Fine Print, Legal Stuff and other info. What is RUNESCAPE? RuneScape is a Massively Multiplayer Online Role-Playing Game (MMORPG) created by Andrew Gower and operated by Jagex Ltd. Like other MMORPGs, RuneScape is a computer generated role-playing games that allows huge numbers of players to meet and interact in a virtual fantasy world. Other well-known MMORPGs include World of Warcraft and more loosely, SecondLife. RuneScape uses the medieval theme dungeons and dragons. Here, players can fight computer-generated monsters such as demons, giants, and dragons, or players can fight other players in limited combat games or anywhere in the RuneScape landscape on special player-versus-player worlds. In addition to the battle, players can train different skills, such as cooking, fishing and crafting. Players can also participate in special quests, mini-games, or other community activities. Finally, for the more financially minded people, players can try to get rich within the virtual world by studying and investing in the RuneScape economy that is affected by millions of player transactions every day. When it comes to unofficial data, if research proves contradictory, we go ahead of the values that RuneScape Wikia suggests. This program is a simple tool that will use the Fish Wax FC forum post and calculate the winnings for each rune combination to use for the Rune Goldberg Machine. It extracts the data from the large exchange and forum/forums.ws?75,76,331,66006366 Download Sample output Gives the date The slots for group 1 and group 2 Each rune in a group gives the number of points for using that rune, followed by profit/loss Running viswax.exe Fish Wax for Saturday 19--.exe Slot 1: Group 1: Group 1 1: - Blood: 30 51K - Earth: 27 208K - Note: 26 183K - Air: 22 158K Slot 2: Group 1: - Mud: 1 30 4 2K - Earth: 25 191K - Air: 24 175K Group 2: - Earth: 30 234K Group 3: - Death: 30 197K - Water: 26 195K Slot 3: - Random: &l;=40 - Earth: 319K - Water: 314K - Air: 311K - Mind: 302K - Dead : 282K - Chaos: 279K - Body: 268K - Fire : 268K - Law: 234K - Astral: 223K - Nature: 187K - Soul: 185K - Cosmic: 1 79K - Blood: 136K - Mud: 127K - Dust: -17K - Lava: -60K - Steam: -73K - Mist: -73K - Smoke: -79K Press 'Enter' to continue... Share Goldberg diversions here. See Wizard Goldberg for the Goldberg Wizard. This article has a money making guide here. Add tips to the subpage, instead of the article below. This repeatable content has a hard reset. The content of the next period will become available immediately, regardless of whether a player is logged out. The Rune Goldberg Machine is a distraction and distraction in which the Rune Goldberg Machine, invented by Wizard Goldberg, turn into fish wax, a substance with a variety of effects. It is located in the eastern part of the Runecrafting Guild, making it a requirement of 50 Runecrafting access. This activity cannot be reset by a D&D token. It also does not reset when a player is not a member. If a player completes the activity before their membership expires and rejoins later, he/she must wait for the next reset before the machine can be reused. Operation The interface when operating the machine The Rune Goldberg Machine accepts three different rune types at once, with a different value assigned to each rune. These values are indicative of the efficiency of that rune type when it is actually used in that slot. It accepts every rune, except Armadyl runes. These values change daily. Players can insert runes into the machine to measure their value but for each combination tried, the required amount of runes from each of the three selected types is increased by 0.5% (resets daily). The total value of the runes affects how much fish wax waxes Created. The interface shows red, orange, or green dots on the left side of the interface, depending on whether the rune you placed in that slot is a bad, ok, or a good match. If the rune you placed in the machine matches the value of the rune "best in lock", it will appear green. If the rune has a value of less than 50% then this will show red, and a value that is more than 50%, will show orange. The following table shows the gain and number of runes of a particular type required to carry such runes into the machine, assuming that the player has obtained the maximum fish wax from the slot (since 0.5% is charged even on the first attempt). Finally, it is assumed that fish wax is sold for the average price: 15,433. Rune Base amount GE Price Amount per try (rounds down) Cost per try Base profitfor green inslot 1 or 2 Base profitfor green inslot 3 Mud rune 300 260,400 1.5 1,302 201.288 355,618 Astral rune 300 124,500 1.5 622.5 337,867.5 492,197.5 Law rune 300 171,000 1.5 855 291.135 445,465 Soul rune 300 403,500 1.5 2,017.5 57,472.5 211,802.5 Nature rune 350 141,750 1.5 607.5 320,531.25 474,861.25 Blood rune 350 237,300 1.5 1,017 224,503.5 378,833.5 Cosmic rune 400 164,800 2 824 297,366 451,696 Death rune 400 92,800 2 464 369,726 524,056 Dust rune 500 492,500 2.5 2,462.5 -31,972.5 122,357.5 Lava rune 500 483,000 2.5 2,415 -22,425 131,905 Mist rune 500 581,500 2.5 2,907.5 -121,417.5 32,912.5 Smoke rune 500 505,500 2.5 2,527.5 -45,037.5 109,292.5 Steam rune 500 499,500 2.5 2,497.5 -39,007.5 115,322.5 Chaos rune 500 76,000 2.5 380 386,610 540,940 Air rune 1,000 90,000 5 450 372,540 526,870 Water rune 1,000 25,000 5 125 437,865 592,195 Earth rune 1,000 18,000 5 90 444,900 599,230 Fire rune 1,000 159,000 5 795 303,195 457,525 Mind rune 2,000 38,000 10 190 19 0 424,800 579,130 Body rune 2,000 96,000 10 480 366,510 520,840 Each of the three slots has a best rune, which changes daily. The first slot counts for 30% of the total fish wax, and is the same for each player. The second slot also counts for 30%, and is one of three possible runes (varies from player to player). The final slot counts for 40% of the total amount of wax, and is randomly assigned to each player. If the player has a Runecrafting cape (or a max cape or completionist cape loaded with a Runecrafting cape), they can right-click and then activate the cape to see what their daily best rune for slot 3 is. Just because one of the possibilities is green on the second slot but a player chose the rune that is not green, it does not mean that the rune he/she chose will yield more fish than a rune that is not one of the possibilities. For example, say that the possibilities of the second rune slot are Death, Soul and The highest fish wax yield that is not one of the three is Fire (same yield for everyone). A player chose Soul, but it's not green. Green. can either collect more revenue than Fire or less. If Goldberg is asked for help with the machine, he will suggest a certain rune that has previously been shown to him by another player. Be aware that this suggested rune can transfer from the previous day and may not have a good rune anymore if after trying the suggested rune and all the combinations for the slots you still have a low amount trying swapping the first rune for something else. The profit (i.e., the market value of the fish wax, minus the cost of the used runes) will be greater if experimenting with runes that are pretty cheap, even if you don't have a 100% match. As an extreme example, if the perfect match happens to be the three most expensive runes (see the GE prices, in the table above), you end up spending more, in runes, than what you restore in fish wax. On the other hand, experimenting with combinations of only the six cheapest runes or so, you should be able to get an average gain of about 400k per day. Trivia The name is a reference to Rube Goldberg machines, which set devices or constructions to perform simple tasks in an overly complicated way. A famous example of this type of device is the game Mouse Trap, where players can set up their own. Community content is available under CC-BY-SA, unless otherwise stated. Noted.
