To understand what that means, let's break down what's going on in a line of poetry. When we read poetry, a group of two or three syllables is called foot. Words emphasize and despondent syllables, depending on how we write and say them. Think of it as parts of the words you emphasize and the parts you don't. A leg of poetry is referred to as IAMB if it has one un-stressed syllable followed by a stressed syllable. The word to describe is iamb because we don't emphasize de-in-word, but we emphasize the writer in his wake. Therefore, Imby means no pressure/pressure, in this order. Think of the rhythm as your heart beats as a good way to imagine and feel the stress that isn't stressed. To look at the second half of the term Pentameter Imby, let's look at what a meter does. A meter is the rhythm in a line of poetry. Fanta means five. Therefore, a pentameter is a line of poetry composed of five meters, or five groups of un-stressed syllables. The iamb is the most common metric leg used in English poetry. Shakespeare is known for his use of the Imby pentameter. He uses it in his plays and his poetry. Often, the Imby pentameter can be

used to give indications of class differences in Renaissance plays and works. In Shakespeare's work, upper-class characters speak in the Imby pentameter was widely used during the Renaissance in England. Poets like John Donne used The Imby Pentameter in his poetry. Chores, in previous eras and the Middle Ages, also used the Iambi pentameter in his Canterbury stories. It is important to note that a piece of poetry or work that uses the Imbi pentameter does not have to use the Imby pentameter throughout the work. Poets can use the Imby pentameter for one line and then not use it for the next line. Aside from using it to make a statement or characterization, as Shakespeare does, poets are tired of using the same rhythm. Here are examples of the Imby pentameter used: from The Saint Sonata 14 by John Donne: still but knock, breathe, shine and ask to be repaired. That I could stand up and stand up for mys and bend every other word in those two lines of poetry uptight. In the front row, the pressure falls on still, knock, shine, search and fix. Don chooses words that emphasize the un-stressed and cheeky construction. The humid words have similar audible movements or use torture to emphasize From Shakespeare's Sonata 12: When I see the virtue beyond the snout... Shakespeare, like Don, uses the Imby pentameter to open his sonnet. The words I, count, clock, say, and time hold tension. Shakespeare uses his humility heavily to get the line flowing and to emphasize every other word. From John Milton's Paradise Lost: Fast by the Oracle of God: I then run your help to my adventurous song that without middle flight intends to soar over Mount Aonian, while it chases... Milton tends to closely follow Pentameter lambique in this section of his work. If you read it aloud, you feel the unseathed pace. You can especially see the iambic pentameter in the second row by making a hard statement and emphasizing the voke in the word run. Applause as you say voke may help you feel the pace and pressures.
