) rhytidoplastysurgical repair of wrinkles cauterization destruction of tissue with a hot or cold instrument, electric current, or caustic substance cryogery destruction of tissue by using extreme cold, often by using liquid nitrogen debriement removal of contaminated or dead tissue and foreign matter from an open wound dermabrasion procedure to remove skin scars with abrasive material excision removal by cutting incisionsurgical cut or wounds produced by a sharp instrument cut and drainage drainage incisions made to the free flow or withdrawal of fluid from a lesion, wound, or cavity laser surgery procedure using an instrument emitting a high-power beam of light used to cut; burning, vaporizing, or destroying tissue Mohs surgical technique by microscopically controlling serial excisions of skin cancer suturingstitching edges of a wound surgical dermatologist who studies and treats skin diseases dermatology branch of medicine that treats diagnosis and treatment of skin disease epidermalpertaining to the skin erythrodermaabnormal redness of the skin hypodermic pertaining to under the skin intradermal as refers to intra-skin keratogenic originating in tissue leukodermaskin machine of less color than normal necrosis abnormal state of death of cells or tissue due to disease percutaneous ly encutaneously referred to by skin staphylococci-shaped bacteria in grape-like clusters that cause skin disease st Forgiven bacteria in twisted chains to which the subcutaneous living tissue from the body to be seen under the microscope transdermal (TD)referring to through the skin unguapersa to the nail xanthodermayellow skin (jaundice) alopecia loss of hair bacteria-celled microorganism that reproduces by cell division and can cause infection by invading body tissue cicatrixscar cyst closed sac containing fluid or semisolid material cytomegalovirus (CMV)a herpes-type virus that usually causes disease when the immune system is impaired diaphoresisprofuse sweating echymosisescape of blood in the tissues; causes superficial discoloration edemapuffy swelling of tissue from the accumulation of fluid erythemaredness fungus organism that feeds by absorbing organic molecules from its environment and can cause infection by invading body tissue indurationabnormala hard place(s) keloidovergrowth of scar tissue leukoplakia condition characterized by white spots or spots on mucous membranes, which may be precancerous maculeflat, colored stain on the skin naevuscircumscribed pigmented area present at birth (a mole or birthmark) nodule small knotlike mass that can be felt by touching pallorpaleness papulesmall, firm skin height (pimple) petechiapoint skin bleeding pressure ulcereroded sore on the skin caused by prolonged pressure, often occurring in bed-ridden patients pruritussevere itching purpuradisorder characterized by bleeding in the tissue , gives the skin a purple-red discoloration pustulelevation of skin containing pus ulcereroded sore on the skin or mucosa verrucacircumscribed cutaneous elevation caused by a virus (wart) vesikelit elevation of the epidermis containing liquid (bladder) viral agent whealtransitory, round, itchy height of the skin with a white center and a red area
