Lcd display provides quick control over various functions that help you capture the perfect photo or video. Use the 12x magnification, 32mm aperture binoculars system to take a closer look at the topic you're choosing, for hunting, bird watching, surveillance work, sporting events, outdoor adventures and more! INCLUDED: Before using the device, make sure that all of the following items have been with the device. HOW TO USE: ADJUST EYE DISTANCE Keep binoculars in a neutral, observational position and rotate two lens cones (A) and (B) inwards or outwards until you see one circle through the lens. Be sure to adjust this every time you use your device. FOCUS Close your right eye and watch with your left eye. Rotate the center focus knob (A) until the image is clear. Then close your left eye and watch with your right eye. Turn the right adjustable eyepiece (B) until the image becomes clear. At this point, focal lengths on both sides have been placed, so just rotate the center focus knob to focus on the targets. USERS WITH GLASSES If you wear glasses, simply fold the rubber eye flaps (A) and (B) and move your eyes closer to the glasses to determine the correct field of view. CLEANING & MAINTENANCE: To remove dust or fingerprints on lenses, use a clean microfiber cloth Use liquid cleaners recommended for prescription lenses Do not try to clean the inside of the device Keep binoculars in a dry, ventilated place when not in use Staring at the sun can cause eye damage BATTERY: This item has a built-in lithium battery that automatically charges the camera every time you connect it to your computer using a USB cable. When the battery level is low, the MESSAGE Low battery level appears on the LCD along with a red indicator light. When the battery is charged, the indicator light will turn off. MICRO-SD CARD INSTALLATION: During installation, the included Micro-SD card must be disabled. Make sure that the Micro-SD card (A) is inserted into the correct slot (B) with the printed side facing down and the gold contacts facing forward. Insert the card until you hear a click. To remove the Micro-SD card, turn off the camera. When it is off, simply push the card inward to disconnect the locking mechanism (the card will pop out). We recommend that you use Class 4 or higher SD cards with at least 4 GB of storage. Low-speed cards do not support 1080p recording, which may result in lower video quality. To use the Micro-SD card safely, do not remove or turn off the power to the micro-SD card while reading the card. Always format a new card before using it. CAMERA: MODE OPTIONS When the camera is turned on, press the Mode button to select the mode you want to use: photo mode, playback mode, or video mode. PHOTO MODE The camera automatically stays in photo mode when you turn it on. You can take a picture by looking through binocular lenses, or with an open LCD screen (Snap/Ok button). VIDEO MODE Press the Mode button to switch to video mode, and then press snap/ok to start recording the video. Press Snap/Ok again to play videos or Photos. REPLAY MODE Press the Mode button to switch to playback mode, and then press up and down to or videos. Press Snap/Ok to play videos or view photos. To use digital zoom, press the Up and Down buttons in photo or video mode to select the digital zoom range. For best results, hold the binoculars tightly or use a tripod to prevent movement and/or shaking. PHOTOS/VIDEO/REPLAY SETTINGS: CHANGE PHOTO SETTINGS Select photo mode Press the Menu button to access the photo menu settings Press up and down button to navigate the menu options and select the setting you want to change Press the Set/Ok button to access the settings of the options Press the /Ok button to confirm the change in video settings Select video mode. Press the Menu button to access the video menu settings Press up and down, to navigate the menu options Press the Pin/Ok button twice to access the system settings Press the up and down button to navigate the options of the Press Pin/Ok menu options to access the settings options Press the Set/Ok button to confirm SPECIFICATIONS : PC & MAC CONNECTION: HOW TO CONNECT 12X ZOOM BINOCULARS TO PC Connect USB to camera when the device is off. Turn on the camera and two options will appear on the LCD screen: Memory and Camera to transfer saved photos and videos to your computer, select Memory and press Snap/Ok. Computer recognizes the device To use the camera as a webcam, select Camera and press Snap/Ok. Computer recognizes the camera as a webcam for use with specific programs such as Skype, Facebook, etc. This option only works with the following operating systems: Windows 2000/XP/Vista/Windows 7, MAC OS X 10.3.6 and above WARRANTY/CUSTOMER SERVICE Sharper image branded items purchased from SharperImage.com include a one-year limited replacement warranty.
