Morning Twilight6:31 AMLast QuarterSunrise6:59 AMSunset4:48 PMEvening Twilight5:16 PM Tue is a high temperature: 85 to 8 miles southeast of Pharr Tx and Falcon Lake Tx Tue's low temperature: 8 below zero at Crested Butte Co Wells gurgle and yield muddy water before the storm. Have Clear Sky subscriber? Click here to sign up for more Ashland City, TN, Meteorological Information Doppler Radar Regional Weather Radar Status Weather Conditions Satellite time when the sun is no more than 6 degrees below the horizon at either sunrise or sunset. The horizon should be clearly defined and the brightest stars should be visible under good atmospheric conditions (i.e. without moonlight or other lights). One still should be able to perform normal outdoor activities. A time period when the sun is between 6 and 12 degrees below the horizon at either sunrise or sunset. The horizon is well defined and the outline of objects can be seen without artificial light. Normal outdoor activities are not possible at this time without additional lighting. A time period when the sun is between 12 and 18 degrees below the horizon at either sunrise or sunset. The sun does not contribute to the lighting of the sky before this time in the morning, or after this time in the evening. At the beginning of the morning astronomical twilight and at the end of astronomical dusk in the evening, the illumination of the sky is very weak and can be undetectable. Civil sunset time minus civil sunrise time.actual sunset time minus time sunrise. Change Change daylight from today to tomorrow is also listed if available.
