The first is the Build stage at this stage involves building your village, modernizing your resources such as gold coins and elixir, which are the main currencies used in the game. As the village becomes more progressive, you get the privilege of building new buildings, and you can also find new tools to build your own strategies. You are supposed to conserve your resources to use them for further development when you reorganize or when you need new tools. Defending your village is also part of the village you can. You should create defenses, and then you can be on the safe side when they attack. You also have to protect your village from enemies that give you more time to reflect and reformulate your strategy. Operating mode has 2 modes in this unified and online mode. If you choose one mode, you will have to put up against a strong opponent to learn more about the game and the new strategies that can be used. It is harder to win and get an elixir as you progress from one base to another. Attacking another village is the most fun and interesting part Games. You have to place your soldiers in suitable places But be careful after you place them, you can't control them, you aim to destroy as much as possible, which will help earn more trophies. Something more about the game: clans are formed when some players unite and support each other in wars. You can donate to groups and ask for help from clans that you are part of. The next day is the day of the attack, where you have to destroy the enemy bases as much as possible and you get more stars. After all, which team has the most stellar wins in wars. In Builder Base mode, in this mode, players are expected to go to the island where they build a village, strategize their defenses, and attack and reorganize their forces. Two players can attack each other, the players that cause the most destruction wins the game. There are two types of barracks; they are used to create troops. Two types of factories articulate a normal elixir, and others articulate the dark elixir. Happy Trinkets Look Out: Players can spend more gems to speed up time inside the game.
