Bissell powerforce helix filters

future orders.) overview test results deals with discussions about Vacuum type consisting of bagless Yes Wireless No Allergy Filter (HEPA) No The BISSELL PowerForce Helix 2191 is a wired consisting vacuum. It provides excellent performance on the carpet and is quite decent on the bare floor. In a vertical vacuum, it is also quite light, which makes it easy to carry different rooms in your home. However, it doesn't have a rotating head, so it can be difficult to manoeuvre in tight spaces and its range is disappointingly short. It has a mediocre construction quality and there are a few parts that need continuous maintenance. That being said, it has a semi-manual configuration that helps you get into crevices or hard-to-reach areas, which makes it a little versatile.geneual. 6.8 Bare Floor 7.7 Low Pile Rug 7.6 High-Pile Carpet 8.7 Pets 5.5 Stairs 6.5 Cars Sort category — — RATING Bare floor low pile carpet high-pile carpet góicse katscars category All Design Performance Automation The BISSELL PowerForce Helix mediocre construction quality. It's made of hard plastic, but in some places it looks weak, like two wheels or a brushroll plate. The dirt compartment also looks fragile and can break if it's dropped. Before use, you need to connect the handle to the body of the vacuum cleaner with two screws, which is not very convenient. Unfortunately, the brushroll does not stop spinning when the vacuum is on, so if you want to put it in the upright position and the head is not high enough, it can damage the floor. Fortunately, there's a head adjustment disc on the vacuum head. This it is quite easy to maintain. Dirt rekeben: The dirt pocket is easily or cut out of the vacuum. The cyclone connects to the top casing and you twist it. You can also access it through the bottom of the dirty compartment if you don't want to remove the top cover. Depending on use, dirt should be emptied and cleaned from time to time. The cyclone can be cleaned with warm water and a mild detergent if necessary. Brushroll: The brushroll is removed by removing six Phillips screws and a brushroll plate. From here, you can pull out or cut the hair tangled around the brush if necessary. You can also remove the brushroll belt if you want to check if this part is damaged. Pre-motor filters: There is a foam filter located in the dirt square top casing. If necessary, it can be washed with warm water. Before re-use, air-dry the parts washed with water for 24 hours. Bag part number No bag Filter part number 1608225 HEPA filter part no HEPA filter Bissell PowerForce Helix Bagless has one main recurring cost: the filter in front of the engine. This part should be replaced every six to eight months, depending on how often you clean it. The pre-engine filter also comes in a Febreze-scented version. You can buy a replacement belt drive if you get injured or breaks, which is nice. Height 43.50 in (110.5 cm) Width 13.39 in (34.0 cm) Depth 14.76 (37.5 cm) Cord Storing/Management Manual On-Board Tool Storage Yes vacuum rack/station no BISSELL PowerForce Helix has decent storage capabilities. Although it takes up a little space, you can store your devices directly on the body of the vacuum. Dirt Compartment Volume 0.40 gal (1.50 L) Full Dirt Compartment Indicator Yes Bag Contains No Bag Needed A BISSELL 2191 Good Size Dirt Reke. It's made of pure plastic and there's also a line that indicates when it's full, but overall it's a bit weak. Although it advertised holding up to 1L of debris, we measured 1.5L when it was filled with rice. Vacuum head/body Vacuum handle Dirt holder Internal cyclone crevice tool Extension rod Soft bristle turbo brush Lower cable wrap Filter cover Pre-motor filter (foam) User manual Cord length 22.97 ft (7.0 m) Hose length 3.48 ft (1.06 m) This vacuum is in a disappointing range. Although the power cord is quite long, the hose is very short, even if it is stretched out. Total weight 10.36 lbs (4.70 kg) Weight In hand 1.63 lbs (0.74 kg) Carrying handle Yes The BISSELL PowerForce Helix has great portability. It's lighter than the BISSELL CleanView Swivel Pet and has a carrying handle, making it even easier to transport. Minimum battery life N/A Maximum battery life N/A recharge time N/A recharge dock No battery life indicator no removable battery No This vacuum does not have a battery. Rotating head No power setting No self-propelled no headlights not easy on/off Yes Surface adjustment manual The BISSELL Helix has some extra features to make cleaning easier. On the back of the vacuum there is an on/off switch and a vacuum body/head release latch, so you can place your head in a more comfortable position. There's also a surface type setting dial with five settings ranging from I (which is best suited for bare floors and low fluffy carpets) to IIIII's large fluffy carpet. You can easily adjust the dial if it is difficult to push the vacuum. Keep in mind that the brushroll rotates continuously, even if it is placed vertically and can damage the floor if not raised. Brushroll Yes Brushroll On/Off No Replaceable Brushroll Yes Turbo Brush No Slot Tool Yes Upholstery Tool No Soft Bristle Brush Yes Hard Bristle Brush No Extension Wand Yes Ceiling Fan Tool No Pet Grooming Tool No The BISSELL PowerForce Helix comes with a couple of extra tools to help you more clearly. The slot tool is stored inside the extension stick, and there is also a soft bristle brush that cleans finer objects such as lampshades. This vacuum can also be used in a semi-held position with the wand and soft gap brush attached. Pet Hair at 0 gal (0L) 100 % Large Debris 0 gal (0L) 87 % Large Debris 0.07 gal (0.25L) 87 % Large Debris 0.2 gal (0.7 5L) 87% Large Debris 0.4 gal (1.5 L) 88% large debris at 0.8 gal (3L) N/Large debris 1.6 gal (6L) N/A small debris et 0 gal (0L) 88 % small debris 0.07 gal (0.25L) 88 % small debris 0.2 gal (0.75L) 89 % small debris 0.4 gal (1. 5L) 89 % small debris 0.8 gal (3L) N / Small debris 1.6 gal (6L) N / A setting used dial set bare floor I The BISSELL PowerForce Helix is decent on the bare floor. It's able to pick up all pet hair and most small and large debris. However, since the vacuum brush roll always rotates, it can send debris in different directions, meaning it can take a few extra passes to completely clean up the clutter. If you want a vertical vacuum with a slightly better performance bare floor, consider the Hoover WindTunnel 2 Whole House Rewind. Pet Hair at 0 gal (0L) 100 % Large Debris 0 gal (0L) 86 % Large Debris 0.07 gal (0.25L) 86 % Large Debris 0.2 gal (0.7 5L) 86% Large Debris 0.4 gal (1.5 L) 86% large debris at 0.8 gal (3L) N/Large debris 1.6 gal (6L) N/Small debris et 0 gal (0 L) 93 % small debris 0.07 gal (0.25L) 92 % small debris 0.2 gal (0.75L) 91 % small debris 0.4 gal (0.75L) 1.5L 89% Small debris 0.8 gal (3L) N / Small debris 1.6 gal (6L) N / The setting used dial setting bare floor I The BISSELL PowerForce Helix crack the low pile carpet. Just like the performance of the bare floor, you can pick up all your pet hair. Relatively easily able to absorb most small and large debris. Pet Hair at 0 gal (0L) 99 % Large Debris 0 gal (0L) 63 % Large Debris 0.07 gal (0.25L) 63% Large Debris 0.2 gal 63 % Large Large at 0.4 gal (1.5 L) 63 % Large Debris 0.8 gal (3L) N / Large debris 1.6 gal (6L) N / Small debris at 0 gal (0L) 76% Small Debris 0.07 gal (0.25L) 75% Small Debris 75% 0.2 gal (0.75 L) 71 % small debris 0.4 gal (1.5 L) 65 % small debris 0.8 gal (3L) N / Small debris 1.6 gal (6L) N / A setting used in dial setting III the BISSELL PowerForce Helix is great for large piles of carpet. It easily picks up pet hair, and although it doesn't pick up so much small or large debris compared to its performance on low-pile carpets, it still picks up over half of this debris. True, you can also adjust the vacuum surface type to better suit the carpet level, which can improve high stack performance, but mileage can vary. The Couch Bad under Low Table Bad On Furniture Good Carpet Tassel Bad Electrical Cables The BISSELL PowerForce Helix 2191 has sub-par maneuverability. Since there is no rotating head like Kenmore Intuition Bagging, you need to make larger movements to navigate the space. It can be difficult to get under tables or chairs, as the dirt is bulky and can get in the way. Although it is easier to clean the furniture when using the hose, the vacuum can overturn or the brush roll can be gripped on the carpet. Unlike the Hoover WindTunnel Tempo Bagged, which is a brushroll that can be turned on and off, rug fringes can jam the BISSELL's brushroll and move it around. Note that the vacuum brush roll rotates continuously when vertical. The head should be placed in a higher place so that the floor is not damaged. Changing the head level can be a little uncomfortable as you need to squat to hit the dial. Remote Control No automatic bag emptying no automatic reload no scheduling programming no limit markers No Random Pathing No Smart Pathing No App Name No App The BISSELL PowerForce Helix has no automation features. Bissell PowerForce Helix 2191 can be advertised as an updated and improved version of the BISSELL PowerForce Helix 1700. However, since the manufacturer has not publicly listed updates to this version of PowerForce Helix, we don't know if the 1700 version performs differently than our test unit. If someone encounters another version of the vacuum, let us know in discussions and we will update the review. BISSELL PowerForce Helix is a wired vertical vacuum that can be used in a one-handed configuration. While it doesn't perform as well as the straight Dyson Ball Animal 2 vacuum and doesn't come with as many tools or brushes, it delivers excellent performance on low and high fluffy carpets. BISSELL PowerForce Helix is a better vertical vacuum for carpets than the BISSELL CleanView Swivel Pet. PowerForce Helix delivers better performance on low and high fluffy carpets, lighter, and dirt brushes larger. That's it, that's it, easier to maintain and less recurring costs. However, the CleanView has significant better performance on bare floors, and comes with a couple more tools and brushes than the Power. Bissell PowerForce Helix is a better, full vertical vacuum than the BISSELL Pet Hair Eraser Turbo Plus. PowerForce has a larger dirt holder, lighter, and offers better overall performance on bare floors as well as low fluffy carpets. It is also easier to maintain and has less recurring costs. However, the Pet Hair Eraser is better built, comes with an upholstery tool as well as a turbo brush, and it's more mobility. The BISSELL PowerForce Helix is a better vertical vacuum for low and high pile rugs than the Hoover WindTunnel 2 Whole House Rewind. BISSELL delivers significantly better performance on the carpet, is lighter and has slightly larger dirt. However, The Hoover performs a little better on bare floors, is easier to maintain and has virtually no repetitive cost. Hoover also has an automatic cable storage. Dyson Ball Animal 2 is a better, full vertical vacuum than the BISSELL PowerForce Helix. Dyson delivers better performance on all surface types, is significantly more maneuverable, easier to maintain, and has virtually no recurring costs. It also has a longer range and it comes with more tools and brushes. However, the BISSELL is lighter and has a slightly larger dirt compartment. Bissell PowerForce Helix and Hoover WindTunnel Tempo Baged each have their own strengths. BISSELL has a lighter bagless design that has lower repetitive costs and cleans more debris on both low and high fluffy carpets. That said, the Hoover is better built, maneuverable, and easier to maintain. It also comes with several tools and does a better job of bare floors. Bissell PowerForce Helix and kenmore intuition Bagging have different advantages and one is more suitable for you according to your needs. Bagless BISSELL has lower repetitive costs, lighter design and performs better on low and high fluffy carpets. Meanwhile, Kenmore is better built, easier to maintain, and performs better on bare floors. It's a little maneuverable, too. Bissell PowerForce Helix is a better vertical vacuum than the Sanitaire PROFESSIONAL Straight. BISSELL has a better design without a bag and is more portable. It also delivers significantly better performance on all surface types. However, Sanitaire has a better range and is easier to maintain. The Miele Dynamic U1 PowerLine is a better vertical vacuum than the BISSELL PowerForce Helix. The Miele is more efficient at clean all kinds of debris from bare and carpeted floors, with a much more stable feel, easier to maintain, and more maneuverability to offer in tight spaces. also comes with several special cleaning brushes. It is true that Bissell is maintained and much easier to hold. + Show multiple
