Everest Gen7 PRO Red Cat Racing Everest Gen7 Pro, 1/10 scale RTR scale rock crawler is changing the way people buy RC crawlers. The Gen7 Pro comes with standard features and can be expected to be an option for values unprecedented in the scale crawler market until now. It all starts with powder coated with a 3mm ladder frame chassis designed and adjusted by the BPC custom chassis and two-person trail gear. The addition of a low-slang forward-mounting battery tray and steel electronics bridge creates a highly adjustable platform that costs twice as much along with customized crawlers. The Gen7 Pro is one of a kind of hinged body mount system with easy access to batteries, ESC and chassis. The front of the body is held in place using a high strength hook and loop system, so you don't have to easily snup with a lost body clip. Between the inner roll cage, outer fender and roof rack, the realistic body is well protected and looks great. Other standard features found in the Gen7 Pro are inner fenders, molded snorkels, folding mirrors, shackle mount bumpers with D-rings and ball hitch, LED mounts and roof racks loaded with scale accessories. Roof racks have spare tires, jacks, fuel cans, shovels, axes and sand ladders. The Gen7 Pro also includes a hobby wing brushed ESC, licensed interco super swan fur tires, CVA front axle and functional bead lock wheels. The stylish 4-door SUV body is similar to that found in many modern full-size crawlers and is available in green or black. It also includes a die-cut decal sheet with black, white, red and wood grain panel options, so you can customize the Gen7 as your own straight out of the box. The Gen7 Pro also includes a 3000mAh NiMH battery pack, NiMH charger and 2.4GHz wireless system, making it one of the best values on the RC market. If you try to build a custom rig like the Gen7 Pro yourself, and all its features and accessories are included, the cost will add up quickly. Now you can save money and defraud rtr scale crawlers. All this at an affordable price! It's clear why the Red Cat Racing Everest Gen7 Pro is such incredible value! Get your Red Cat Racing Gen7 Pro today! Powder coated 3mm steel ladder frame, 4-link suspension, threaded aluminum shock, features 1.9 beadlock wheels, CVA front axle, steel axle skid plate, metal spool axle carrier, entire ball bearing. Adjustable wheelbase (317mm - 325mm), multiple impact positions, adjustable approach and departure angle, tully suspension. Many scale accessories: full inner roll cage, inner fender, outer fender, molded snorkel, shackle mount bumper, D-ring and hitchball, LED mount, folding mirror, roof rack, spare tire, jack, fuel can, shovel, axe, sandrader. 550 brushesWaterproof crawler ESC 3 selectable brake mode, hex fly high torque metal gear steering servo, 2.4GHz radio system. Ready to assemble & run - includes 7.2V 3000mAh NiMH battery, and NiMH charger - transmitter how Everest Gen7 stacked up against big squid RC competition You need a 4-AA battery to check out - 1.9 scale crawler shootout free 3D printable parts file for Everest Gen7 3D printable parts file is available on our Thingiverse page. Everest Gen7 SPORT Red Cat Racing Everest Gen7 Sport, 1/10 scale RTR scale rock crawler shocked rc market. Out of the box, Gen7 Sport comes standard with features that you would expect to be optional, for amazing value. It all starts with powder coated with a 3mm ladder frame chassis designed and adjusted by the BPC custom chassis and two-person trail gear. The addition of a low-slang forward-mounting battery tray and steel electronics bridge creates a highly adjustable platform that costs twice as much along with customized crawlers. The realistic 4-door SUV body is similar to what you will find in many modern full-size crawlers. The high-quality die-cut decal sheet also includes black, white, red and wood grain panel options, so you can customize the Gen7 straight out of the box as your own. Shackle mount bumpers add even more realism and are ready to accept LED lights and mounts. True to scale, licensed Interco Super Swan Fur tires and functional beadlock wheels pull the Gen7 through the toughest of terrain. Each wheel uses inner and outer bead locking rings made of 2mm steel for maximum strength and tire holding force. The solid axle carrier lockout spool ensures that both the left and right tires are powered down for the most traction possible. Gen7 Sport includes waterproof Hobby Wing Brush Crawler ESC, 550 brush electric motor, waterproof high torque metal gear hex fly steering servo, 2000mAh NiMH battery pack, NiMH charger, and 2.4GHz wireless system. Gen7 Sport is a fully customizable scale crawler with many performance parts and accessories. Get your own Gen7 sport today! powder coated 3mm steel ladder frame, 4-link suspension, aluminum cap oil fill shock, functional 1.9 beadlock wheels, lockout spool axle carrier, aluminum wheel hex, entire ball bearing. Adjustable wheelbase (317mm - 325mm), multiple impact positions, adjustable approach and departure angle, tully suspension. Licensed Interco Super Swan Fur Tire, Scale Body, Shackle Mount Bumper (LED Ready) 550 Brush Motor, Waterproof Crawler ESC, 3 Selectable Brake Modes, Hex Fly Metal Gear Steering Servo, 2.4GHz Radio System. Assembled & ready to run - includes 7.2V 2000mAh NiMH battery, and NiMH charger - Transmitter FREE 3D printable part file for Everest Gen7 requires 4-AA battery. We have detected some suspicious activity coming from youThe address is temporarily blocked and blocked as a security measure. Check the box to let you know you're human (sorry, robots are not allowed). The body opening system gives quick and easy access to batteries (not included) and electronics. Optional body clip style mount is included. Remove the hook mount and use the included body clip. An important part of the chassis-mounted roll cage is the internal content. Why screw the roll cage into the body only? Fenders, roll cages and luggage racks are safely mounted to create a very durable and functional design. Adding even more features, it's a body lift rod that easily fits where you hold your bodywork during battery changes and maintenance. The high-strength plastic fender with robust and functional detailed integrated locking sliders keeps the body tight and protects against side impact while adding a realistic look. Molded plastic interior fenders improve durability and keep hazardous road waste away from electronic components and other critical parts. Detailed bumpers include shackles, six LED brackets and a rear bumper hitch. The side mirror has an adjustable pivot action to prevent breakage in narrow trajectory conditions. Yes, snorkeling is not working right now, but I think it's a great instrument. We hope you will believe it too. Chassis rc crawler Gen7 PRO with 3mm steel ladder frame is built around a powerful and durable chassis with proven performance. Working with veterans of the crawler community, the RC Crawler Gen7 PRO features a 3mm thick chassis designed by one of the best chassis builders. Lead the field with innovation and years of design experience. Large crawler driving and building. Thanks, the car definitely has the best chassis. The accepted challenge, we will see you in the path of the Rubicon. Detailed and versatile accessories. Functional full spare tires, 2 scale lamps, high lift jacks, axes, shovels and petrol cans are included and installed in the rc crawler Gen7 PRO idiot. Accessories can be rearranged, removed and replaced. Optimize baccalaureate features to suit your adventure on the road. The bracket is bolted to the baccalaureus in combination with the horizontal bar holder. The attachment mounting system can also be used to secure canvas, belt and elastic charging nets. Interco Super Swan Fur License Replica at The Exact ScaleInterco's IROK Super Swamper's high performance uses a patented three-stage design. This tire was specially selected for rc crawler Gen7 PRO by 1:1 scale crawler enthusiasts for its proven winning performance. We leave tire design to industry leaders in off-road tire design. The internal tire foam provides excellent sidewall resistance when needed, allowing the Super Swan Fur Tread design to do its job. 1.9 True beadlock wheel inner and outer steel rings are attached to multi-spoke rims. The performance and versatility of the RC Crawler Gen7 PRO has once again been demonstrated with these true beadlock wheels. Access to tire foam changes and adjustments is easy. Steel rings with a thickness of 2 mm provide maximum strength to secure tires in extreme rolling conditions. Axle lock steel axle sliding plate metal reel axle holder after top mounting of 4 links, all metal axle holder locks left and right wheels for maximum grip under technical conditions. Heavy duty ring gears are sure to against 550 high torque motors. The CVA Front Axle High Quality Front Axle features a constant speed seal for smooth operation between extreme steering angles and difficult terrain. Hexagonal aluminum aluminum coil damper Fully adjustable oil-filled shock absorber has a screw body design that allows you to easily adjust spring height and preload for maximum performance. HEXFLY Metal Gear Servo HEXFLY High Torque Servo provides the wide power (15kg to 6v) needed to navigate in harsh trail conditions. Metal gears result in precise long-term fail-safe operation. The 550 brush REDCAT RACING engine high power brush motor provides wide power to the wheel. Hobby Wing HEXFLY Crawler ESC New Hex Fly Crawler Electronic Speed Control features three selectable drag brake modes. 100%、50%、0%、 The new Hexfly ESC, which can handle 5-9 Nimh cells, and 2-3S lipos, is simply the highest speed control in its class. The included decal sheet customizing RC Crawler Gen7 PRO can be used to save RC Crawler Gen7 PRO to suit your style. You may need some kind of assembly. Mount.
