Scaffolding, ladder and Rigging7. Plans, specifications and codes8. The layout of the building9. Foundations and foundations10. Under Framing11. Wall and ceiling framing12. Roof Framing13. Framing with Steel14. Roofing materials and methods15. Windows and exterior doors16. Finish17 outer wall. Thermal and sound insulation18. Interior wall and ceiling Finish19. Finish flooring20. Construction of staircases21. Doors and interior trim22. Cabinet23. Painting, finishing and decorating24. Chimneys and fireplaces25. Post-and-Beam Construction26. Systems built housing27. Green Building and certification programs28. Refurbishment, renovation and repair 29. Deck construction and porches30. Electrical wiring31. Plumbing systems32. Heating, ventilation and air conditioningWillis H. Wagner - was professor emeritus for the Department of Industrial Technology at Iowa State University. Wagner holds a bachelor's degree from Central Missouri State University and a master's degree in science from the University of Missouri. He worked in the industry as a drafter and woodworker, and taught in high school and collegiate levels. Mr. Wagner was a member of IAITA and ITEEA, and an honorary member of the Waterloo Technical Society.Howard Bud Smith - he spent most of his career as a magazine and textbook editor. He also worked as a carpenter for several years while receiving his Doctorate in Journalism from Marquette University. Mr. Smith has published articles in various magazines throughout his career. He's retired at the moment. Mark W. Huth - brought to modern joinery a lot of experience of construction education from multiple perspectives. In addition to working as a carpenter and contractor, he worked as a carpentry instructor and as a consultant to both high school and post-end educators. Mr. Huth also wrote textbooks in the fields of reading construction printing, building principles and construction mathematics. Scheduling Tools: Framing Square; Chalk box and line; Vis and clamps; Hand toolsSeaming goals: Identify the safety equipment a carpenter should wear to protect his eyes, arms and legs. List twelve common layout tools mentioned in this lesson. Describe how to check the accuracy of the frame square. to get the hand tools you need as a carpenter trainee. Popping up on the features you should look for when buying your own toolbox. Chapter 2: Carpenter's Power ToolsTopics: Power Tool Safety; Circular, saber and repaid saw; Drill and plane; Routers; Sanders; Nailers and tackers; Powder tools Learning goals: Specify the twelve safety rules for power tools mentioned in this lesson. Explain how to properly mount a new blade in a circular saw. Tell me how to start and finish the incision with a circular saw. Describe how to safely drill wood with a drill. Tell how to shape the edge with a router. Identify the three steps involved in grinding the surface with the finishing grinder. Chapter 3: Wood, Wood products and fastenersTopics: Hardwood against softwood; Sizes of timber, grades and disadvantages; Moisture content; Mill work; Plywood; Hard and particle; Put-away; Nails; ScrewsLearning Goals: Describe the difference between the actual and nominal dimensions of the timber. Say that defects such as checks, knots and conveying limit the value and use of lumber. Explain how drying timber in the stove gives different results from air drying. Indicate the differences between the solid core and the veneer of the plywood core. Describe the construction and use of the ice sheet. Compare the usual nails, nail casings and finishing nails. Specify the information you must provide to the supplier when ordering wooden screws. Chapter 4: Carpentry Cost EstimationTopics: Commissioning Materials; Reduction and use of waste material; Material bill; Preparation of cost estimates; Tips for organizing the taskManging goals: Explain the difference between foot panels and linear foot timber. Describe the relationship between the bundle and the squares of the roof shingles. List the information contained in the material account. Specify the factors you need to prepare an estimate of your work costs at work. You show some things you have to do before you start work, so the work goes smoothly. Chapter 5: Plans, specifications and codetopics: Reading drawings; Dimensions in drawings; Symbols in drawings; Arrangement of equipment; Building laws and permits; Zoning LawsSad goals: List the building features you'll find in terms of plan and altitude. Show how to use the architect scale and designs. The list includes at least four features of the building whose details are contained in the specifications. Explain why building codes are needed in the construction industry. Describe the information you need to provide to obtain a building permit. by Leonard KoelHardbackISBN13: 978-08269080946th Editionby Floyd VogtHardbackISBN13: 978-11336073666th Editionby Willis H.
