## Linksys re6400 manual español

Right-click the music file and select Linksys Range Extender. This list of supported media players can be changed with the release of new software or mobile apps. Windows users can stream music with Windows Media Player12. Mac users can stream music with proprietary software or the SofaPlay app. • Android users can stream music with MediaHouse, UPnP Play, Skifita, ArkMC, BubbleUPnP, Pixel Media and 2Player 2.0. iOS devices, including iPhone, iPad or iPod, can stream music with proprietary software or other apps such as, ArkMC, Smartstor Fusion, Mconnect and DK UPnP/DLNA. • The Extender supports MP3, FLAC, WAV, WMA, and AAC file formats, as long as these formats are supported by the streaming device and app. • The 3.5mm stereo port supports earbuds and power-powered speakers. How to access browser-based utility After setting up extender use extender browser-based tool to change any settings. On a computer or device connected to your remotest, open a browser (Internet Explorer, Chrome, Firefox, Safari, etc.) and enter extender.linksys.com in the address bar. Linksys Wireless-N Network Extender allows you to repeat the wireless signal from any access point or router to provide Internet connection in hard-to-reach areas via a wired or wireless connection. This article provides a manual way to manually configure your wireless extension.1. Identify the wireless settings for the router/access point, which are: Wireless Network Name (SSID)/Wireless Channel/Contracting Wireless or Security Key/Network To learn how to check or change your wireless network settings using the Linksys cloud account, click here. If your router has the classic web-based setup page, click here. 2. Reset the range relays - Press and hold the Reset button on the top panel of the area relays for five (5) seconds, or until the LED starts flashing to reset to factory settings. Step 1: Connect your computer to the Ethernet port on your range extension using an Ethernet cable. NOTE: Images may vary depending on the type of computer or extender area you are using. This example uses a RE2000. Step 2: Connect your range extender to the socket. Make sure the LED lights are stable. Step 3: Start a web browser and enter the default IP address or 192.168.1.1 in the address bar. To learn how to check the IP address of your Linksys router, click here. NOTE: If your computer has identified the default home page in your browser, you will be prompted to username and password automatically. Step 4: A prompt window appears asking for a user name and password. Leave the user name blank and type admin in the Password box, and then click Sign in. Step 5: Click wireless &gt; basic settings for &gt; wireless networks. Step 6: Set the radio button to Manual, and then type the router's network name (SSID). Step 7: In the Wireless Security section, select the security settings that match the router's settings. Enter your pass expression or WEP key, and then click Save Settings. WPA2/WPA Personal Mixed Mode or WPA2 Personal WEP QUICK TIP: For optimal wireless N performance, it is recommended to use WPA/WPA2 wireless security on the router and range extender. Step 8: Disconnect the cord from the router and remote browser for 30 seconds. Connect the router first. Wait for all the lights to stabilize, and then connect the area-back. The extender must already be synchronized with the router. LYNTIP: To ensure that the extender is installed correctly, open the DHCP table on the router and check if the range extension is specified with your IP address. Ping the extender using a wireless computer and see if you can get answers from it. Click here to learn how to control the devices connected to the router through the DHCP table. Click here for instructions on how to perform a ping test on your Linksys device. Network extension Aperte range extender, there are also other devices available on the market that can help you expand your wired and wireless local networks such as switches, access points, wireless bridges, etc. You can choose which of these products exactly suits your needs. Click here to learn more about these products. Related articles: The new Linksys network extenders can be configured to work in Access Point mode. Access Point mode allows your range extension to extend your Wi-Fi by connecting to your router or switching via a cable, so you may have minimal loss of performance or disconnect. For better Wi-Fi speeds, choose Access Point mode. This article shows you how to configure the network extender as an access point. These are Linksys extenders that are Configured in access point mode: AC1900+ Max-Stream Wi-Fi Network Extender™ Linksys RE7000 Linksys RE6800 AC1750 WiFi Extender Dual-Band Wi-Fi Network Extender AC1200 AMPLIFY Linksys RE6700 Dual Access Point Mode Linksys RE6500L Linksys RE6500H AC1200 Dual-Band WiFi Extender AC1200 BOOST EX Linksys RE6400 Wi-Fi Network Extender, AC750 BOOST Linksys RE6300 Wi-Fi Network Extender Before starting the configuration process, Make sure the following: An active Wi-Fi connection. Your Wi-Fi name and password/Wi-Fi security key. Click here for instructions on how to verify these Wi-Fi settings on your Linksys router. An Ethernet cable long enough to connect the router to the network extender. When you're ready, follow the steps below. NOTE: In the examples below, a Linksys RE6700 was used. Step 1: Plug in your power outlet. Wait until the light starts flashing orange. Step 2: Connect an Ethernet cable from the router to the network extender. Depending on the range of the extender model, you may have to wait for the light to turn green before proceeding to the next step. Step 3: Connect a wireless computer or mobile device to the standard Network Extension SSID, which is Linksys Extender Setup - xxx. NOTE: Xxx is the last three characters in your network-forward MAC address that can be found on the device's back label. Step 4: Open a web browser, and then type in the address bar. If it is not loaded, turn up the IP address of the network extender in the router's DHCP client table. To learn how to do this on Linksys Wi-Fi Routers, click here. For Linksys Smart Wi-Fi Routers, click here. Step 5: Click (Startup Options). Step 6: Under the Expand Range option, click Next as a cable area (access point). NOTE: If you have not connected an Ethernet cable from the network extender to the router or switch, you will be prompted to connect the cable and try again. Make sure you are connected correctly before proceeding to the next step. Step 7: Create the extended network that the signal forwarder sends to nearby clients to connect. NOTE: To configure Wi-Fi using the Wired Equivalent Protocol (WEP), you must manually configure the device, as the security mode setting only has WPA2 / Mixed mode (WPA2/WPA) and WPA2 (recommended) (WPA2) as your options. To manually configure the network extender, repeat from step 1 to step 4, and then select Manual Setup. Step 8: Create an administrator password to secure the network extender, and then click Save. You can also add a password hint. Step 9: You may be asked to register your Linksys product for updates and other information to improve your experience. Enter your email address, and then click Next, or click Skip. The network extender is now set to Access Point mode. When the network extender is in access point mode, the dual-band wireless access point is read at the top right. Was this help article useful? Features Technical Specifications Technical Service BOX CONTENT AC1200 BOOST EX Linksys RE6400 Wi-Fi Network Extender. Quick installation instructions. Regulatory information. REVIEWS \* Maximum performance as specified in IEEE 802.11 specifications. Actual performance may vary, and wireless network capacity, data transfer speed, range, and coverage may decrease. Performance depends on a wide range of factors, conditions, and variables. These include distance from the access point, the amount of network traffic, residential building materials used, operating system used, combination of wireless products present on the network, possible interference and other adverse conditions. The Connect button works with devices that support Wi-Fi-protected installation™, such as Other.
