Where can I download a owners' manual for my Denon product? Owner's manuals for current and most previous production models can be found on the following link: Denon Manuals and Downloads Advertising AVR-2807 A/V Surround Receiver The AVR-2807 is The latest addition of Denon's versatile AV receivers, which incorporate all current surround formats and improved installation flexibility, all with great ease of configuration and operation. Audio section ■ Full discrete 7-channel high power amplifier Front 110 W + 110 W (8 ohms, 20Hz - 20kHz, 0.05 % THD) Center 110 W (8 ohms, 20Hz - 20kHz, 0.05 % THD) Surround 110 W + 110 W (8 ohms, 20Hz - 20kHz, 0.05 % THD) Surround back 110 W + 110 W (8 ohms, 20Hz - 20kHz, 0.05 % THD) ■ Latest 32-bit floating point DSP for the decoder • 24-bit/192-kHz D/A converter • 96kHz A/D converter ■ 'AL24 Processing Plus,' for high sound quality ■ Digital interface receiver supporting 24-bit/192-kHz signals ■ Large-output power amp section and power supply configuration, for stable high-power output ■ Stable power supply for high-quality sound and picture playback ■ Pure Direct mode, for the pure enjoyment of music in high-quality sound ■ Supports the most advanced surround playback formats • Dolby Digital EX • Dolby Digital • Dolby Pro Logic IIx • DTS-ES • DTS 96/24 • DTS Neo:6 • DTS ■ Configurable surround back amplifiers • Multi-zone system a 5.1-channel theatre in the main hall and a stereo environment in a second room. Bi-amp system: The front channels (L/R) are bi-wired in a 5.1-channel theatre to improve the quality of playback at the front for increased listening pleasure. Video Section - HDMI Digital Video Interface supporting high-quality 1080p video (-1) The AVR-2807 has HDMI digital video interface terminals (2 inputs and 1 output) that can be switched to 1080p high-resolution video signals. These HDMI terminals also support the digital entry of multi-channel audio signals. Version 1.1 compliant. Because hdcp is also supported, the video cannot be viewed on a non-HDCP screen connected to the AVR-2807; please connect an HDCP-compliant screen when viewing video material. High/low video conversion capable of HDMI output The AVR-2807 includes an up/down video conversion feature that allows the device to be connected to the video monitor via a single cable regardless of the format of the video input signal as follows: 1) Composite video signals are converted to HDMI, video component and video component; 2) The s-video signals are converted to HDMI, component video, and composite video; 3) Component video signals are converted to HDMI, composite video and video (\*3). \*2. Conversion I/P from 480i/576i to 480p/576p 3. The downward conversion of component video to composite or S video only applies to 480i input signals. 480i to 480p ( When a 480i/576i signal is entered from a composite video, S-Video, or component terminal, it should be taken out of the HDMI terminal.) - 3 sets of video inputs component - High-definition video switching - Composite processing and video S Signal Processing AVR-2807 uses a time-based corrector (TBC) to convert composite video and video S signals into video components to remove nervousness in the video signal during playback. Connectivity/Extendability - Variable subwoofer crossover commutation (40/60/80/90/100/110/110/150/200/250Hz) - iPod ASD-1R® Control Dock (option): Supports iPod playback when connected to the iPod AVR-2807 can be enjoyed via the AVR-2807 when the ASD-1R, Denon's original iPod control dock (sold separately), is connected to the AVR-2807's dedicated control terminal. The iPod can also be controlled via the remote control provided with the AVR-2807. Supports 3rd generation iPods later equipped with a Dock connector. Some functions may not work depending on the iPod generation and the software version. New automatic and QE room installation, with Audyssey's MultEQ, for global support of the listening area using a microphone provided - Room EQ Memory Black version is also available.
