Product and Covered Version Revit LT 2020 By: Help In Product View A set of design options is a set of possible solutions to a specific design problem. Each set of design options contains one main option and one or more sub-options. For example, you can create a set of design options to display different designs for the building's entry. You can create another design option set for alternative roof configurations. Each set of design options contains one main option and one or more sub-options. Video: Set up Design Options To create a set of design options Click Manage Design Options tab (Design Options). In the Design Options dialog box, under Options Set, click New. By default, Revit LT names the new Set 1 option set and creates a main option in the set. To rename the option set, select the option set name, and under Option Set, click Rename. Type a name and click OK. Type a name and click OK. Click Close. You can now edit the main design option to add elements to it and create sub-options for the design option set. See Edit design options and Add one or more sub-design options. By default, the project view shows the main model with the main option for each group. If you want the project view to show only the main model, with no design options, see View Main Model without Design Options. To see a list of design options and design options specified for the project, click the Design Options drop-down list on the status bar.
