Nec m300xs projector manual

Do you need a manual for the NEC M300X projector? It also provides frequently asked questions, product evaluations, and user feedback to make the best use of your product. If this manual is not a required manual, please contact us. Is the product defective and there is no solution in the manual? Please leave a product evaluation and tell us what you think of the NEC M300X projector. Do you want to share your experience with this product or ask questions? Are you satisfied with this NEC product?Yes NoBe The first 0 votes to evaluate this product Our support team will search for useful product information and answers to frequently asked questions. If you have any inaccuracies in your frequently asked questions, please contact us using the contact form. Will you turn off the projector immediately after use? It is best to leave the projector on after use to give the fans inside time to do their job and cool the lamp. This extends the life of the lamp. This was helpful (67) What is keystone fixes? This can distort the projected image. This is the Keystone effect. Keystone correction is a feature that addresses this distortion. Not all projectors offer keystone correction. This was useful (27) What is the contrast ratio? The Verified contrast ratio indicates how far the whitest white is from the black. For example, a contrast ratio of 400:1 means that the black black on the screen is 400 times darker than white. High contrast ratios contribute to the clarity of the image. This was useful (15) how do memory cards need to be formatted for use with NEC projectors? FAT32 or NTFS is not recognized. This was helpful (0) how many hours does my projector lamp work? This was useful (0) this manual was originally published by NEC. The user manuals M350X and M230X for portable projectors M350X/M300X/M260X/M230X/M260W are not distributed in North America. Inside is a high voltage component. See service representative services. This symbol warns the user that an un isolated voltage in the unit may be sufficient to cause an electric shock. Therefore, it is dangerous to do any kind of contact with any part of the inside of the unit. This symbol warns the user that important information about the operation and maintenance of this unit has been provided. You should read the information carefully to avoid problems. Warning: Do not publish this unit to rain or moisture to prevent fire or impact. Do not use the plug of this unit in an extension cord or outlet unless all protrusions can be fully inserted. DOC Compliance Notice (Canada only) This Class B digital device meets all requirements of the equipment regulator that causes Canadian interference. Machine noise information regulation - 3.GPSGV, the maximum sound pressure level is less than 70 dB(A) according to EN ISO 7779. Caution Avoid displaying still images for long periods of time. In this case, these images may temporarily persist on the surface of the LCD panel. In this case, continue using the projector. The static background of the previous image disappears. To dispose of eu-wide used products in place in each member state, used electrical and electronic products carrying the mark (left) must be disposed of separately from regular household waste. This include projector and its electrical accessories or lamps. When disposing of such goods, please follow the instructions of your local authority and contact the store where you purchased them. After collecting used products, they are reused and recycled in an appropriate way. This initiative will help reduce waste and have a minimal level of negative impact on human health and the environment, such as mercury contained in lamps. The mark for electrical and electronic products applies only to current European Union member states. This manual is related to the product: Product:
