It uses the latest iOS 11 design and has no ads as some launcher app would plague you with. If you're a fan of what iOS Pro looks like but have an Android, you might try giving this device a try. From Android to iOSOperating system launchers, they're nothing new. They are emulators and allow you to experiment and run other systems on a machine that are usually not released with them in mind. This is a common occurrence with phones as well, so there are tons of third-party apps that allow you to go beyond the limits of both software and hardware. The iOS Pro launcher features the sleek and convenient design of iOS 11, such as its Control Center, quick search feature, its smart folders and the various default widgets that come with it. You can also try the cool live wallpaper and iOS 3D effects on your phone Beauty insideNot just the look that Launcher for IOS PRO can give your device. When you run this app, your Android phone will start behaving like an iPhone X would, giving you access to the other interesting features that iOS has to offer. Things like custom locks and digital password options are available for you to try. You also get the various amazing themes that are predetermined on iOS, along with their sleek look for their applications. Control Center gives you quick access to settings, without the need for automatic options for the Settings app. Probably the coolest thing you can play with using this launcher is the 3D effects feature that give you dynamic wallpaper effects like snowflakes, cherry blossom petals and waves of water. That's all there is If you really like the design of iOS 11 and can't afford to buy an iPhone, Launcher for IOS PRO: No Ads Style Theme can give you that experience to go with your hobbies, and for free, to boot. It even removes the expected ads that come with such a cheap app. However, what will probably cost you a beta tester our story ginlemon.flower.launcher.permission.READ\_SETTINGS App client permission. ginlemon.flower.launcher.permission.WRITE\_SETTINGS permission of the application client. com.android.vending.CHECK\_LICENSE permission of the application client.
