If you're already using two-factor authentication for your Apple ID, then you're using a specific password for Cydia Impactor. Now you can delete this old password and create a new app-specific password for the Cydia impact effect. Follow this instruction to create a new app-specific password and fix Cydia Impact Error 173.Got in this URL from your web browser with your Apple ID and PasswordScroll until you receive the Security section. Click editClick to Delete existing App specific password and create a new password or create a passwordYou can add the name of the application and click Create Password (save it in notebook) Now when you drag and drop IPA to Cydia Impactor, I will ask for a password. You can provide the password you created and install the IPA file. Disable 2 step verification method in The Apple AccountPery, If the above method does not work for you, you can try this method. By disabling the 2-step verification option, you can resolve error. Follow this instruction to disable 2-step verification methods. How to disable 2-step verification for Apple IDLogin in Apple account and Go to the account sectionTo Select password and security OptionClick for Disable two verification stepsAnd verify your birthday and check saveTry another cydia impactor error correctsIn conclusion, Hope these two methods are works to fix Cydia Impactor Error 173 for Cydia Impactor. If none of the methods work for you. Just comment below. We'd like to help you. Additionally, if this article helps you not to follow us on Twitter, as do we on Facebook to receive the latest iOS updates and news via social media. Are you a smartphone geek requiring cool customization? Do you prefer the game to cracked apps to hit an opponent on the ground? Do you like to use patched apps on your devices? Tired of using a variety of tools for the sake of installing unofficial applications? Do you have to install THE IPA without even touching your iOS device? Is it a clear indication of an iOS geek? Well, it's a technology geek delivers you some amazing skills that explore the internet. Taking action without really knowing much is one of the best skills it provides. As new devices with the latest version of iOS introduce, trying new things is going to get you some really unwanted mistakes. Solving such errors is the real thing to know. All queries mentioned in the first paragraph have a final solution widely known as Cydia Impactor. It is a GUI tool developed specifically for the installation of IPA despite being official or unofficial. Transferring and dropping IPA files is all it takes. But a bunch of errors that occurred during the IPA installation makes it a little complicated. If you are a Cydia Impactor user, you may be familiar with Cydia impactor error 173. It is the most popular and frequent error while using Cydia Impactor. Therefore, here we will come up with his work solution. Just follow this step guide and get rid of it. © Cydia Impactor 173 Error (Layout.cpp:173) This is the error you experience after filling in your Apple ID and password to proceed with the installation of your IPA file. Here is the exact screen you are going to encounter, if it is a cydia impactor 173 error. Error is as follows: file: layout.cpp; line:173; what: Sign in with an app-specific password. You can create one in appleid.apple.com The root of the error: Enabled google two-factor authentication is the main reason for this error. It can be eliminated by disabling it. But given security concerns, you may not want to turn it off. However, solving the Cydia 173 error on Mac is possible without disabling 2fa. How to fix Cydia Impact 173 Error Here is the step guide to resolving the layout.cpp:173 error. Don't miss any steps and you'll get resolved this error in almost no time. Let's move on. Step 1: Download and export the Cydia Impact Tool. Step 2: Connect your iOS device to the and wait while your device model is recognized. Step 3: Open appleid.apple.com and sign in using your Apple ID credentials. Step 4: Go to the Security section and select an app-specific password. Step 5: Enter any random name to mark this password. ie, you can only put your IPA name. Step 6: An app-specific password will appear on the screen. Copy it to the clipboard. Step 7: Now drag the IPA file and drop it on the Cydia Impactor screen. Step 8: Enter your Apple mail and paste the app-specific password we just created. Step 9: Wait until you see the Success message on the impact screen done here. Step 10: Go to Setup – General – Device Management and tap the developer name listed there. In addition, you need to click on the Trust by displaying pop-up. Completing Thus, by adopting this simple method, you can easily solve the Cydia impactor 173 error permanently. Wasn't it simple, though? Report any kind of error occurred while using Cydia Impactor and we will try to resolve it as soon as possible. For your convenience, we recommend that you use one of these free error-free video hosting platforms on all devices and with all operating system versions. More on this topic: How to solve error 173 in Mac Cydia Impactor is one of the most useful tools that an iOS user can have on hand. Note: To remove Cydia from your iPhone or iPad, use the Cydia dress. Cydia Impactor is now a different tool altogether, used for sideloading applications on an iPhone or iPad. Using the .ipa file for an app, along with your Apple ID, Cydia Impactor signs and installs third-party app certificates on your device, but it appears that some users experience a provision.cpp error – usually error 150, 68, or 62. These are not very difficult to fix, and we will look at each, why it is caused, and how to fix it. Fix Layout.cpp:150 Error: This error occurs when the .ipa file is dragged and discarded in Cydia Impactor and you enter your Apple ID. The error message will tell you something like Provide.cpp:150 Sign in with an app-specific password or it might say your Apple ID and password were entered incorrectly. The following steps will guide you in determining this error: Open the web browser and go to (copy-paste in the browser) Enter the Apple ID and password you used with Cydia Impaster Click Security &t; Edit Search APP SPECIFIC PASSWORDS Click to create the password Type a password tag and remember the Click Create New Password button. copy it to Clipboard Now, when you use Cydia Impasctor to sideload an application, this is the password to use with your Apple ID. Fix Layout.cpp:68 or Layout.cpp:62 Errors: These two are slightly easier to fix and tend to appear when the Apple Developer Program goes down for When the .ipa file is signed by cydia impactor must have access to the portal and if the developer portal is not running, it cannot. You can stop this from happening only by using Cydia Impactor when the developer portal is running correctly. This can be monitored by visiting developer.apple.com/system-status. When you can see that the developer portal is running, you can go ahead and use Cydia Impactor to charge your apps. Fix layout.cpp:71 or Provide.cpp:81 Errors: This error message is warning warning that there is a conflict between the iOS deployment certificates used to side load IPA files. There is a way to resolve this, just follow these steps: Open Cydia Impact Program on your computer Click on the menu for XCode and then click on Recall Certificates You will be prompted to give the Apple ID/Password that the error occurred, type it and Cydia Impactor will connect to Apple All development certificates will be revoked – when finished, install the relevant IPA file again You should find that it works OK but, if it doesn't, try these steps: Check that you are using the latest version of Cydia Impactor; if not, update the Set up a second Apple ID; this will create a new signature profile and a new developer certificate if you have 2FA (two-factor authentication) in your Apple ID, create an app-specific password for use with this ID instead of dragging the .ipa file to Cydia Impactor, click the Device menu in Cydia Impactor, click Install Package, and then click the IPA file to be reloaded. Fix Layout.cpp:42 Error: This error can throw up one of the two messages – one tells you the system version is lower than the minimum specified for directory and the other tells you that the code signature was not verified. This could happen because the ZIP IPA file was dragged and dropped to Cydia Impactor. There are a few things you can try: Remember to extract the file before you drag it to Cydia Impactor - only the IPA file required Try a VPN to hide your location - it can be specific area, or it may be that your isp has detected what you are doing and blocked if everything else fails, try jailbreaking your device and installing your application this way Fix Layout.cpp:51 Error: This happens when the IPA does not support your iOS version. The only way to resolve this is to upgrade to the latest iOS and then try Fix Provision again.cpp:57 Error: This is down in iTunes is not up to date. While you're not using it for installation, you're using your Apple ID, and iTunes should be in the latest version: Repair layout.cpp:80 Error and cpp:168 error: This is related to the app certificate, and the error message will let you know that you already have a pending deployment certificate request. There are a few things you can try: Method 1: Revoke certificates Open Cydia Impactor and click on XCode Click Recall Certificates Type in your Apple ID and password and press Enter When you get the message certificate on the screen, try installing the IPA file again Method 2: New Apple ID This may be down on your Apple ID so go to Apple.com and create a new, free. Try method 3 again: Manually install the Package For some, dragging and dropping the IPA file in Cydia Impactor will cause the problem. Install it manually instead: Open Cydia Impactor and click Device Click Install Package and find the Click on it and download it this way Fix Provision.cpp:158 Error: The error message will tell you that the peer certificate cannot be authenticated and is down to not follow the IPA installation method correctly. After you install the file on your device, you must trust the developer: Open Settings &t; general tap profiles and search the profile list for the developer or Apple ID tap on it, and then tap trust now the error should not occur Fix Provision.cpp:159 Error: This is more likely to use an outdated version of Cydia Impactor. Delete it from your device and download it again, making sure it's the latest version. Fix provider.cpp:160 Error: This error occurs when your internet connection is not working correctly. Make sure you have a firewall and a strong internet connection, and if you're using a VPN, turn it off - you can turn it back on later. Fix provider.cpp:173 Error: Error message will prompt you to sign in with an app-specific password: From your web browser go to Appleid.apple.com and sign in with your ID Verify your identity in two-factor authentication Go to security &t; Create passwords Type a tag associated with the app you're trying to download Click Create , and a password will be created Copy it and use it with your Apple ID for the application in Cydia Impactor You can also try creating a new Apple ID and try it. If the error persists, disable two-factor authentication on your existing ID and try fix provision again.cpp:698 Error: This error occurs when Cydia Impactor does not receive your iOS device correctly. Fix Impactor.cpp:637: The easiest way to fix this is to delete iTunes and reinstall it on your computer – you need the most up-to-date version for Cydia Impactor to work properly. Fix zip.cpp:311 Error: The IPA file is likely corrupted. Remove it completely and download it again from the official source only. Fix zip.cpp:557 Error: This is down in the original IPA file not archived correctly, or the download was stopped. Try downloading again, making sure you have a strong internet connection – use only official sources for IPA files too. Fix zip.cpp:597 Error: This is not a very common error, but if you take it, restart your device and computer and try again. If it still doesn't work, delete Cydia Impactor and making sure you have the latest version. Fix http-win error, cpp; line 182 To fix this problem you need to start Cydia Impact and go to the menu &t; Impactor &t; Insecure SSL. This will now change the unsafe SSL setting and the error will be corrected. Also, check to see if you have a duplicate certificate. Turn off the feature and try again. This should correct error 182 of the Cydia impactor. Fix an ipa.cpp:456 This error occurs primarily because of a lack .app/info.plist. Find the file .app/info.plist and replace it. I don't know. you need to fix the problem. Cydia Impact will not detect my device? The problem may not lie in Cydia Impactor. If you won't recognize your iPhone, iPad, or iPod Touch, there's a good chance that the

problem lies on your computer. These are the main reasons why there may be a problem: You may not have iTunes installed on your computer Your iOS device is not connected properly to the computer, iTunes is unable to recognize the device connected How to fix Cydia Actor Not Incognize iOS Device: There are five methods to try here. start at the top and work until you find one that belongs to you: The first step is to check the port to which your iOS device is connected. Does your iPhone or iPad start charging when you connect it to your computer? If not, the USB port may be in error, so try a different one and keep trying until you find one that works. If the impactor application still doesn't work, go to the next method. Method 2: Reinstall iTunes Delete iTunes and all related services form your computer and reinstall it: Remove iTunes, Apple Mobile Device Support and Apple Support applications from your computer Restart your computer Install iTunes and restart your computer Try the Impactor app again. If it still doesn't work, proceed to Method 3, as shown below. Method 3: Does your USB cable work? If the USB cable isn't working properly, then the Percussion app won't be able to find your device. Try another cable and make sure you're using the correct Apple-certified cable. If the cable works, but cydia impact target is not, try method 4. Method 4: Update Cydia Impact As with any application of the software tool, you should make sure that you are using the most up-to-date version of Cydia Impactor. Download the latest version from the links above. Method 5: A different computer If it still doesn't work, just use a different computer or laptop. Fix Please update the Xcode 7.3 Error: If you are experiencing this issue, the only solution you have is to use the 3UTools application for Windows and install the ipa file using it. Unc0ver jailbreak users can find more information here. Cydia Impactor Alternatives: If none of the above solutions work for you, then try some of the best Cydia Impactor Alternatives to install IPA files on your device. These alternative applications just like Cydia Impactor, but do not throw so many errors. Hopefully, these will help you every time you are confronted with a provision.cpp wrong.
