## Kolba a thousand splendid suns

Edit Share Sakon and Ukon's unnamed kekkei genkai give them a unique ability to break down their bodies to a molecular level. The two brothers often use this ability to share the same body but can also use it to combine with the organs of others and destroy host cells from the inside. When the saxon needs help, Ukon can bring some body parts to block or attack the. Ukon's arms and legs can appear to increase the force and amount of Saxon's physical attacks. If necessary, Ukon can be separated from Saxon's body so that the two can attack independently. While this can be an effective way for an opposing double team, Ukon Saxon is not used to leaving his body and is much weaker in doing so. When in someone else's body, they are vulnerable to any injury to the homeowner, in theory allowing the host to commit suicide to kill one of the brothers. After leaving, if one of the brothers is injured, they can join with each other to recover. In this way, their recovery rate is much faster than that of a normal person, but it consumes a large amount of chakras. If the saxon lay asleep for healing, ukon would be the problem as he is not used to being the lead body. After integrating the DNA of Sakon and Ukon into him, Kabuto accessed this kekkei genkai. He and the rest of the Sound Four later accompanied rochimaru as he fled. Kidōmaru used the Spider Binding technique to prevent Konoha ANBU from following them. The Voice Quartet accompanied Sasuke Uchiha when he decided to join the side with Orochimaru. After the Sasuke Rescue Team found the Sound Four after leaving Chōji behind to deal with Jirōbō, Kidōmaru let his friends get in front of him while he was caught and playing with his followers. Because Naruto could use shadow clones, Kidōmaru decided to kill him first. Kidōmaru slowly chose the clones and tried to find the real one. When the shadow clones came out, he attacked the real Naruto Kidōmaru from behind. He grabbed and grabbed Naruto and tried to kill him, but he was stopped by Neji, who freed him and used Kidōmaru's gentle fist to free everyone. Neji went to war with Kidōmaru after the others left. Spider Webs and Sticky Gold Kidōmaru have the ability to make cobwebs by infnging his saliva or sweat with the chakra. These sewing threads are extremely sticky, yet durable and elastic. This is because its chakra constantly flows through the nets and they can be cut off by normal means such as kunai. You can use them to tie them up, trap them, even just perceive enemies. However, Gentle Fist can cut them, as the fighting style is based on using the user's chakra to attack precise points. You can also create a thick golden liquid hardened into a chakra blocking metal in contact with air. By chewing the cobweb fluid inside his mouth, he can make it more solid and gum-like, allowing him to create fern guns. However, this hardened material can instead be released with sweat pores and manufactured into a body-plated armor that can be completely defended against physical attacks, throwing metal, and even chakra-based attacks, such as Gentle Fist. Finally, he can create his particularly deadly bows and arrows that can shatter trees when he shoots.
