

## Ffxiv astrologian healing guide

 $\star \star \star = 0.3$  Tower of Dawn  $\star \star \star \star \star = 0.3$  Assassin and Pirate Lord  $\star \star \pm 0.3$  Assassin and Desert  $\star \star \star \star \pm 0.4$  Assassin and Underworld  $\star \star \star \pm 0.5$  Assassin and Empire \*\*\*#1.) The glass throne \*\*\*#2.) The crown of the \*\*\*\*.) The long time ago, in a land long burned to the ground, there lived a young princess who loved her kingdom... I had a good time reading the Kingdom of Ash. And there are no words I have to describe the feeling that I get while reading a book with what feels like an entire book community. We all updated, cried and sullen at the same time all over the social network. It reminds me of reading Harry Potter with my friends back when I was little, and there really aren't any words to even start describing that feeling because it really transcends words and language. Here's the thing - if you've loved this series from the beginning, you'll probably love this conclusion and be very happy in turning that last page. I had a rocky journey with Throne of Glass even before it became cool not to like this series and even before stans thought it would be cooler to ignore all the coarse, problematic elements. I just never loved this series. And I always feel like the characters I like about this world get the wrong end of the stick. And the kingdom of Aisha was no different. And in the true style of Sarah J Maas, the book was ungodly longer than it really needs to be. This review won't drag or flurry, it's just going to be my thoughts and feelings on what I did love and what I hated. I don't want to hurt anyone. if you have been injured by SJM - you are valid, and if the book means more than words to you - you are valid. These are just my thought was a little too comfortable (and a lot too straight and white). And if you're new to the book world, or just never bothered to actually seek a synopsis, Throne of Glass is a series about a young killer who is enslaved. Prince of the Royal and his best friend, who is also captain of the royal guard, saves her from slavery so that she can compete to become the king's murderer. But after a few books you realize that this world is also full of magic, and fae, and a demon-like creature called Valg who want to conquer everything. And this killer, this prince, and this captain of the guard, get much more than they ever dreamed of negotiating. The threads of fate merge in strange ways... But if you're reading this review of the final and seventh book series, you probably already know it. And you probably want to know what I think of that conclusion. Overall, I feel like my favorite character got really dirty where everyone else got a happy ending. So I'm bitter and petty and I'll talk about it more in the spoiler section of this review. Also many people said really horrible things to their friends/lovers and then didn't care that they said it until they were about to die. Like, I'm not here for any kind of abuse, and some of the actions of some of these characters on people that have love was really rude and unacceptable. Plus, I feel like this series ending was too clean, and that SJM really didn't listen to complaints about Court Wings and Ruins! Deus ex machina was very abundant in the end, in my opinion and seemed to have become a back to the mains in the last 150 pages. instead of give us more substance in the 800 pages in front of it. I also feel that SJM was really setting up for her new series, You will probably love this ending. I always felt that this series was fine, so I felt the end was just fine, too! Also this book got very dark in the first 25%, so be careful when reading! Content and trigger warnings for captivity, graphic torture, threats of sexual assault, talk about past sexual assaults, murder, death, very serious physical abuse, verbal abuse, enslavement, sexual content, and war topics. Now I get to the full spoiler thoughts for the Kingdom of Ash and all the books in the series leading up to this final book! (Breathtaking art by Gabriella Bujdoso) All right, friends! Again, I'll talk about spoilers for the Ashes kingdom, so be careful before reading! Basically, all our main characters are divided into five different groups, all of which are entrusted with different things. Dorian, Manon and Xiii try to unite the witches and find a third wyrdkey, which is hidden in Morath. Lysandra pretends to be Aelin while Aedion leads Chaol's headed to Silver Lake to meet his father, Yrene, Sartaq and Nesryn. Rowan, Elide, Lorcan and Gavriel are trying to save Aelin. Since Aelin is still in captivity because Maeve is tortured by Cairn, with her only ally being Fenrys. Kingdom of Ash is divided into two parts, and part one is very much all these groups trying to unite while all fighting their own little mini battles. Where the second part is really about everyone coming to Terrasen for the great and her to the fact that only the immortal fae, completely taking away her is man.... Come on. And then I thought, But she's lost her powers! It's business! No, they're just weaker, but she's infused her blade before, just in case she's still super strong. Like, my eyes, they're going to come out of my head. I once told you that even if death divided us, I would tear up every world until I found you. >> Rowan - in this book I was actually really empathetic to Rowan. >> Chaol – It's no secret Chaol has always been my favorite character (behind Manon in later books), so I'm really let Yrene be the person she wanted to be, no questions asked, every time, and that loved me even more. I still think that Chaol is the best dude in the whole series, and I still never understand the hatred he gets. >> Yrene- When it first came out she was pregnant, I was so scared. Like during the war? I wasn't ready. But Yrene is honestly such an amazing character, and I loved her whole story and every scene she was in. Also, my favorite part of this whole thousand-page book was when Yrene and Aelin met for the first time in all those years. > Abraxos - Why give him a partner only ... kill a friend? Honestly, a lot of things upset me about KoA, but that might upset me the most. > Petrah – True MVP of this book, for saving Abraxos' (and my) life. Only the Queen of Crochan can light the Flame of War to summon every witch from her hearth. >> Manon - Manon, the gueen of witches and my personal gueen, deserves more than Dorian's rude, wishful thinking, refusing to communicate, ass. And no one in the world will ever convince me that Manon is straight, I'm sorry. The most unpleasant thing when I read this book was when they had sex, and she told him what he wanted and that he didn't want him to leave, and then he left without saying goodbye... I mean, they were fucking. Then I saw her say she thought it was a promise, but in the sky, he doesn't deserve Dorian's ugly behavior. I really wanted her to tell him to bend over at the end of the book. And there's no way she's that weak because of some 20-year-old guy who treated her like. Dump him. >> Dorian - I'll be honest, I thought the reason I was fond of Dorian in this was because Maas will learn from the Court of Wings and Ruins, and actually give a more believable war ending with Dorian dying. Oh, no, he was just an in the whole manon thing. And when he looked at Maeve? I threw up in my mouth. And when he turned into a girl and discovered his new body? \* vomits again \* > Thirteen - (Minus Manon) Wow, they got made so dirty. I know I touched it in paragraph Abraxos, but I can't believe SJM would kill them and another guy we honestly didn't care about. I feel so bad. So damn bad. When they told Manon to live, I threw my book on the other side of the bed and just screamed because I knew it was going to happen. Asterin, who died, really confused me. All of them dying just felt so cheap, so bad, and I knew when it happened that they were going to be the only real victim SJM made with this final novel. And in the end, it was true, so everyone else could be heterosexually paired with their friends. >> Elide - I love Elide and her loyalty, but she also told Lorcan some really offensive things, and then she regretted it when he was supposed to die. Also, again everyone is just going to treat all their disabilities and it's a bit guestionable. Also, does Elide have a fetish on her feet? I mean, I'm not ashamed, but... Co. > Lorcan - I really loved Lorcan in this. He tried so hard, for Elide, for his friends and for himself, and it really warmed my heart. And now he's packing his own home pads for Elide. Bonus points. How long before the allies you've assembled begin to wonder why the Fire-Bringer isn't on fire. > Lysandra - I'll be honest, Lysandra and Aedion's views were easily my least favorite. And let's be real, Lysandra could be so much better... >> Aedion - ... Because death almost came for them. It never excuses abuse, ever. >> Gavriel - I actually hated how he and Aedion only met on one page, only for him to see his dad die. Not only did it feel pointless, but it was just cheap. >> Evangeline - Sweet lil' beans. And I really love her with Lysandra. >> Fenrys - \*flashing once\* I actually loved this character and felt so many sad feelings for him, but I think the book was frankly better with adding him. > Nesryn - I still feel like Nesryn was such a character, always, but I'm happy she's happy, I think. > Sartaq - I enjoy him and his birds, and I'm glad he makes Nesryn happy, I guess, but it's anything. > Erawan - The Last Remaining King of Valg! But getting \*cheated\* on him was like the most Scooby-Doo thing I've read in years. Maeve - I felt that when reading this book he gets an arc of redemption about five times, and I was so terrified. But again, anticlimactic end. And I hated how when those two villains were taken down, so did their army. It was too easy, and even the fighting scenes weren't great. But let's talk about the real character I want to talk about... Do you know the story of a queen who walked the worlds? >> Rhysand - Did Aelin really see Rhys and Feyre in Valerie and liked that she helped her get back together with Rowan and the gang? Like, I felt like she was playing Star Fox 64 and he gave her support (or slow) or something? Like I'm not making this portrait up, am I? Like it happened? My mind still can't process this information. We all knew the crossover was going to happen, but I really didn't expect it to be like that. Okay, let's talk a little more about the things that happened. First of all, everyone is heterosexual. Next, everyone was more shapely in this book! Lysandra has completely lost her unique and great ability, because like everyone and their mother, they can do it in this book. I hated it. Seriously. And Maeve could have done a lot more with her powers, but I feel that the scenes were much more concise and much more fading into black. So it's either a good thing or a bad thing for you. I forgot two things while reading. 1.) that Aelin is only twenty years old. That's so wild! I've been reading them for so long, I feel like they should be older. And 2.) This whole series really only plays during the year! Again, I've been reading these for so many years, I just can't wrap my head around this timeline and everything these characters have done. How many relationships they had, how many deaths they witnessed and how many terrible things happened. It really makes me think it's only been a year. I was hurt by the art of Charlie Bowater, found in B& amp; N special edition, and I'm just to say that Asian and white will never, ever, be interchangeable. Sometimes. And you know what SJM didn't do with these 1,000 pages of KoA? Anything to say or show that Manon was AnA. I'm half white and half Asian, and it's not an representation that will ever make me feel visible. And authors and artists (who used to draw characters as white) need to do better. I also want to link Aentee's review because it's amazing, and she really blew my mind when it comes to The Lord of the Rings. It's a really good review, you should all check it out! Overall, I'm glad this series is over. I'm not sure if I'll pick up more Sarah J Maas or not, but I'm glad I finished this series off. Again, it's never going to be a series that I love, but I really love reading the experience of feeling like I'm part of a massive buddy read with 75% of the book community. It's a feeling I can't put into words, but one that means a lot to me

and which I respect with all my heart. Blog | Instagram | Twitter | Tumblr | Youtube | Twitch... More... More
