Muramasa rebirth accessories guide

Tracking all objects in the open, keeping track of it can be one of the game's more difficult challenges. There are 55 to collect in total, and they are found all over the world of the game. If you're trying to collect them all, or are just looking for one in particular, then hopefully that will help to compile it into the list. Please note: This list of devices is only 100% accurate, which I collected them all. If you are playing as a school then the vendor stock will be different and some treasures are found somewhere other. I'll try and update this list to include these conditions if I have time. If you are trying to collect all of them (which unlock a silver trophy) you will need to complete the second time to the owners of the other character, your own character owners, and some evil (full list here). You will also need to visit every vendor in the game and sell each equipment. Doing so, naturally in collaboration with playing games, you're going to unlock as many items as you can, but chances you will not know you have to start searching for those who disappear. That's where the list comes in, and you can easily compare it to your own list so you can see immediately the items you're missing, and where to find them. • Some places are working a little bit in progress. If you do not do any wrong places, or have any additional information, please let me know in the comments and I will add to the guide!
